Dealers Plan Strategy For Upcoming FUN Show

In order to accommodate the holiday schedules of our printer and mailer we are sending this initial issue of 1988, a few days early. This will also enable you to have it in your possession for the FUN Show.

When comparing bid levels for the majority of certified coins from the beginning of 1987 to the end of the year, one will generally find that prices have fallen. The primary reason for this is that many more coins have been certified over this time period, which has increased dealer inventories of certified coins. Thus, dealers have had to reduce their buy prices in order to avoid overstocking of slow-moving issues. This has perpetuated an overall market weakness, yet, for those who study numismatics (there are numerous issues which may be tremendously underpriced), this knowledge is quite valuable.

In various series, as the common coins fell throughout the year, it had the effect of dragging the entire series to lower levels. As the common coins within that series fell, the marketmakers withdrew or lowered their buys on the better issues along with the common ones. For those dealers who are aware of the small availability of certain issues, they are taking this opportunity to buy them, when available, at bids or higher. However, to protect this information, many of these astute dealers are not raising bids, they just buy these better issues when available.

Many dealers are quite anxious for the FUN Show to begin. As early as December 16th, one dealer ran a message on teletype wanting to know if the security room was open yet. This past couple of weeks has seen bidding activity, although sporadic, now including more issues in stronger demand. Primarily, better date dollars are on the rise in MS-65. Any of the issues which are listed on the Population Report as having 10 coins or fewer graded, are highly desirable in a client's portfolio. Needless to say, small population MS-66 coins are also wanted at higher bids. It must be pointed out that sellers of this material will usually demand well over bid levels.

Silver commems seem to be following this same pattern as MS-65 and 66 issues are in demand as long as low availability proves their rarity. However, like dollars in MS-64 and lower, a number of the more common

issues are available at discounted levels. Bidding for gold commems has slowed slightly, although most issues are stable at current levels.

The type coin market is still a sub-performer when viewing bid levels, as the most common issues within a series continues to languish in dealer inventories. This area of the coin market will pick up very rapidly as soon as dealers feel it has reached a market bottom. Furthermore, like the previously mentioned series, the better and rare dates are not being given away at anywhere near current bid levels.

Gold remains one of the most actively traded areas of the certified market. When prices get too high for the commonly traded issues, supplies become heavy and they sell at discounts. When prices become too cheap, supplies become very thin at those levels so dealers who need them must raise their buy prices. This is a natural supply/demand cycle.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, may make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red brown), full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

Certified Coin Dealer's newsletter reports the national coin market for certified coins only. Only the most active areas for the coin trade are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bid at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

MINT STATE TYPE COINS

Prices are for the most common dates.

If the coin you have will stand on its own merits without the grading certificate and the CCDn bid is lower than the CDN, then refer to the CDN.

THE SIGN OF A NEW ERA IN COIN GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The principals of NGC cannot buy, sell, or trade coins commercially. NGC is creating *the* standard for objective, consistent, and accurate grading of higher quality, investment grade coins.

Look for premium quality, NGC certified coins at the following Member/Dealers.

Rarity May Be The Key Word For 1988

As we begin this new year, bidding activity for certified coins is just starting to become more visible again. After a holiday season which finds most dealers concentrating on seasonal sales and vacations, it is now time that they get back into the swing of things and this usually begins with the FUN Show, which will be in full progress by the time this is in the mail.

One question many dealers are asking is, "What will the new year bring?" This is the beginning of the third year for an expanding certified coin market. There are many thousands upon thousands of certified coins in the wholesale marketplace which have a recognized value, many on a sight unseen basis. As more coins get graded, the numbers begin to increase for the most common issues in the most common grades. As we can see from the last few months, this causes dealers to lower their sight unseen bids to *safe* levels. This will continue to occur until they become properly priced in relation to what dealers feel is a good value and are then willing to stock quantities.

The past year may be known as the year which saw common issues drag better date coins to lower levels. But, was that really the case? Bids may have fallen for better date coins, as well as common date coins, but that was only what the unknowledgeable could visualize by looking at sight unseen, *safe* bids. What the astute dealers are doing, along with their numismatic clients, are buying those better date coins at prices well above those *safe* bid levels because they know that these coins are particularly rare and difficult to locate. And there are still enough numismatists out there who realize that *safe* bid levels may not always be indicative of the true value for better dated coins. Whereas, it is a safe assumption that bids are indicative of a common coin's true value where they are actively traded and quantities exist. However, this cannot be assumed where a specific coin indicates a population of ten coins or less, within a grade.

In the last week, dealers have begun to actively (visibly bid) seek these better date coins, and a good example is the Morgan dollar series. Dealers are jumping over each other's bids in an effort to secure any of these better dates that come on the market. There is a long list of plus signs in the MS-65 column that should be a sign of encouragement for the whole industry. Why? Because rarity is once again being recognized and dealers are willing to pay for it. Just as common coins will seek their own levels, eventually, better dates

will also. This may be known as the year when rare coins start to realize their true potential.

As we stated, MS-65 Morgan dollars are being actively bid, yet, they may not be traded that much due to their rarity, or, the fact that the present owners demand way over current bids and buyers are not yet prepared to pay that much. Nonetheless, a market that is very actively traded is U.S. gold. There are large quantities of MS-60 to MS-64 gold coins which have been certified and these are treated more like commodities than any other series. Spreads are very tight in this market and marketmakers can use them to adjust their cash positions by increasing or decreasing inventories. The market has generally come down, of late, as most marketmakers wish to increase their cash positions.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, may make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown) full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Heritage and P.C.G.S. Your Numismatic Advantage

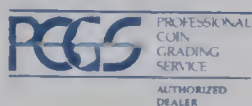

As part of our continuing commitment to quality rare coins and exemplary customer service, we at Heritage offer one of the most extensive inventories of P.C.G.S. graded coins in the United States.

In addition to a wide assortment of Morgan Dollars, Walking Liberty Half Dollars, Mercury Dimes and U.S. Gold Coins, we also offer a diverse inventory of rare and exotic type coins graded and certified by P.C.G.S.

If you are a P.C.G.S. buyer, Heritage offers you the following advantages:

- A broad-based inventory of P.C.G.S. coins, in stock and ready for immediate delivery.
- A variety of interest-free deferred-payment plans which enable our customers to take advantage of current price levels.
- A liberal trade policy – we will accept *all* P.C.G.S. graded coins in trade at current Certified Coin Dealer Newsletter “Bid” prices against coins purchased at our retail prices. This offers you an excellent opportunity to trade your collection or portfolio.
- An intensive Want List program – we take our customers’ Want Lists very seriously and will make every effort to locate the particular coins you need. To this end, we have provided space below for you to list your current Want List coins.

Send us a valid Want List of P.C.G.S. coins you currently wish to purchase and we’ll send you a Bausch & Lomb 5X magnifying glass absolutely free.

FUN Show Exposes Weak Areas Of Certified Market

At the just completed annual FUN Show in Florida, many dealers realized early on in the show that they would have to adjust their trading levels if they were to have a successful show. Many dealers were able to do this and reported having a good show, but the results of this event have caused a couple of areas of the certified coin market to slip to lower levels. Specifically, Type (MS and Proof) and Walkers were trading at levels well below previous bids. This has resulted in numerous minus signs throughout these columns – almost all grades were affected.

Type coins may have suffered the most as minus signs almost cover the range of 64, 65, and 66 coins. Most dealers would drop their buy prices every time they added to their inventory. In some cases, even with lower bids, they still would buy coins. As further evidence of faltering price levels, many certified coins were selling at discounts in the FUN Auction.

Walkers (bid levels have been shrinking of late) are getting little, if any, support, and as a result, continue to decrease. This is primarily caused by an increase in quantities available on the market, along with the fact that many more coins have been graded, especially in MS-64 and 65 (1941 - 47). Even some of the MS-66 coins seem to be an increasing supply.

Despite these two negative factors, as mentioned earlier, many dealers did very well. The auction was conducted by Mid-American Rare Coin Auctions, Inc., which featured numerous certified coins. Although some lots drove weak issues to lower levels, there were many that realized strong prices after very spirited bidding. The following are just a few of the prices realized from this sale.

Denomination	Cataloguer's Grade	Price Realized
1796 Dime	PCGS MS-65	\$37,400
1837 Dime (no stars)	PCGS PR-63	\$ 5,940
1891 Dime	NGC MS-66	\$ 2,970
1812 Half	PCGS MS-66	\$ 8,580
1890 Half	PCGS PR-66	\$ 5,060
1914-S Half	PCGS MS-65	\$ 5,720
1847 Dollar	NGC MS-64	\$ 3,960
1881-S Dollar	ANACS MS-65/65	\$ 385
1893 Isabella	PCGS MS-64	\$ 1,650
1900 Lafayette	PCGS MS-65	\$18,150

1861 \$3 Gold	NGC PR-64	\$14,850
1932 \$10 Gold	PCGS MS-65	\$ 7,700

The Morgan dollar market continues to "shine" in MS-65 and better. The common dates appear stable and the better dates find active buyers seeking whatever may be available. To show they are serious, they keep bumping the high buyer to even higher levels. An indication that some dealers are beginning to do their homework may be found in the MS-65 Prooflike bids. Several dealers are now bidding higher for P/Ls than for non - P/Ls. This may seem strange, yet, most bidders were just throwing numbers out for P/L bids without any rationale or comparison to non-P/L, bids; and many P/L bids were well below non-P/L, which if used would have looked ludicrous since P/L dollars are, by far, rarer than non- P/Ls. In many cases where we have listed an "NB" (no bid), it may mean that the highest bid found is lower than the bid for the next lowest grade and would not represent a justifiable entry.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, may make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown) full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active trading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

THE PROMISE IS NOW A REALITY!

THE GRADING SERVICE THAT DELIVERS

Recently, when Numismatic Guaranty Corporation opened its doors, a large number of the country's leading coin dealers had already become members of the Numismatic Guaranty Corporation network. That's because they've recognized the need for improvement in coin grading. They know that Numismatic Guaranty Corporation is committed to providing the most accurate and consistent grading services available today. And because Numismatic Guaranty Corporation will not buy, sell or trade coins, you, the investment community and the investing public can have confidence in this credible coin grading service.

For more information, contact
NUMISMATIC GUARANTY CORPORATION
P.O. Box 1776, Parsippany, New Jersey 07054

THE COIN GRADING SERVICE ENGINEERED TO PROVIDE UNBIASED GRADING.

66 and Better Material Reaching New Heights

This is by far one of the most active weeks for bid changes since the inception of the *CCDN*. A clear-cut divisional line is being drawn within almost every series. On one side of the line (lower grades) bids are falling as marketmakers reassess their inventories and lower their buy prices accordingly. On the right side of this divisional line, dealers check their inventories and find no coins. Then they check the PCGS Population Report and find the reason they have none in inventory is that very few, if any, have been certified under that particular grading category. This allows the marketmakers to safely bid "to the moon", for these items, without worrying about buying too much stock. So it's easy to understand why bid levels have dropped dramatically in some series. Availability is the chief determinant of bid levels.

Walking Liberty halves (1934-47), in MS-64 to MS-66, have fallen considerably over the last few weeks. The primary reason for this can be found in the census report. There have been over 18,000 Walkers graded MS-64, with almost every issue from 1941-47, indicating at least 400 coins graded. In MS-65, 12,007 coins have been graded (1934-47). And, in the illustrious MS-66 grade, over 1,300 pieces have been graded. At the previously higher bids, marketmakers were beginning to buy too many coins as almost every day saw most issues become less rare. Inventories were backing up, so buy prices were lowered. This results in lower bids which reduces the value of inventories. All these negative factors cause psychological weakness, as well, which may take some time to turn around.

In the meantime, marketmakers have set their sights to higher quality, thus, MS-67 coins are up throughout the whole series. There have been a total of only 74, MS-67 Walkers certified by PCGS, with only one issue having more than 8 graded (1941-P/23). At this point in time, there is very little risk of bidding too high and becoming overstocked. Whatever current bid levels are, sellers will usually demand well over these figures when they are available.

The Buffalo nickel series seems to be fairly strong for early dates, 1913 to 1927, in MS-64 and better. Of course, the fewer the number of coins certified, the stronger the bids. In other words, most of the D and S mints see a very limited supply so competition is keen for these coins. An interesting note this week, as bids have practically doubled for the 1916/16-P Buffalo in MS-63 thru MS-66. This might be real exciting for those that own any, but as of yet, none have been graded by PCGS. Furthermore, the last one

we can remember sold at an auction for around \$10,000 and was a strictly graded BU coin. To the best of our knowledge, there may be only one finer. Nevertheless, these higher bids are not likely to locate many coins, but they will serve to inform numismatists of their true rarity.

The type series is suffering from excess availability in Proof and MS-64 and lower quality. In 65, bid levels are mixed as the issues with higher bids usually have lower quantities of coins graded than the issues which are falling. In other words, bidding of late, is directly related to rarity. As you review the MS-66 and PR-66 columns, the rarity factor is illuminated even further. In the type chart, a majority of the issues in 66, MS or Proof, have fewer than 10 coins graded – and many have only five or less. MS-66 (and Proof) seems to be the quality which most dealers are now demanding, at least in PCGS coins.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, may make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters and prooflike on dollars. PCGS has established grading sets for most major series

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active trading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

TAP INTO MORE COINS AND INCREASE SALES WITHOUT INVENTORY RISK!

COMPUBOURSE GIVES YOU MORE COINS TO SELL – RISK FREE.

Now you can sell from the world's largest inventory of certified coins without the risk of carrying charges or declining coin values.

All you need is your PC or terminal with a modem – and CompuBourse – the FREE computer service from Heritage.

CompuBourse saves you time.

When you tap into CompuBourse, you have access to our constantly updated, multi-million dollar inventory of ANACS, PCGS, and INS coins, right on your computer.

Every coin is competitively priced at current market value.

And you can order the ones you want instantly, without ever leaving your desk.

Immediate shipment is guaranteed, even when you order specifically numbered PCGS or ANACS certified coins

No more wasted time traveling to coin shows or calling multiple dealers.

And you can improve your cash flow by using our convenient credit.

CompuBourse is easy to use.

In fact, it's a snap. Just follow the step-by-step instructions we send you, and you'll be buying and selling coins faster than you ever dreamed possible.

You'll have your own secret access code, and once you're in, just follow the prompts on your screen.

It's as easy as dialing a telephone!

Call now to get introduced to CompuBourse.

To tap into the enormous profit potential of CompuBourse, call Heritage toll-free:

1-800-US COINS (872-6467).

We'll send you everything you need to start saving time and money.

Call now . . . the world's largest bourse is only a phone call away.

COMPUBOURSE™

The Heritage Building • 311 Market Street • Dallas, Texas 75202-9990
WATS: 1-800-US COINS (872-6467) • In Texas: 214-742-2200

Note: CompuBourse is a FREE on-line service from Heritage. However, calls originating outside the (214) area code are subject to standard long distance phone company charges.

Better Date Morgans, In MS-65 and 66, Top Dealer Want Lists

As a result of some very strong bidding activity this past couple of weeks, certain areas of the certified coin market are showing some hefty movements to the upside. More specifically, Morgan dollars in MS-65 and better are the primary movers. Some of the MS-66's have increased as much as 50% in one week, with at least two buyers at these new levels. Many of the others have increased 25%. The following examples are listed for comparison:

MS-66	Previous Bid	Current Bid
1888-O	\$1,950	\$3,000
1888-S	\$4,100	\$5,000
1889	\$1,975	\$3,000
1890-CC	\$5,025	\$7,500
1891-CC	\$4,275	\$6,000
1893	\$6,275	\$7,500
1899-S	\$4,000	\$5,000
1901-S	\$5,000	\$6,000

These are all quite impressive gains. But, what may be more impressive is their relative rarity in MS-66. PCGS has only graded a total of five of these issues in MS-66, while NGC has not graded any as of yet. It is impossible to establish numbers from the other grading services, as they do not publish census reports. However, over the years, it is safe to say, that even those dealers who have handled millions of mint state silver dollars, have handled very few of these dates in this ultimate condition. The point is, whether there are coins available or not, bid levels will establish value for these rare coins, when and if they come along.

The MS-65 column for Morgan dollars also contains numerous plus signs as dealers are posting their bids relative to availability and needs. If they have specific issues in stock and other dealers have the same issues available, their bids will obviously be conservative enough so that sellers won't treat them as a "dumping ground" for their unwanted material. On the other hand, if a dealer has want lists for particular issues and he has none in stock, his bids are more likely to be competitive with other marketmakers. If the issues are available, it is likely buyer and seller will eventually arrive at a feasible settlement. If availability is practically nil, then the bidder can feel rather liberal with his bids. This business is made up of extremes. One bids too high, he buys too many coins. One bids too low, he doesn't buy anything.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

One always has to adjust in order to meet the needs of his clientele or excessive inventory.

Walking Liberty halves continue to adjust according to the needs of the individual dealer. Many dealers are overstocked in MS-65 and lower grade Walkers, 1941-47, thus, bids are not real strong. However, almost the entire series is in demand for coins graded MS-66 and 67. There are a few exceptions within the 1936-45 range, mostly 'P' mints.

U.S. gold bids appear to be generally stronger this week as some bids got ridiculously low. Some of the common issues were down to levels where only an occasional coin would trade, so marketmakers had to raise their buys in order to satisfy their want lists. MS-61 to 65 Saints have especially firmed up and several dealers will buy at current levels.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, may make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown) full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

MINT STATE TYPE COINS

Prices are for the most common dates.

If the coin you have will stand on its own merits without the grading certificate and the CCDn bid is lower than the CDN, then refer to the CDN.

THE PROMISE IS NOW A REALITY!

THE GRADING SERVICE THAT DELIVERS

Recently, when Numismatic Guaranty Corporation opened its doors, a large number of the country's leading coin dealers had already become members of the Numismatic Guaranty Corporation network. That's because they've recognized the need for improvement in coin grading. They know that Numismatic Guaranty Corporation is committed to providing the most accurate and consistent grading services available today. And because Numismatic Guaranty Corporation will not buy, sell or trade coins, you, the investment community and the investing public can have confidence in this credible coin grading service.

For more information, contact
NUMISMATIC GUARANTY CORPORATION
P.O. Box 1776, Parsippany, New Jersey 07054

THE COIN GRADING SERVICE ENGINEERED TO PROVIDE UNBIASED GRADING.

Common Issues Trade Within Very Narrow Ranges

Do sight unseen bids relate to the actual worth of a specific coin? In many cases, not really. Sight unseen bidding actually represents less than 2% of the total number of dealers who buy and sell coins. The majority of dealers want to see the coins they are buying before they make a commitment to purchase. Furthermore, it is even more difficult to get clients to buy coins without first viewing them. The sight unseen concept may work for bullion type coins (clients are even fussy in this area, not wanting scratches on their coins), but it is still in its infancy when it comes to rare coins.

Then what does sight unseen bidding really represent? These bid levels are for the worst possible scenario. Where hundreds, or even thousands of coins have been graded in a specific category, dealers may bid on these coins as if they don't want to buy them. Thus, bids are low. This is due, largely to the fact, that there is such a tremendous amount of revolving inventory in the dealer to dealer market that is not being absorbed by the collector or investor. Furthermore, bids must take into account that the buyer may not like the coin. It may be darkly toned, lacklustre, or just not the quality he would like to sell his customers. Therefore, he takes these factors into account and weights his bids.

An example may help. Common date MS-65 Morgans are bid at \$315 minimum. One dealer takes 100 common dates to a show and offers them at \$350 - \$375 on a "pick" basis. By the end of the show he will have the worst of the group remaining in inventory, which he then sells to the dealers who are bidding \$315. So the sight unseen gives the dealer a basis from which to work. It also informs the client of the "bottom line" value of his coins if he has to sell and has no time to shop around. But it does not mean, "this is all they are worth."

Recently, a Grant with-star silver commem, in MS-65, was sold at auction (at the San Diego Show). There were several bidders at the \$14,000 level and the final buyer paid \$16,500. Yet, bid is only \$11,000 on a sight unseen basis. The sight unseen buyer is trying to protect his business by being conservative. Nonetheless, if a coin can be viewed first, it is likely that the prospective buyer would be willing to offer more in-line with the true value of the coin than he would if he was buying a "used car" over the telephone.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins. There are many other dealers who also make a market in NCI coins.

Grading is based on the philosophy of James Halperin (author of "N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other two services listed. Minimum cost is \$24 per coin and turnaround time is approximately ten business days or less. By the way, when sending coins to be graded, you may request a particular grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge only and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

In early 1986, the grade of MS-64 was adopted, which resulted in a tightening of their grading standard. We will report 1986 and newer papered coins only. The various dealers across the country who handle NCI coins usually do so on a sight basis. However, our bids represent sight unseen buys.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike".

This week's bidding activity can generally be viewed as stable to higher for 65 (and better) coins, while lower grades are mixed. Dealers are still trying to pry loose better-date Morgans in MS-65 and higher, if they have been graded. MS-64 dollars seem very weak as buyers are concerned with the possibility of excessive supplies. Even many of the better dates are lower as marketmakers will not support previous levels. Peace dollars appear stable to higher in MS-65 or better. Overall, the dealer community seems to be saying "if large numbers of specific issues have been certified within a particular grading category, our bids will be very conservative."

Bidding for type coins continues to be mixed. Dealers do not have much confidence in type at this time; so their bids are protective. The issues which appear higher, are apparently on want lists for clients.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

Since ANACS was established, grading interpretations have changed somewhat. Recently, ANACS adopted the 11 point grading scale of uncirculated. All grades will not be used at this time. They must have a specific grade within each series in their grading set before it can be graded. For our purposes, bids will represent 1986 and newer papered coins. Price changes should be affected by bids not by grading. There are numerous dealers across the country who buy and sell ANACS coins. Most deal at sight, while a few deal sight unseen.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible.

PCGS

Professional Coin Grading Service: Established in early 1986, to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers and many more, who deal in PCGS coins, may make sight unseen buys for PCGS coins. PCGS uses the 11 point grading scale for uncirculated coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value.

PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series.

CERTIFIED COIN DEALER newsletter

Dept. CCDn P.O. BOX 11099 TORRANCE, CA 90510

CERTIFIED COIN DEALER newsletter reports the national coin market and active trading services are represented. CCDn uses every coin available to insure accuracy and completeness of bid and prices shown. Since prices represent the highest known bid at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

PEACE DOLLARS

The majority of 1985 ANACS graded coins will command bid levels unless negative comments appear on the certificate. Previous years certificates will bring substantially less than bids. NB - Represents no bid at this time.

MINT STATE TYPE COINS

Prices are for the most common dates.
If the coin you have will stand on its own merits without the grading certificate, and the CCDn bid is lower than the CDN, then refer to the CDN.

New Expanded Coverage of Certified Coins to Include NGC

Over the past several months it has become increasingly clear that numerous dealers across the country are making markets in coins graded by Numismatic Guaranty Corporation (NGC). Over this same period of time, NGC has moved into the "top three" in terms of wholesale trading among dealers. Although there are not ready markets in all the areas where one finds bids for PCGS coins, many dealers have voiced a need for reporting of NGC prices. Therefore, with this issue, we will begin to report NGC bids, from dealer-to-dealer, on a weekly basis. Since NGC has graded less than 10% of the total number of coins graded by PCGS, there will be a lot of areas with "no bids" for awhile. The major areas that appear very active are Commems - MS61 to 65; Dollars - MS63 to 66; Type - MS and Proof - 61 to 67; Gold - PR64 to 67 and MS61 to 67; and Walkers - MS64 to 67. *Keep in mind, initially, NGC bids may fluctuate considerably over the next few weeks while each and every issue seeks its appropriate demand level.*

In expanding the CCDn to include NGC, we also felt it was necessary to add the MS67 column to a number of the PCGS series (also some low-end grades, MS61, 62). Many dealers have been making markets in Proof and MS67, even though some coins have not yet been certified in this grade. They are hoping to establish themselves as the market, when and if any

of these coins get certified. The "67" column has been added to Commems, Dollars, Type, Gold (Proof), Better Date Coins, Buffalo Nickels, and Mercury Dimes. Since PCGS is the forerunner in wholesale trading among dealers, we have moved it immediately next to the dates within each series. This was done at the request of numerous dealers to enable them to locate prices quicker.

In order to make room for the more actively traded certified coins, it was necessary to situate the ANACS and NCI bids in a more condensed form on pages A, B, and C. Since coins from these two grading services do not receive as much active bidding in comparison to PCGS and NGC, the ANACS and NCI section of the CCDn will only be updated and included once per month (the first issue each month).

Bear in mind that ANACS may grade a coin with a split grade, i.e., MS63/64. In this case, one would check in the MS63 column; the lowest grade on either side. ANACS is a popular service among the collecting community. However, it is not used as much by dealers as in the past. As a rule, dealers do not make sight unseen bids for ANACS coins, therefore, our listed bids are for sight seen coins that make the grade. The other three services are listed as sight unseen bids.

PCGS Professional Coin Grading Service: Established in 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers may make sight unseen buys for PCGS coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value. PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series. Current population reports are available.

ANACS American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 100 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series. Current population reports are available.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately ten business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation" and "strike". Due to the fact that NCI coins do not see active bidding on a regular basis, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin
market for certified coins only. Only the most active areas for
the most active grading services are represented. CCDn uses
every means available to insure accuracy and completeness of
the bid prices shown. Since prices represent the highest known
bids at press time and they are based strictly on dealer needs,
prices will fluctuate according to these needs.
Individual buy and sell prices will vary from dealer to dealer.
What price levels an individual dealer buys or sells at is strictly
up to the dealer. CCDn represents only that the bid prices listed
were the highest known to us at press time.

Certified Coin Dealer newsletter

Dear Subscriber:

Now that the market has been firmly established for certified coins, it is time for you to reacquaint yourself with the market for rare coins. The *Certified Coin Dealer newsletter*, like the original Coin Dealer Newsletter (est. 1963) is a weekly publication. Prices are constantly updated for the most widely traded series or issues for ANACS, NCI, PCGS, and now NGC graded coins. ANACS and NCI coins will only be listed in the first issue of each month.

The CCDn (Bluesheet) bid levels represent dealer bid prices, although they may pay more depending on their need. The Bluesheet is important to you since bid levels differ considerably from one service to another. For example: An 1881-S Morgan Dollar in MS-65:

	ANACS	NCI	PCGS	NGC
Bid	\$310	\$135	\$300	\$415

This was taken from the February 12, 1988 issue.

PCGS, NCI, & NGC bids are actually sight unseen bids, while ANACS may or may not be. Like the Greysheet, the Bluesheet bids represent the highest consistent buyers, although, unlike the Greysheet, volatility is a characteristic of the certified market as bids can increase or decrease dramatically in a short period of time. This volatility is one of the reasons you need the Bluesheet now!

Six Money-Saving Reasons to try Heritage

- ✓ **Try Heritage once instead of your current PCGS dealer.**

We'll give you six money-saving specials, PLUS:

- ✓ **An unconditional 10-day return privilege.**

- ✓ **Interest-FREE 90-day layaway** to help stretch your coin buying budget

- ✓ **Priority service**

We'll process your order within 48 hours - when you use your credit card.

- ✓ **Approval service**

Creditworthy customers may apply for approval service after one significant paid transaction.

We offer:

- The largest selection of PCGS coins anywhere in the world
- The best value
- Incomparable service

That's what you should expect from the World's Largest Rare Coin Dealer!

Call now . . . ask for a Heritage representative . . . these specials are limited.

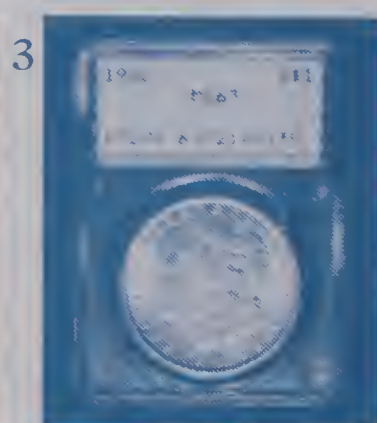

Call Now!
1-800-US COINS
(872-6467).

Special Offer #1:
1872 Two Cents MS-64 Red
(Key Date, and the only coin certified by PCGS in this grade)
\$3,960
or 4 monthly payments of \$990.

Special Offer #2:
Walking Liberty Half Dollar
Date of Our Choice
(The Walker market is gaining momentum)
MS-64 **\$179.** or 5 coins for **\$875.**
MS-65 **\$360.** or 4 monthly payments of \$90

Special Offer #3:
1902 Morgan Dollar MS-63
(Lustrous examples of this better date)
\$145.

Special Offer #4:
1921 Morgan Dollar MS-64
(One-year type coin with low PCGS population)
\$179. or 5 coins for **\$875.**

Special Offer #5:
\$10 Liberty Gold Piece MS-62PQ
Dates of Our Choice
\$700 or 4 monthly payments of **\$175.**
(Less than half the price of MS-63 and just an eyelash away)

Special Offer #6:
\$20 Liberty Gold Piece MS-62
Dates of Our Choice
\$780 or 4 monthly payments of **\$195.**
(Combine the benefits of gold bullion and numismatic value)

ORDERING INSTRUCTIONS

1. American Express, VISA, MasterCard, and Discover Card accepted. Please include your signature and send all information on raised portion of card with order.
2. Please list your second choice, as many items are one of a kind in our stock. If ordering by type, list "same type" as your second choice. Your first choice is always sent unless already sold.
3. Free 90-day lay-away offered. Please send 25% with order and 25% per month, \$200 minimum order please. Unpaid lay-aways over 90 days are returned to stock.
4. No interest, six-month lay-away available. Call us for details.
5. Call on our toll-free WATS line 800-872-6467 on any order over \$100.00.
6. All coins are graded at a minimum by Heritage's interpretation of N.C.T. grading standards, unless already certified by another third party grading service.
7. All coins are guaranteed to be genuine.
8. Full 10-day return privilege for any reason.
9. Texas resident: add applicable sales tax to all orders.
10. All orders shipped registered mail the same day if possible.
11. Coins may be examined in person in our offices in Dallas, Texas. Since all coins are kept in bank vaults, they are available to be viewed only during banking hours. Please call at least 30 minutes prior to arrival, so that the coins may be removed from the bank vaults.
12. Three-day approval service available to established customers with qualified references.

Note: Due to advertising headlines, prices may change due to market fluctuations. Prices are established as of the January 29, 1990.

James Halperin and Steve Ivy, Numismatists

Dis-Premium Causes Extreme Volatility in Weak Market

First of all, what is dis-premium? Dis-premium is the penalty one has to pay in order to receive a sight unseen bid for a particular issue. When dealers first began to use sight unseen bidding for certified coins (mostly PCGS), there were usually premiums attached to the coins over and above "raw" coins because they were traded as a universally accepted (among a few dealers) product on the basis of grading. Recently, however, the coin market has been in the furrows of a bear market. Dealers have plenty of inventory of common coins, yet, some still wish to practice sight unseen bidding. In order to protect their inventory balance, they may bid 10% to 20% under what they feel they can get for the coin. This may be further magnified by the fact that they may not like the particular coin. Thus, this second factor enters into the bidding equation. This manner of bidding has established the dis-premium and made it an important factor in negative volatility in the coin business. It has, however, created a ready cash market for the customer who has to sell his coins immediately to a sight unseen buyer. In the meantime, it also appears to the same customer that the coin market is not yet ready to come out of the doldrums, so he is keeping his money into other investments.

Even the plus signs for MS-66 and 67 dollars can lend further evidence of dis-premium. The last few weeks have seen bids jump dramatically for these rarely encountered specimens. However, these bids are still conservative, based on sight unseen. For example, the highest bid we have been able to verify

for an 1897-O Morgan in MS-67 is \$23,000. Yet, one recently changed hands in a dealer to dealer sale for \$50,000. Nonetheless, the dis-premium bid is only \$23,000. How does the dealer explain this to his customer who he tries to sell this phenomenally rare coin to? Only those with many years of experience and the knowledge that they have gained over those many years can truly understand the rarity factor of "old coins."

As one can readily see, bids for NGC coins are beginning to fill in categories that previously had no bids. However, this may be a long slow process as NGC dealers begin to make markets only when coins become certified in new areas. Since PCGS has been in business much longer than NGC, their wholesale trading activities are more readily available. As NGC progresses, we expect to see more bidding activity in all of the areas we report.

While NGC bids are newly listed in the CCDn, we can expect to see substantial changes in bid levels as dealers bid higher or sell lower than the reported bids. In an attempt to not mislead the reader with plus or minus signs, we have eliminated them this week and will probably wait a couple of weeks before we put them into use. Plus and minus signs lend a sense of direction to a market, however, a newly reported market will take some time to adjust. It makes no sense to report directions (strengths or weaknesses) in a market until it has sufficient time for these adjustments to take place.

ANACS and NCI charts will appear in the CCDn the first issue of each month.

PCGS Professional Coin Grading Service: Established in 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers may make sight unseen buys for PCGS coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value. PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series. Current population reports are available.

ANACS American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 100 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series. Current population reports are available.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately ten business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars \$20 St Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to the fact that NCI coins do not see active bidding on a regular basis, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

PCGS vs. NGC -
Which is Better and
Why...

The Sign of the Times:

Coin prices continue to mount as the stock
market continues to falter

The time to act is now. There is probably no more appropriate time to
apply this old cliché to rare coin buying than today. Coins are poised
for tremendous gains in the next six to twelve months as the stock
market continues its downward spiral. Each day investors are turning
away from stocks and looking at other investment alternatives, espe-
cially tangibles. The following graph shows how coins fared against
gold and silver bullion during the last ten years.

Tangible Investments

More Positive Market Seen As Bids Stabilize

As we stated last week, while bids are being added and adjustments are being made to the NGC columns, plus and minus signs will not be used. This is only temporary. It serves no purpose to indicate market direction until bidding becomes consistent.

One might notice that many NGC bids are higher than the corresponding PCGS bids. In most cases, this is because very few, if any, NGC coins of the specific issue have been certified at this juncture in comparison to PCGS coins of the same date and grade. As more coins are graded in NGC holders, a surplus of the most common issues will develop and prices will adjust accordingly. On the other hand, there are several PCGS coins which bid higher than the corresponding NGC coins, due to the fact that PCGS has been in business longer and has a larger following. In addition, PCGS coins have a much more active bidding infrastructure. That is, there are many more consistent bidders for PCGS coins than there are for NGC coins.

With just a few exceptions, plus signs are literally covering the MS-65, 66, and 67 columns (PCGS) for silver commems. It is more important to find this strength in the MS-65's since this is the area that had fallen in the past few months. It now seems that a few buyers are willing to keep their buy prices at current levels (or, even higher) and take a chance that

they won't become overstocked in any one area. This is a positive sign for, not only commems, but the whole market in general. As buyers maintain a structured demand for coins in all areas and if they are able to preserve current bids, it will create a positive attitude among the whole coin market. If market balance can be maintained over a few short weeks, then the market cycle will be reversed and it will once again be moving upward.

Overall, the dollar market appears to be stable as there seems to be a good mix of pluses and minuses according to dealer inventories. Even the common date MS-64 and 65 Morgans are fairly steady, although they dropped a little. The MS-64's fell from \$110 to \$105, with several buyers at \$100 to \$105. The MS-65's, on the other hand, fell from the \$290-\$300 area, to \$275-\$290 bids depending on the dates. This area does seem to be searching for direction.

The type market may be the most important indicator of coin market direction today. It has been perpetually weak over the last few months. Nevertheless, last week and this week, the overall type market indicates a broader harmony of the entire market. This may be the area to watch over the next few weeks for a clue of things to come.

PCGS Professional Coin Grading Service: Established in 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers may make sight unseen buys for PCGS coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value. PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series. Current population reports are available.

ANACS American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 100 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to the fact that NCI coins do not see active bidding on a regular basis, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Teletrade
Introduces

Mint State '88

A dynamic directory designed to meet the needs of the new numismatic world

- ☐ **Coin Industry Directory**
Names, addresses, and phone numbers of over 7000 dealers and others with an occupational interest in coin collecting and investing. By far the most comprehensive directory of this type ever published.
- ☐ **Coin Show and Convention Calendar**
A listing extending through 1988 and into '89. Enables you to plan out your show activities.
- ☐ **Certified Prices Realized**
Compiled from over 12,000 coins sold during 1987 and '88 in Teletrade's first 34 auctions. Helps you determine coin values and rarity by date, grade and grading service.

The first edition of *Mint State '88* will be limited. Only \$20 (or \$35 for 1988's two editions) if you send in now!

Teletrade 375 Park Ave. NY NY 10022
(800) 232-1132

- ☐ Enclosed is \$20 for my copy of *Mint State '88*
- ☐ Enclosed is \$35 for the first two issues

CERTIFIED COIN DEALER

newsletter

a weekly report on the certified market
published by the Coin Dealer Newsletter (est. 1963)

Vol. III No. 10

March 4, 1988

Single copy price \$3.50

"Inventory Balance" Creates Weak Appearance For Many Issues

It's beginning to appear more and more that unless a particular coin is on a dealer's want list, his buy prices for "unwanted" coins are kind of like the U.S. being in the Winter Olympics, he bids on them, but his prices aren't really competitive (we may be in the Olympics, but we are only competitive in a very few events). This week finds a multitude of changes in the Morgan dollar charts for PCGS, ANACS, and NCI; the only reason NGC is not included here is because there are so many empty holes where dealers have not yet begun to bid. For the most part, MS-64 quality and lower dollars are sinking rapidly, although the rare dates are managing to remain steady. MS-61 Morgans have fallen to \$28 bid, however, it is understandable that very few coins will actually trade at this low level since it costs at least \$22 to have them certified. Most dealers want a minimum of \$35 for any graded Morgan and that doesn't allow for much margin.

Common date MS-64 Morgans are now bid at \$100 (PCGS). Only a short year ago these were bid \$350 - \$400 each. And the MS-65's are down to \$275 - \$280 for several of the common issues. To show how tight these spreads can be, there are many sellers of these 65's at under \$300.

What has caused this show of weakness? Mostly, it is a result of excess supplies on the wholesale market that has created these current low levels. There seems to be an awful lot of coins in dealer inventories that

customers do not like for one reason or another. Usually they don't like the toning or they feel that the coins are low-end examples, thus, buy prices are lowered for sight unseen coins. Nevertheless, most dealers will pay a substantial premium over these low bids for coins they can see, especially so, if they are on want lists.

Silver commemoratives seem to be following the same path as Morgan dollars. MS-64 and less quality coins are adjusting down as sellers try to rid themselves of excess inventory. On the other hand, MS-65 and better coins are still showing upward movement (a very few common MS-65's are lower) as dealers and their customers compete for the issues that have a very small population.

U.S. gold remains a very heavily transacted area of the certified market even though bids keep falling for coins graded MS-61 to MS-65. Granted, the rarer issues do not trade all that often, but dealers will adjust their buy prices according to their inventories; thus, bids may come down on certain issues insinuating weakness. However, it may be "inventory balance" that really causes the weak appearance of some better issues.

As of next week's issue, we will begin to use plus and minus signs in the NGC columns.

PCGS Professional Coin Grading Service: Established in 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers may make sight unseen buys for PCGS coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value. PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series. Current population reports are available.

ANACS American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 100 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to the fact that NCI coins do not see active bidding on a regular basis, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Certified Coin Dealer newsletter

Dear Subscriber:

Now that the market has been firmly established for certified coins, it is time for you to reacquaint yourself with the market for rare coins. The *Certified Coin Dealer newsletter*, like the original Coin Dealer Newsletter (est. 1963) is a weekly publication. Prices are constantly updated for the most widely traded series or issues for ANACS, NCI, PCGS, and now NGC graded coins. ANACS and NCI coins will only be listed in the first issue of each month.

The CCDn (Bluesheet) bid levels represent dealer bid prices, although they may pay more depending on their need. The Bluesheet is important to you since bid levels differ considerably from one service to another. For example: An 1881-S Morgan Dollar in MS-65:

	ANACS	NCI	PCGS	NGC
Bid	\$310	\$135	\$300	\$415

This was taken from the February 12, 1988 issue.

PCGS, NCI, & NGC bids are actually sight unseen bids, while ANACS may or may not be. Like the Greysheet, the Bluesheet bids represent the highest consistent buyers, although, unlike the Greysheet, volatility is a characteristic of the certified market as bids can increase or decrease dramatically in a short period of time. This volatility is one of the reasons you need the Bluesheet now!

THE PROMISE IS NOW A REALITY!

THE GRADING SERVICE THAT DELIVERS

Recently, when Numismatic Guaranty Corporation opened its doors, a large number of the country's leading coin dealers had already become members of the Numismatic Guaranty Corporation network. That's because they've recognized the need for improvement in coin grading. They know that Numismatic Guaranty Corporation is committed to providing the most accurate and consistent grading services available today. And because Numismatic Guaranty Corporation will not buy, sell or trade coins, you, the investment community and the investing public can have confidence in this credible coin grading service.

Majority of Bid Changes Move to Higher Levels

This week's CCDn is by far the most positive in several months. Not only are there a massive amount of plus signs in most areas, minus signs appear very infrequently in just a few series. In most series, bid levels had dropped so far for grades MS-61 through 64 that they may have finally reached attractive levels for buyers. There seems to be more active bidding, by more dealers, at or near current levels. There also appears to be fewer coins available at discounted levels which may be an indication that the majority of these issues have reached base levels. A further indication of market strength is that most dealers are beginning to bid on coins as if they are trying to buy them, not just support a market. If one just tries to support an issue in a bear market, all he will do is increase his inventory and prices will usually end up falling anyway.

The dollar market (both Morgan and Peace) is showing the most active bidding of all series. Almost every issue is higher in MS-66 and 67, with numerous issues up in MS-65 also (PCGS). MS-61 thru 64 grades are stable at current levels, with just a few exceptions where sellers have discounted specific issues, but for very limited quantities. Common date MS-65's show the only real weakness in the Morgan series, but this should be easy to comprehend. There is such an overabundance of supplies on the market that buyers have lowered their bids considerably. And every-

day more coins are available through the certification systems. As a result, buyers are trying to stay away from common-date MS-65 Morgans.

Commemoratives, both gold and silver, are seeing much more active bidding in MS-65 thru MS-67. The few minus signs in MS-66 and 67 issues are a result of lower bidding by dealers, whereas, most of the lower bids for MS-63 thru MS-65 issues have occurred because sellers have discounted these specific issues along with buyers lowering their bids. However, for the most part, this series is stable to higher.

Walking Liberty halves, 1916 to 1938, are steady to higher in MS-64 thru MS-67. Although, there are numerous minus signs for MS-63 and lower grades and a few of the common dates (1940-47) in MS-65 and 66. The main reason for the minuses is the excess supply on the market and in dealer inventories.

The U.S. gold market continues fairly stable in all grades, with just a few minuses due to lower buy prices on the part of the major market-makers. Most marketmakers do not have an endless supply of money, therefore, they must keep some sort of inventory balance, and the only way to do that is to lower their bids once in awhile, just to stabilize their inventory.

PCGS Professional Coin Grading Service: Established in 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers may make sight unseen buys for PCGS coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value. PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series. Current population reports are available.

ANACS American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (303) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 100 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to the fact that NCI coins do not see active bidding on a regular basis, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Market Perception Stabilizes Dealers Feel Turnaround Forthcoming

Initially, many dealers felt that the Mid-Winter ANA began slowly, however, by Saturday, these same dealers were discussing how the certified market may have turned a corner. It may be too soon to tell, but even this week, attitudes seem to be more positive. The true test is yet to come over the next few weeks and at Central States in early April. Nonetheless, if current bids can be taken as a measure of future activity, there may be a "silver lining" after all.

MS-64 Morgan dollars, which have been a leading indicator of this downhill slide, seem quite firm at \$100 and, in fact, have moved slightly higher to \$102 bid. There were numerous wholesale trades, at ANA, ranging in price from \$100 to \$110. And some of these transactions were large quantities, such as, 100 to 500 pieces. Common MS-65 dollars found dealers trying to buy at \$255, though sellers were adamant about holding on and "taking them to their grave" before they would sell at that rate. So, transactions have been monitored at a minimum of \$260, but if someone needed quantities they would have to pay \$270-\$280.

Once again, this week finds numerous plus signs for MS-65 (Morgans) and higher quality for almost all dates not considered to be common. Due to the fact that there are numerous collectors around the country in need of these dates, competition is sharp for the few specimens which have been

graded. Two examples were seen at the ANA. First, a 1927-S in PCGS MS-65 brought in excess of \$11,000 on a wholesale basis. The coin apparently traded hands four times before it reached this level. A second example was a coin that ultimately found a new home with a very discerning collector. An 1892-S PCGS MS-67 corralled the interest of at least 3 dealers at over \$100,000 each before a collector ultimately purchased it at well over that number. These examples are on the high end of the spectrum, but it shows what can occur when the market begins to heat up.

At the ANA, a few dealers expressed the fact that when commems start showing plus signs, it is a bullish sign for the rest of the market. They felt that most commemorative issues, MS-64 and higher, were stable, if not a little higher. This week's CCDn indicates numerous plus signs, now it is up to the rest of the market to follow.

This past week has seen a definite improvement in the number of active buyers for various series. One area of contradiction is the U.S. gold series. Even though it is still quite active, many bids have fallen slightly. Normally, this may be a sure sign of weakness, however, I think it can be explained by the fact that this is a high dollar value series, even in low grades. In order to balance their inventories with other profitable series, dealers must forego this high value market.

PCGS Professional Coin Grading Service: Established in 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 160 authorized PCGS dealers who will send in coins for grading. These dealers may make sight unseen buys for PCGS coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value. PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series. Current population reports are available.

ANACS American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (719) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 100 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation" and "strike". NCI coins do not see as active bidding as PCGS or NGC therefore, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

THE PROMISE IS NOW A REALITY!

THE GRADING SERVICE THAT DELIVERS

Recently, when Numismatic Guaranty Corporation opened its doors, a large number of the country's leading coin dealers had already become members of the Numismatic Guaranty Corporation network. That's because they've recognized the need for improvement in coin grading. They know that Numismatic Guaranty Corporation is committed to providing the most accurate and consistent grading services available today. And because Numismatic Guaranty Corporation will not buy, sell or trade coins, you, the investment community and the investing public can have confidence in this credible coin grading service.

Common Date Dollars Move Higher and Confidence Strengthens

The mainstay of the coin market is generally considered to be Morgan dollars. Although a number of other series are, at various times, just as active (sometimes even moreso), including U.S. Gold, Comems, Walkers and Type, Morgan dollars will usually lead the coin market cycle. The past year or so, MS-64 and 65 dollars (common dates) have lead the coin market to the current low levels that we now find. And, as is usually the case, when common dates falter noticeably, the rest of the series will follow suit. This had been the case for a period of time, that is, until dealers began making use of the census report to determine those issues which are not likely to be found in sizable numbers. These rarer issues then began to take off. Any issue, in MS-64 or higher, that has a low population, has generally seen bid levels rising over the last couple of months.

The escalation of bid levels for low-population issues, combined with the fact that common date MS-64 dollars have now increased each of the last two weeks, has dealers anticipating an end to the bear market. At Mid-Winter ANA, dealers were trying to buy MS-64 dollars at \$90-\$95 and MS-65's at \$250-\$260. Regardless, they ran into a stonewall at these levels. Since that time, MS-65's have stabilized at

\$270-\$280 (1881-S at \$260), while the MS-64's have increased to \$102, then to \$105. Considering there are orders for many thousands of MS-64's at this level, dealers appear to have reason for optimism.

The commem market progresses steadily with a large number of plus signs for MS-65 and higher grade coins. The few intermittent minus signs are a direct result of offers to sell specific issues, at lower levels, while buyers have also lowered their bids on same. The balance of this series, those with no bid changes, is actively sought by various dealers around the country at current levels.

The Type market may well be the weak link in this upward trend. Although there are some scattered plus signs in the type columns, there are many more minus signs. Most dealers are still not sure that this market has bottomed out. One dominating component remains true, the bid levels are for the most common issue within a specific type category, and most dealers do not want common, they want better dates, if not downright rare. Nevertheless, this can be good for numismatics – it means more buyers are taking an interest in the educational aspect of numismatics in trying to determine what, in fact, is really a better date.

PCGS

Professional Coin Grading Service: Established in 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 250 authorized PCGS dealers who will send in coins for grading. These dealers may make sight unseen buys for PCGS coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value. PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series. Current population reports are available.

NGC

Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (719) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation" and "strike". NCI coins do not see as active bidding as PCGS or NGC therefore, they will only be listed once a month.

 GRAPHICS Shane Downing

Certified Coin Dealer newsletter reports the national coin
 market for certified coins only. Only the most active areas for
 the most active grading services are represented. CCDn uses
 every means available to insure accuracy and completeness of
 the bid prices shown. Since prices represent the highest known
 bids at press time and they are based strictly on dealer needs,
 prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer.
 What price levels an individual dealer buys or sells at is strictly
 up to the dealer. CCDn represents only that the bid prices listed
 were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible
 bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit
 on a sight basis.

TAP INTO MORE COINS AND INCREASE SALES WITHOUT INVENTORY RISK!

COMPUBOURSE GIVES YOU MORE COINS TO SELL – RISK FREE.

Now you can sell from the world's largest inventory of certified coins without the risk of carrying charges or declining coin values.

All you need is your PC or terminal with a modem – and CompuBourse – the FREE computer service from Heritage.

Compubourse saves you time.

When you tap into CompuBourse, you have access to our constantly updated, multi-million dollar inventory of ANACS, PCGS, and INS coins, right on your computer.

Every coin is competitively priced at current market value.

And you can order the ones you want instantly,
without ever leaving your desk.

Immediate shipment is guaranteed, even when you order specifically numbered PCGS or ANACS certified coins.

No more wasted time traveling to coin shows or calling multiple dealers.

And you can improve your cash flow by using our convenient credit.

CompuBourse is easy to use.

In fact, it's a snap. Just follow the step-by-step instructions we send you, and you'll be buying and selling coins faster than you ever dreamed possible.

You'll have your own secret access code, and once you're in, just follow the prompts on your screen.

It's as easy as dialing a telephone!

Call now to get introduced to CompuBourse.

To tap into the enormous profit potential of CompuBourse, call Heritage toll-free:

1-800-US COINS (872-6467).

We'll send you everything you need to start saving time and money.

Call now . . . the world's largest bourse is only a phone call away.

COMPU**BOURSE**™

The Heritage Building • 311 Market Street • Dallas, Texas 75202-9990
WATS: 1-800-US COINS (872-6467) • In Texas: 214-742-2200

Note CompuBourse is a FREE on line service from Heritage. However, calls originating outside the (214) area code are subject to standard long distance phone company charges.

Auctions Tantalize Dealer and Collector Interest

The bugle is sounding and reinforcements are on the way. The certified market is definitely on the upswing as bid levels are literally jumping across the charts. No, not every issue is higher, but it sure seems like the number of buyers has increased quite substantially and so have their want lists. Furthermore, when this occurs, sellers then raise their prices just to test and see how far the buyers will stretch to consummate a deal. As long as spreads don't widen too quickly, we may see a big improvement in the overall market.

This past week found two auctions which may tell more about this strengthening market. The first auction was the continuation of the Norweb Sale by Bowers and Merena. This sale brought nearly \$5 million as compared to pre-sale estimates of only \$3 million. Almost everything in this sale received heavy floor bidding, from type coins to U.S. gold to colonials. The fact that these were "fresh" coins helped, but it was also important that they were accurately (some say conservatively) graded. Considering the fact that these coins were not certified by any of the grading services points out how important a knowledge of grading is. Moreover, the number of active collectors in the rare coin market becomes more apparent in this type of sale.

The second auction took place at the Arizona State Invitational Coin Convention. This sale was presented by Pacific Coast Auction Galleries and contained only certified coins. The most active areas seemed to be U.S. gold, especially the St. Gaudens series, and commemoratives. The auction

house was satisfied with attendance, while the mail bids were also active. The following is a partial list of highlights from this sale. For a complete list of prices realized please contact Pacific Coast Auction Galleries, in Santa Barbara, California.

Denomination	Grading Service Grade	Price Realized
1853 Large Cent	PCGS MS-65Rd	\$ 2,530
1871 Two Cent	PCGS PR-65Rd	\$ 3,438
1857 Three Cent Silver	NGC PR-65	\$ 7,700
1897 Liberty Nickel	NGC PR-66	\$ 2,695
1877 Seated Quarter	NGC MS-66	\$ 6,930
1899 Barber Half	NGC PR-66	\$ 8,690
1936 Delaware Commem	PCGS MS-65	\$ 1,100
1936 Lynchburg Commem	PCGS MS-65	\$ 798
1935 Spanish Trail Commem	PCGS MS-67	\$ 8,580
1906 \$5 Gold	NGC MS-67	\$25,300
1920-S \$10 Gold	ANACS XF-40/40	\$ 7,700
1930-S \$10 Gold	PCGS MS-62	\$12,320
1924 \$20 Gold	NGC MS-65	\$ 3,630
1924 \$20 Gold	PCGS MS-65	\$ 2,475

This sale contained numerous PCGS MS-63 and 64 \$20 St. Gaudens specimens. The 63's brought from \$850 to \$880, while the 64's realized \$1,100 to \$1,250.

PCGS Professional Coin Grading Service: Established in 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 250 authorized PCGS dealers who will send in coins for grading. These dealers may make sight unseen buys for PCGS coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value. PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series. Current population reports are available.

ANACS American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (719) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". NCI coins do not see as active bidding as PCGS or NGC, therefore, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

Certified Coin Dealer newsletter

Dear Subscriber:

Now that the market has been firmly established for certified coins, it is time for you to reacquaint yourself with the market for rare coins. The *Certified Coin Dealer newsletter*, like the original Coin Dealer Newsletter (est. 1963) is a weekly publication. Prices are constantly updated for the most widely traded series or issues for ANACS, NCI, PCGS, and now NGC graded coins. ANACS and NCI coins will only be listed in the first issue of each month.

The CCDn (Bluesheet) bid levels represent dealer bid prices, although they may pay more depending on their need. The Bluesheet is important to you since bid levels differ considerably from one service to another. For example: An 1881-S Morgan Dollar in MS-65:

	ANACS	NCI	PCGS	NGC
Bid	\$310	\$135	\$300	\$415

This was taken from the February 12, 1988 issue.

PCGS, NCI, & NGC bids are actually sight unseen bids, while ANACS may or may not be. Like the Greysheet, the Bluesheet bids represent the highest consistent buyers, although, unlike the Greysheet, volatility is a characteristic of the certified market as bids can increase or decrease dramatically in a short period of time. This volatility is one of the reasons you need the Bluesheet now!

“RECENTLY,
A SMALL GROUP OF DEALERS
BOYCOTTED US BECAUSE WE
GRADE COINS SO STRICTLY.
TO THEM, I SAY:
‘THANKS.’”

—John Albanese, President

This incident only proves what we've been saying all along: Numismatic Guaranty Corporation uses the strictest standards in grading coins—even under pressure. Those boycotting dealers don't realize that we're actually helping them—and the entire industry—by grading so strictly.

We're stabilizing the industry.

Numismatic Guaranty Corporation's strict grading standards have brought stability and credibility to the coin industry. Every coin we grade is evaluated by a team of 3 to 5 graders, then sonically sealed in a specially developed holder. But with Numismatic Guaranty Corporation, your investment value remains *in the coin itself*, not in its plastic holder.

We've made your investment secure.

Because we are the most trusted name in coin grading, NGC-graded coins are often bought sight unseen. Market makers and coin services know that NGC-graded coins are not subject to fluctuating grading standards.

We're not influenced by the coin market—just by your coins.

Numismatic Guaranty Corporation principles are forbidden from buying, selling and trading coins. Unlike the boycotting dealers, we have absolutely *no* commercial interests to promote, so we offer you complete impartiality when grading your coins.

For stability and reliability, look for NGC certified coins at dealers displaying the Numismatic Guaranty Corporation of America sign.

For the Numismatic Guaranty Corporation dealer nearest you, contact:
Numismatic Guaranty Corporation, P.O. Box 1776, Parsippany,
New Jersey 07054, tel. (201) 984-6222.

Gem Franklins in Strong Demand

When one considers the fact that complete BU Franklin half dollar sets will change hands on a wholesale basis in the \$525 - \$600 range, it is almost whimsical to hear that a PCGS Franklin can be worth \$600 by itself - and that's only an MS-65. Just think if it were a wonder coin. Taking it one step further, the specific coin I am referring to in this example is the 1961 Franklin. There are sight unseen bidders for this issue at \$600 - per coin (in a PCGS holder). It is truly amazing how such a modern issue can be so valuable. Nonetheless, it does not surprise those who have dealt in Franklins for a very long time. The typical coins are bagmarked and/or weakly struck. Coming upon true gem coins is a real rarity. Since we don't list Franklins in the CCDn in mint state, we felt it appropriate to list current bids for MS-65 and 66 specimens. Judging by the differences in bid prices from one issue to another, average quality better dates are not necessarily the most difficult issues to locate in MS-65 and better.

DATE	MS-65	MS-66	DATE	MS-65	MS-66
1948	\$250	\$350	1950-D	\$500	*
1948-D	250	360	1951	125	340

1958	64	150	* no current bid.		

This week's charts may be the most positive in recent memory. There are literally hundreds of plus signs across the charts with the most active bids coming from dollars, commems, gold, walkers, proof singles, and, hold on to your seat - Type! Certified type coins seem to be rebounding quite nicely. The recent auctions may have created new interest in common type, inasmuch as, rarer type is not readily available. Collectors and investors may have decided that common type may not be all that bad, especially at current levels.

PCGS Professional Coin Grading Service: Established in 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 250 authorized PCGS dealers who will send in coins for grading. These dealers may make sight unseen buys for PCGS coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value. PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series. Current population reports are available.

ANACS American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (719) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". NCI coins do not see as active bidding as PCGS or NGC therefore, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active trading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

ORDERING INSTRUCTIONS

- American Express, VISA, MasterCard, and Discover Card accepted. Please include your signature and send all information on raised portion of card with order.
- Please list your second choice, as many items are one of a kind in our stock. If ordering by type, list "same type" as your second choice. Your first choice is always sent unless already sold.
- Free 90-day lay-away offered. Please send 25% with order and 25% per month. \$200 minimum order please. Unpaid lay-aways over 90 days are returned to stock.
- No interest, six-month lay-away available. Call us for details.
- Call on our toll-free WATS line 800-872-6467 on any order over \$100.00.
- All coins are graded at a minimum by Heritage's interpretation of N.C.T. grading standards, unless already certified by another third party grading service.
- All coins are guaranteed to be genuine.
- Full 10-day return privilege for any reason.
- Texas residents add applicable sales tax to all orders.
- All orders shipped registered mail the same day if possible.
- Coin may be examined in person in our offices in Dallas, Texas. Since all coins are kept in bank vaults, they are available to be viewed only during banking hours. Please call at least 30 minutes prior to arrival, so that the coins may be removed from the bank vaults.
- Three-day approval service available to established customers with qualified references.

Note: All prices are based on the price as of the date of the order. Prices are established as of the date of the order.

James Halperin and Steve Ivy, Numismatists

Dealers Encounter Vigorous Certified Market at Central States Convention

The Central States Convention, in Indianapolis, proved to be very enlightening for most dealers. The show was very well-attended and prices were quite firm. Common dollars, walkers, and gold in MS-63 and 64, which had been rather plentiful of late, are now on many want lists at higher levels. Whereas, small lots of these issues could be found at discounted levels a few weeks ago, now, dealers are having to pay over bid levels to satisfy their needs. In some cases, dealers have only raised their sight unseen bids a little (some have remained the same), but sellers are not willing to let go of this material unless they get what they want. For example, MS-64 bid for common date dollars (PCGS) is \$105. Yet, there are numerous buyers at this level. In order to fill orders, a dealer will have to pay between \$110 - \$115. It's beginning to look like some of the more common issues, which had been a strain on the marketplace, are slowly being sold into strong hands, thus, removing them from the wholesale market.

Central States was not explosive. It just seemed consistent throughout the length of the show. Most dealers feel this is a very positive sign from which to build. As long as business continues steady over the next few weeks, the consensus is that by Long

Beach the market should gain a lot of momentum and quite possibly we will be able to classify this cycle as the early stages of a long running bull.

The commemorative series remains constant to higher in all grades. Many dealers are willing to pay the same bid prices for specific issues, whether the coins are in PCGS or NGC holders on a sight unseen basis. Furthermore, the rarer issues in the higher grades (MS-66 and 67) seem to have no lid on bid levels. Dealers continue to outbid each other by substantial margins in an attempt to garner whatever rarities come on the market. Even if none of the specific issues have been graded to this point, the high bidders want their bids known just in case any of these rarities are processed through the grading services. Even though some of the bids appear to be illogically high, it must be remembered that the sellers of such rarities will usually demand even more than these bids.

The type market continues to edge forward. Many more dealers were looking for type material at Central States. This week's chart shows numerous plus signs. The majority of issues in MS and Proof-64 and higher are in demand at current levels.

PCGS Professional Coin Grading Service: Established in 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 250 authorized PCGS dealers who will send in coins for grading. These dealers may make sight unseen buys for PCGS coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value. PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series. Current population reports are available.

ANACS American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (719) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". NCI coins do not see as active bidding as PCGS or NGC therefore, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

PCGS vs. NGC -
Which is Better and
Why...

The Sign of the Times:

Coin prices continue to mount as the stock
market continues to falter

The time to act is now. There is probably no more appropriate time to apply this old cliché to rare coin buying than today. Coins are poised for tremendous gains in the next six to twelve months as the stock market continues its downward spiral. Each day investors are turning away from stocks and looking at other investment alternatives, especially tangibles. The following graph shows how coins fared against gold and silver bullion during the last ten years.

Tangible Investments
of America is

Positive Attitudes Bring About Stronger Market

Over the last several weeks it has become readily apparent that the certified coin market has taken a turn for the better. Many dealers were skeptical at first, but now however, the positive attitudes definitely outweigh the negative ones. There are many more buyers on a regular basis than there are sellers, which means more material must be selling into the hands of collectors and investors who plan on holding this material for the long haul. Most dealers recommend that coins be held for a minimum of three to five years (some even longer) to maximize their return.

Whereas, in the previous weak market, sellers could always be found who were willing to discount portions of their inventories which they felt were overstocked. The main problem here was that other dealers had almost identical inventories, thus, prices propagated themselves until they reached such levels that dealers were no longer willing to sell at, instead, they became buyers. In support of this strategy is the fact that the clients have also stepped in to take advantage of some of the lowest prices in years.

One of the last areas of the market to solidify recently, has been the type market. Recent auctions have shown that properly graded coins will command their respective bid levels and this fact

has opened a lot of eyes. Not only do many dealers and their clients feel that many type coins are at attractive levels, they feel that they are getting a much better coin for their money. This is in reference to the coin market of the early 1980's when inflation and other economic worries caused almost irreparable damage to the coin business as prices sky-rocketed for any coin which had the slightest appeal, regardless of its actual grade.

Since that period, grading has tightened considerably and the advent of professional grading services has helped immensely. Granted, grading will probably always be an art, not a science; not everyone will always agree on a specific grade for a particular coin, but at least now the dealer can offer his clients what he feels are the best coins for the money and the client can be reasonably assured that many dealers across the country will agree on the grade as long as the coins are certified by one of the leading grading services. Inasmuch as, dealers operate on different levels of wholesale or retail, they may not all be willing to pay the same price, but they will be closer to agreement on the grade of the coin. This is a definite improvement in this subjective world of rare coins where everyone sees things just a little differently.

PCGS

Professional Coin Grading Service: Established in 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 250 authorized PCGS dealers who will send in coins for grading. These dealers may make sight unseen buys for PCGS coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value. PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series. Current population reports are available.

ANACS

American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (719) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC

Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". NCI coins do not see as active bidding as PCGS or NGC therefore, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

"NEITHER BULL NOR BEAR CAN ALTER THE GRADES WE GIVE TO COINS."

—John Albanese, President

Our strict grading standards will give you a stable grade for your coins, regardless of bull or bear markets. So a coin we grade today will still make exactly the same grade in 1998—giving you investment stability and security.

**We're not influenced by the coin market—
just by your coins.**

Numismatic Guaranty Corporation principles are forbidden from buying, selling and trading coins, so we have no commercial interests to promote. We are the largest grading service that offers you complete impartiality.

**We've set the
industry
standard.**

NGC's strict grading standards have brought stability and credibility to the coin industry. Every coin we receive is evaluated by a team of 3 to 5 graders, then sonically sealed in a specially developed holder. But your investment value remains *in the coin itself*, not in its plastic holder.

We've made your investment more secure.

Because we are the most trusted name in coin grading, NGC-graded coins are often bought sight unseen. Market makers and coin services know that NGC-graded coins are not subject to fluctuating grading standards.

For stability and reliability, look for NGC certified coins at dealers displaying the Numismatic Guaranty Corporation of America sign.

**NUMISMATIC
GUARANTY
CORPORATION
OF AMERICA**

Plus Signs Scattered Extensively In Almost Every Series

Is the certified coin market as hot as all the plus signs would lead one to believe? Indeed, it is! If one looks beyond the 66 and 67 columns of plus signs (we all know there aren't many coins available in these grades), one will find a myriad of plus signs for issues which have many coins graded. The reason there are so many plus signs is that buyers are trying to pry loose those issues which have been graded, but, as of yet, remain unavailable. In many cases, the present owners will not sell until bid levels move substantially higher. Furthermore, many dealers realize that the higher the bid levels move, the stronger the possibility is that the present owners will hold out even longer. Sometimes greed takes the place of common sense. However, one never knows until it is too late whether they were greedy and held on too long, or, sold too early and missed the top of the market. An old business adage goes something like this: "One cannot lose money by taking profits too early." To which I might add: "But one can drive oneself to the funny-farm by continually second-guessing oneself."

Another indication of the strength of the certified market is the overall increase in the number of active bidders. When the market was lethargic a couple of months back, sellers had a very difficult time in locating the high buyers. From week-to-week the high buyers would lower their bids to just under the next bidder in line, which resulted

in bid levels continually falling. Very few dealers actually wanted to be the high bidder. Everyone wanted bids to stay up, but no one wanted to be the leader in a down market. Now, however, attitudes and business have swung around so that dealers are competing to be the high buyer. They want coins. They need coins for customers. They are not concerned about being too heavy in inventory because they are not keeping their new purchases in inventory. Many dealers tell us that they are selling (to their clients) coins just as fast as they are buying, if not faster.

Gold, dollars, commems, type, you name it, it's moving. If it isn't hot yet, it's beginning to warm up. There are occasional plus signs in the Buffalo and Mercury series, but, as of yet, most of the higher bidding is for MS-65 and better material. In the past, the higher grade material tends to move faster and higher proportionately than lower grade material. That is, until the buyers (dealers, collectors, and investors) realize they can't get enough to satisfy their needs, then they have to back down a grade or two, and eventually, the whole market catches fire. There are still many dealers out there who are selling into this market, but, the last couple of months have seen the number of buyers increase tremendously.

PCGS Professional Coin Grading Service: Established in 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 250 authorized PCGS dealers who will send in coins for grading. These dealers may make sight unseen buys for PCGS coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value. PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series. Current population reports are available.

ANACS American Numismatic Association Certification Service: A non-profit organization established by the ANA in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (719) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N C I Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded you may request a specific grade and if NCI can certify at that grade or higher a certificate will be issued. If not there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". NCI coins do not see as active bidding as PCGS or NGC, therefore, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin
market for certified coins only. Only the most active areas for
the most active grading services are represented. CCDn uses
every means available to insure accuracy and completeness of
the bid prices shown. Since prices represent the highest known
bids at press time and they are based strictly on dealer needs,
prices will fluctuate according to these needs.
Individual buy and sell prices will vary from dealer to dealer.
What price levels an individual dealer buys or sells at is strictly
up to the dealer. CCDn represents only that the bid prices listed
were the highest known to us at press time

THERE IS STILL TIME TO CONSIGN CERTIFIED (PCGS, NGC, ANACS, ETC.) COINS TO THE "ALL CERTIFIED" SESSION AT THE OFFICIAL LONG BEACH AUCTION (COINS MUST BE IN OUR HANDS BY MAY 5TH)

ADVANTAGES

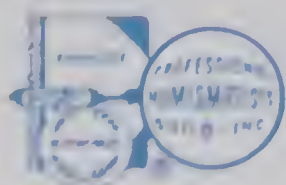

1. Sale will be held Wednesday night, June 1st at 7:30. This is set-up night, and all dealers will have to close at 7:00. Dealers will be eager to buy certified coins, which they can pick up the next day and sell at the show.
2. The sale will be published in full in Coin World, encouraging bids from across the country.
3. All certified lots will be listed in a separate catalog that will be mailed to thousands of active past bidders. (This is in addition to our catalog of U.S., World and Ancient Coins for sessions on Thursday and Friday evenings.)
4. Sales commission rate of ZERO.
5. Your coin will be tied up for only 27 days.
6. All lots will be shown Monday and Tuesday preceding the sale at the Ramada Inn in Beverly Hills, and Wednesday morning starting at 9:00 AM at the Long Beach Convention Center.

**WE CAN ONLY ACCEPT 800 LOTS.
DON'T DELAY...CALL RON OR DENNIS GILLIO NOW!**

Certified Market Moves Forward By Leaps And Bounds

Every week it seems like the number of plus signs increases for any given series. Not only does it appear that supplies are drying up, but the dealers with inventory are raising their sell prices to levels well above the high bid prices. Furthermore, this strategy is apparently working as buyers are willing to pay the asking price in order to satisfy the demands of the customer.

Nowhere is this more apparent than in the commemorative series. Prior to the fortification of this current market, previous weeks found plus signs appearing mostly in the MS-66 and 67 columns, which usually resulted in no sale due to a lack of available supplies. The MS-65 issues, although the series was fairly steady, could be found in many dealer inventories at most any coin show. Not all issues were available, yet, sales depended on whether the seller could locate the high buyers or not. Now, however, it seems like almost everyone (slightly exaggerated) has become a strong buyer. Some dealers are finding that they may be a seller of a specific issue one week, only to be a buyer of the same issue the following week, at a higher level.

Buying activity has really picked up in the U.S. Gold chart. Market-makers are becoming very serious about trying to acquire various issues, not just raising bid levels. The majority of bid increases this

week are for MS-61 through MS-65 grades (NGC and PCGS) which verifies the fact that dealers actually need these coins, since the MS-61 to 64 grades are the areas which are primarily graded by the certification services. An example of this keen competition follows. One dealer was in need of 15 PCGS-63 \$20 Liberties. He had a very short time to fill the order or he would lose the sale. Last week's bid was \$950. He offered \$100 over bid with the stipulation that time was of utmost importance. He filled his order within twenty minutes and withdrew his high bid. However, a short time later another dealer began bidding \$1,025 for the very same issue. This is just one example of how dealers are prepared to pay well over current levels so they can fill the orders of their clients. Dealers are striking while "the iron is hot."

Again this week the type market looks much stronger. Several marketmakers have increased their buy prices, and not just for the rare material. Plus signs are scattered from MS-61 to MS-67, however, proof coins must be at least 63's before we find the same bidding frenzy. The attention which has been given to various auctions over the last several months is primarily responsible for bringing the type market out of the doldrums.

PCGS

Professional Coin Grading Service: Established in 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 250 authorized PCGS dealers who will send in coins for grading. These dealers may make sight unseen buys for PCGS coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value. PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series. Current population reports are available.

NGC

Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

ANACS

American Numismatic Association Certification Service: Established by the ANA (a non-profit organization) in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (719) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". NCI coins do not see as active bidding as PCGS or NGC therefore, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin
 market for certified coins only. Only the most active areas for
 the most active grading services are represented. CCDn uses
 every means available to insure accuracy and completeness of
 the bid prices shown. Since prices represent the highest known
 bids at press time and they are based strictly on dealer needs,
 prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer.
 What price levels an individual dealer buys or sells at is strictly
 up to the dealer. CCDn represents only that the bid prices listed
 were the highest known to us at press time.

MINT STATE TYPE COINS

Prices are for the most common dates.

If the coin you have will stand on its own merits without the grading certificate and the CCDn bid is lower than the CDN then refer to the CDN

Multiple Subscription Discounts

Certified Coin Dealer newsletter

Dealers.....

Well, you asked for it, so we've done it for you. Many of you have told us that you need more than one issue of the Certified Coin Dealer newsletter so your co-workers don't fight over it. Now you can get *multiple subscriptions* for less. In fact, the rates get so low, that if you pay your employees more than \$5 per hour, it becomes impractical to make copies (it's unlawful also).

With our new multiple subscription rates you can order plenty of original issues for your office or store, and travels to auctions and shows. Your customers will feel more secure dealing with you knowing that you do not use unauthorized copies. You are a professional...use originals.

Our subscription base is our main source of income. With this in mind, we present the following schedule of multiple subscription rates. In order to get this special rate the CCDn's must be mailed to the same address.

1 subscription\$ 99
2 subscriptions.....\$164
3 subscriptions.....\$238
4 subscriptions.....\$305
5 subscriptions.....\$366

6 subscriptions.....\$415
7 subscriptions.....\$460
8 subscriptions.....\$500
9 subscriptions.....\$540
10 subscriptions.....\$575

"NEITHER BULL NOR BEAR CAN ALTER THE GRADES WE GIVE TO COINS."

—John Albanese, President

Our strict grading standards will give you a stable grade for your coins, regardless of bull or bear markets. So a coin we grade today will still make exactly the same grade in 1998—giving you investment stability and security.

**We're not influenced by the coin market—
just by your coins.**

Numismatic Guaranty Corporation principles are forbidden from buying, selling and trading coins, so we have no commercial interests to promote. We are the largest grading service that offers you complete impartiality.

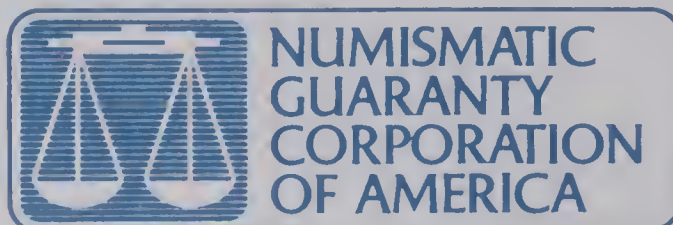

**We've set the
industry
standard.**

NGC's strict grading standards have brought stability and credibility to the coin industry. Every coin we receive is evaluated by a team of 3 to 5 graders, then sonically sealed in a specially developed holder. But your investment value remains *in the coin itself*, not in its plastic holder.

We've made your investment more secure.

Because we are the most trusted name in coin grading, NGC-graded coins are often bought sight unseen. Market makers and coin services know that NGC-graded coins are not subject to fluctuating grading standards.

For stability and reliability, look for NGC certified coins at dealers displaying the Numismatic Guaranty Corporation of America sign.

For the NGC dealer nearest you, contact: Numismatic Guaranty Corporation,
P.O. Box 1776, Parsippany, New Jersey 07054, tel. (201) 984-6222.

Type Market Joins Other Active Areas on Dealer Want Lists

One glance through the following pages should leave one with the idea that this current surge of activity is no fluke. There are plus signs galore in most every chart. We are not talking just Dollars, Commems, and Gold – look at the Mercuries, the Walkers, Proof Singles, even the Buffalo series! Oh, did I forget to mention Type; the Type Chart has more plus signs than at any time since the *Bluesheet* began. There are more active buyers for certified coins than at any time in the past two years. What's more, there are many buyers at current levels (or higher on a sight seen basis), not just a single buyer in each series.

Several weeks ago dollars began to heat up. First, in MS-66 and 67, then, as dealers obviously could not find this quality, they began bidding for MS-65's (better dates). They soon found that they could not buy much material here unless they paid well over bid levels. Inasmuch as they could not fill their orders, they bid frantically higher. This caused a chain reaction throughout the dollar series (MS-65 and better) as even the common dates solidified and then moved higher. Many dealers have remained skeptical even as commems gained momentum along with gold.

Much of this skepticism appears to be passing as the type market pushes forward. Type coins are probably near their best value since

before 1980, when one compares bid levels with the quality of coin one receives today. There are hundreds more numismatists today who grade within a point of each other than there ever were in the past. We can probably thank the grading services for this phenomenon, even the ones who grade too liberally. They have made the dealers and their clients (and possibly government regulators) quickly adapt to the standards of the widely used services.

Accepting grading standards which hopefully will be used from this time forward was accomplished much quicker than one might think. When one considers that for about 100 years prior to the 1970's, coins were basically described by purists as new or used (with five popular categories of used – XF, VF, F, VG, and G), and into the early '80's when educators were searching for more defined descriptions of "new", today's accepted standards have developed in the last five years. Future markets, both good and bad, have been taken into consideration, along with protection for the customer. As these standards continue to be followed, policing of our industry may be handled from within, which will better serve our reputation – as an industry – in the long run.

PCGS Professional Coin Grading Service: Established in 1986, by seven professional coin dealers to grade and authenticate U.S. coins only. Located in Newport Beach, CA. You must submit coins to authorized PCGS dealers, who will have to send them to be graded. Phone: (714) 250-1211. PCGS has more than 15 graders on their staff and at least four must view a coin to determine a final grade. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in a hard plastic container and returned to the customer.

There are at least 250 authorized PCGS dealers who will send in coins for grading. These dealers may make sight unseen buys for PCGS coins. PCGS coins do not have the date they were graded on them, so there can be no distinction or variation of grading from year to year. They put a single grade on every coin which makes it easier to place an appropriate value. PCGS identifies color on copper (red, brown), full bands on Mercury dimes, full head on Standing Liberty quarters, and prooflike on dollars. PCGS has established grading sets for most major series. Current population reports are available.

ANACS American Numismatic Association Certification Service: Established by the ANA (a non-profit organization) in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (719) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation" and "strike". NCI coins do not see as active bidding as PCGS or NGC therefore, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit, on a sight basis.

MINT STATE TYPE COINS

Prices are for the most common dates.
If the coin you have will stand on its own merits without the grading certificate and the CCDn bid is lower than the CDN then refer to the CDN.

Picture your coins selling for top prices at the 1988 ANA Sale.

Your coins sell for more in our full-color catalog.

This is your opportunity to sell your coins at the biggest auction of the year—the 1988 Heritage ANA Sale. Your coins will get more exposure to the *right buyers*, more competition from determined bidders, and higher prices from selling in the most popular full-color catalog of 1988.

**Over 5,000
buyers will be
tempted by your
coins!**

Time and time again, Heritage has proven that full-color catalogs get better results. When buyers can study the condition of your coins, as well as details like color, luster and eye-appeal, they have confidence in what they're buying. Add to that the expert descriptions of your coins, with accurate, in-depth information, and your coins will sell for the highest prices possible.

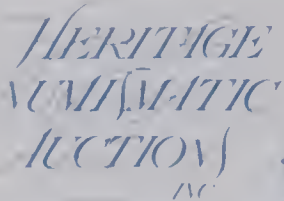

The ANA Convention attracts more buyers for your coins.

When Heritage holds an auction in conjunction with the annual ANA Convention, thousands of serious buyers attend. Last year, over 10,000 of the most active dealers, collectors and investors attended the show. And this year, we're expecting over 12,000.

Your coins will grab the spotlight in an atmosphere charged with excitement. Competition for your coins can be intense. And all that excitement can drive up prices for your coins.

International marketing increases competition even more.

When you sell with Heritage, your coins become part of an *international* marketing campaign targeted to the most active buyers in numismatics. The sale will be promoted through direct mail, telemarketing, full-page ads in national trade publications, and, of course, in all the show promotions produced by the ANA.

Chosen as auctioneer by the U.S. Government, F.D.I.C., June 1987 and June, 1988
The most official ANA auctions since 1980

Selected as the Official Auctioneer for the 1980, 1982, 1985 and 1988 A N A Sales and the 1983, 1984, 1985, 1986, 1987 and 1988 Mid-Winter A N A Sales.

$\frac{1}{2} \left(\frac{1}{2} \right) = \frac{1}{4}$

**Top prices are
proven at the
ANA Sale.**

At the last ANA Auction in Cincinnati (conducted by Heritage in 1980), our consignors *realized* over \$7.7 million, an unsurpassed ANA record!

At the 1985 ANA Sale, we received over 11,000 mail bids valued at well over \$9.5 million! And at this year's ANA auction in Cincinnati, we intend to continue that tradition.

**Get an instant
CASH advance
on your
consignment.**

If you consign now, we can give you an instant cash advance (at a nominal interest charge) of up to 50% of your consignment's wholesale value. And if your consignment is valued at \$30,000 or more, we will personally fly to your city to pick it up.

In addition, you can take advantage of our PCGS Auction Express Service, giving your coins the selling advantage of third-party certification. Call us for details.

**Consign NOW and picture your coins
selling for top prices.**

The ANA limits the number of lots we can offer in this sale, so our full-color catalog will fill up fast. Reserve your place today by calling Bob Vitt, Bob Merrill, or Leo Frese toll-free, or send in the coupon NOW!

1-800-US COINS (872-6467)

Sale Dates: July 20-24

YES! I want my coins pictured in the Heritage ANA Sale catalog.

I'm enclosing this card with my coins and sending them registered mail for possible consignment to your July ANA Sale. I understand the minimum consignment acceptable for the auction must be valued at \$1,500.

I have coins I want to sell. Please send me your booklet entitled *How to Sell Rare Coins At Auction*.

I would like a one-year subscription to all your auction catalogs. Enclosed is \$50 for the year.
I would like a copy of your July ANA Sale full-color auction catalog. Enclosed is \$20.

Market For Gem Material Reveals "Tip of the Iceberg" For Future

The way gem quality coins are currently selling (in this case selling also refers to higher bids which go unfilled since demand is readily visible and the coins would sell at these higher bids if they were available), the future may well be at hand. There is so much demand for better date coins, in MS-65 or higher quality, that bid levels are beginning to resemble bids for pieces of art—there are lots of zeros. There have been no reported million dollar coins, as of yet, however, through private treaty and auctions many coins have brought well above six figures. Dealers are beginning to feel a sense of unbridled spirit as their customer base expands, the customer becomes more attuned to the idiosyncrasies of the coin market, and their renewed fears of inflation drive them to place their savings into better and rare date coins.

Over the last 3-4 months alone the investor-client has seen how the values of properly graded and certified coins have increased substantially. Granted, not all of the issues listed in the CCDn are available, but many were. In fact, not all issues have increased in value. It takes time, effort, and analysis to determine which issues can go higher and which ones may be overpriced in today's market. Not everyone can make money in coins. Not everyone makes money in stocks, bonds, even private enterprise. Like every other business there are calculated risks which must be considered, yet, if one is diligent, the rare coin market can be very rewarding.

MS-65 and better dollars continue to climb to record heights. Minimum

bid on common dates is up to \$315 for PCGS Morgans and \$495 for NGC's. Minimum bid for common MS-65 Peace dollars is \$495 (PCGS) to \$500 (NGC). And the rare date material from either service continues to flourish as numerous marketmakers search out any or all of what may be available. The few minus signs present represent issues where dealers were active, yet, recently withdrew their high bids, thus resulting in lower sight unseen bids.

The commemorative market continues to follow the lofty example set by the dollar market, yet, is not necessarily lead by the dollar market. The commemorative series has several marketmakers who are trying to snag as much material for their customers as is possible before prices go even further. Most dealers feel that this high grade material is so limited in number that prices have a long way to go still. These very same dealers feel that over the next few years, the population reports will prove that this strategy has been very beneficial to those who could locate these high grade specimens.

The U.S. gold market is in a steadily inclining posture. Almost anything in a slab holder (PCGS or NGC) which is in mint state condition is on want lists and will bring current levels. There are several buyers who are in the market for a few million dollars in BU gold who are going to put it away for many years.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports.

PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: Established by the ANA (a non-profit organization) in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (719) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". NCI coins do not see as active bidding as PCGS or NGC therefore, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Active Bidding Continues Across Broad Front

One look at this week's bid changes reveals to even the casual observer how strong the certified market is. Every series (both PCGS and NGC) boasts a multitude of plus signs depending on the needs of the various marketmakers. It appears that with each passing week a dealer's needs expands to include another series or two. When the coin market was slow most dealers tend to concentrate in their specialties. When the market is booming, as it is now, almost every dealer becomes multi-talented and specializes in every series. Being the high buyer automatically makes one an expert in that particular issue or series.

The type market continues to show much improvement, especially for 63 and better material (mint state and proof). The last few weeks saw silver issues on most want lists, but now, even the copper and nickel coins are gaining momentum. Each week seems to perpetuate a more potent wholesale market. In reality, the wholesale market is vastly improved due to the increased numbers of investors and their willingness to increase their long term holdings of rare coins.

The commemorative series is very strong across the charts. The majority of silver issues are higher in MS-65 and better, with a good number of 63 and 64 specimens on the rise also. Many of the increases for MS-65 and better issues are quite substantial—along the line of 10%

- 25%. In most cases, the higher bids are not meeting with much success. Even when the coins are available potential sellers want well over current bid levels. The potential sellers use the bid prices only as a base level in determining their final asking price.

One of the most actively bid series is gold commems. Almost every PCGS issue is higher this week in MS-61 through MS-67. And many of the NGC issues are on the upswing in MS-65 and better. In many cases bids are rising very rapidly from one week to the next. Increases are quite substantial. This is occurring due to the large number of competitive bidders for these coins (this is why other series are also moving so quickly). For example, bid last week was \$4,100 for a PCGS 1916 McKinley in MS-65. This week it's \$4,350. As potential buyers try to outbid each other by bumping one another's bids, one can see how fast a specific issue can move. In this case they may increase bids in \$25 intervals. In even more expensive coins they may raise each other by \$100's or even \$1,000's.

Not to be outdone the dollar market asserts itself and advances even higher. If one marketmaker slows down another one takes the lead. And anyone lucky enough to own high grade dollars, MS-66 and better, can just about name their own price. This is especially so for MS-67 Peace dollars.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

ANACS American Numismatic Association Certification Service: Established by the ANA (a non-profit organization) in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (719) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". NCI coins do not see as active bidding as PCGS or NGC, therefore, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time

"NEITHER BULL NOR BEAR CAN ALTER THE GRADES WE GIVE TO COINS."

—John Albanese, President

Our strict grading standards will give you a stable grade for your coins, regardless of bull or bear markets. So a coin we grade today will still make exactly the same grade in 1998—giving you investment stability and security.

**We're not influenced by the coin market—
just by your coins.**

Numismatic Guaranty Corporation principles are forbidden from buying, selling and trading coins, so we have no commercial interests to promote. We are the largest grading service that offers you complete impartiality.

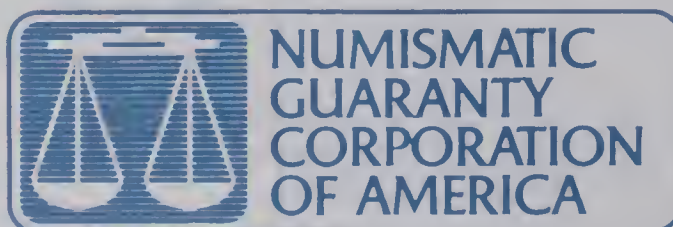

**We've set the
industry
standard.**

NGC's strict grading standards have brought stability and credibility to the coin industry. Every coin we receive is evaluated by a team of 3 to 5 graders, then sonically sealed in a specially developed holder. But your investment value remains *in the coin itself*, not in its plastic holder.

We've made your investment more secure.

Because we are the most trusted name in coin grading, NGC-graded coins are often bought sight unseen. Market makers and coin services know that NGC-graded coins are not subject to fluctuating grading standards.

For stability and reliability, look for NGC certified coins at dealers displaying the Numismatic Guaranty Corporation of America sign.

For the NGC dealer nearest you, contact: Numismatic Guaranty Corporation,
P.O. Box 1776, Parsippany, New Jersey 07054, tel. (201) 984-6222.

Dealers Ready for Substantial Summer Market

Contrary to past seasonal markets, dealers are beginning to imagine a summer without a vacation. The rare coin market has been moving in an upward direction for over two months now and there appears to be only an occasional slowdown in higher bids (mostly MS-64 and better material) as marketmakers pause to catch their breath and reassess their inventories. Even now, dealers and their clients seem to be broadening their scope as they venture into areas where coins may be slightly more available (than the high grade issues they now bid on yet cannot locate), while still being underpriced. This week's Long Beach Show will be a barometer of the intensity with which this current market may continue.

This past weekend at the GNA Sale in Atlanta, the Mid-American Auction realized over \$1.6 million dollars. The following highlights represent a small portion of the certified coins which sold to an enthusiastic group of bidders.

Denomination	Service-Grade	Price Realized
1865 Three-Cent Nickel	PCGS-PR65	\$ 2,970
1886 Three-Cent Nickel	PCGS-PR66	\$ 2,310
1851-O Three-Cent Silver	NGC-MS65	\$ 2,915
1873 Three-Cent Silver	PCGS-PR66	\$ 5,280
1923-S Buffalo	PCGS-MS64	\$ 1,320
1911 Barber Dime	PCGS-PR66	\$ 3,300
1875-S Twenty-Cent	PCGS-MS65	\$ 5,775
Columbia S.C. Commem	PCGS-MS65	\$ 506

Denomination	Service-Grade	Price Realized
Connecticut Commem	PCGS-MS65	\$ 1,375
Huguenot Commem	PCGS-MS67	\$ 13,475
Roanoke Commem	NGC-MS64	\$ 495
San Diego (1935-S) Commem	NGC-MS65	\$ 468
York Commem	PCGS-MS66	\$ 1,023
1874 \$1 Gold	PCGS-MS65	\$ 4,675
1929 \$2½ Gold	PCGS-MS64	\$ 3,190
1909-D \$5 Gold	PCGS-MS63	\$ 2,915
1801 \$10 Gold	PCGS-MS60	\$ 10,450
1911-D \$20 Gold	PCGS-MS64	\$ 1,595

This sale contained many non-certified coins of importance. For a complete list of prices realized please contact Mid-American Rare Coin Auctions, Inc. in Lexington, Kentucky.

Every series continues to show how strong the overall market really is. The plus signs seem to be filtering over to the next lower grade, hopefully where buyers can locate a particular issue which has been elusive in the higher grade. At the same time, the bid levels of the next lower grade have not been run to any extremes as compared to the higher grade.

All the plus signs for PCGS and NGC coins are having the anticipated effect on ANACS and NCI bid levels. A tremendous amount of plus signs appear for ANACS and NCI coins, especially for the following series: Dollars, Commem, and Gold.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: Established by the ANA (a non-profit organization) in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (719) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation" and "strike". NCI coins do not see as active bidding as PCGS or NGC, therefore, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

★ CURRENT INVENTORY HIGHLIGHTS ★

DOLLARS

1878 7TF (Rev 78) PCGS MS65 P/L
PCGS pop: 3.....\$4,250
1878-S NGC MS66 Spectacular rainbow
colors atop brilliant, reflective surfaces
NGC pop: 1.....\$3,300
1879-CC PCGS MS65 Light sunset toning
with bright, frosty luster. Real "fresh"
looking. PCGS pop: 4.....\$18,000
1879-O NGC MS65 Sharp strike,
exceptionally clean surfaces. Obverse has
light orange tint with blue around the
borders. Reverse is white with amazing
luster. NGC pop: 1.....\$6,350
1880-CC PCGS MS65 White and clean
PCGS pop: 65.....\$1,875
1881-CC PCGS MS65 White and clean
PCGS pop: 238.....\$1,285
1885-CC PCGS MS65 White and clean
PCGS pop: 171.....\$1,295
1887-S PCGS MS65 Obverse is lightly
toned. Reverse is mostly white.
PCGS pop: 7.....P.O.R.
1889-S PCGS MS65 White and flashy
PCGS pop: 16.....\$3,250
1890-O PCGS MS65 White, fully struck
and choice. PCGS pop: 8.....\$5,950
1892 PCGS MS65 Super high end! White,
fully struck and exceptionally clean.
PCGS pop: 6.....\$6,850

DOLLARS

1894-S PCGS MS65 Blazing luster with a
light golden tint. Super sharp strike.
PCGS pop: 6.....\$6,900
1899-S PCGS MS65 Brilliant and flashy.
PCGS pop: 12.....\$3,450
1900-O NGC MS65 White and super
clean. NGC pop: 7.....\$690

GOLD

1854 TY II \$1 NGC MS65 Super Rare!
NGC pop: 1.....\$34,500
1913 \$5 Indian PCGS MS65 Awesome
piece. PCGS pop: 2 (series-21) ..\$17,600
1908-D \$20 Saint NGC MS65 High
grade example of a tough date.
NGC pop: 1.....\$6,250

19th CENTURY TYPE

1874 Arrows Seated Quarter NGC PR65
Very desirable. NGC pop: 2...\$6,600
1872 Seated Dollar NGC MS65 Semi
prooflike with super clean surfaces. Very
light auburn tint. A rare opportunity.
NGC pop: 1.....\$18,800

20th CENTURY TYPE

1936 TYII Lincoln Cent PCGS PR65RD
Blazing luster with super bright red
surfaces. PCGS pop: 3.....P.O.R.
1937 Washington Quarter PCGS PR67
White and fully struck.
PCGS pop: 5.....\$2,800
1937 Walking Liberty Half NGC PR67
A real screamer. NGC pop. 1..P.O.R.
1941-S Walking Liberty Half NGC MS66
White and fully struck. A wonder-coin.
NGC pop: 1.....\$7,500
1944-S Walking Liberty Half NGC MS65
White with blazing luster and a needle sharp
strike. NGC pop: 4.....\$1,275

COMMEMS

Isabella NGC MS68 The absolute finest!
Sensational colors and mindblowing luster.
NGC pop: 1.....P.O.R.
Lafayette PCGS MS65 Light Blues, greens
and purples atop clean, lustrous surfaces.
One of the finest. PCGS pop: 18\$18,200
1935-PDS Arkansas set NGC MS66, 66,
66 The finest, most colorful Arkansas
set that I have ever seen.
NGC pop: 1, 4, 1.....\$12,750
Hawaiian NGC MS65 Gorgeous
yellowish-green and gold toning.
NGC pop: 1.....\$7,800
Pan Pac Half NGC MS66 Excellent strike
and attractive turquoise toning.
NGC pop: 2.....\$7,800

CALL: 1-800-826-0039

Have you wondered where the action is in today's rare coin market? Astute collector/investors know that the serious money is going for scarce, high grade coins with low population figures - And *Hertzberg Rare Coin Investments* is leading the way in this type of material.

We are consistently buying the scarcest Mint State and Proof 65, 66, 67, and 68 coins available to supply our ever increasing client base.

If you are not already receiving our monthly inventory listing of highly desirable U.S. coins, you are invited to call and request a free subscription.

Market For Lower Grade Certified Coins On The Rise

Over the past couple of weeks the number of buyers for lower grade (Proof and Mint State-64 and under) certified coins has increased substantially. This fact may not be readily apparent in the form of higher bids; yet, it can be seen in the number of ready buyers who are willing to pay bid levels with additional support by other dealers at "just under" current Bid.

This support for lower grade material is not prevalent throughout the charts; however, it does appear, more often than not, in areas where the top grades cannot be found and when the next lower grades are not in such significant supply as to overwhelm the marketplace. For example, MS-66 and 67 dollars appear to be quite rare (a vast understatement), yet, common date MS-65's are available in large supply, while better or rare dates are still in thin supply in MS-65 and even MS-64. A dealer can offer bid on MS-64 or MS-65 1885-O dollars and, eventually, he should fill his order. However, this is probably not the case for an issue like 1883-S, where very few coins have been graded over MS-64 and MS-63's aren't that plentiful either. If a dealer should offer bid for MS-63 or MS-64 specimens, he is not likely to fill his needs as fast as he could with common dates. The potential seller of the 1883-S dollar would use the buyer's bid as a base price and attempt to get

a specific percentage over that.

The Long Beach Coin Convention was significant in that the large number of dealers in attendance were in agreement that they were doing much more business of late; however, they were split over whether the higher bid levels are restricting the supply of nice coins becoming available or, the higher bids are actually the cause of nicer coins coming into the marketplace. The answer to this theory seems to be who you are and who you know. Obviously, someone has to obtain the nicer coins in order to sell into the marketplace. Although, it does seem like the dealers who carry the reputation for dealing in a specific series will have those particular coins brought to them.

A rather significant quantity of MS-67 Morgan dollars (PCGS - freshly graded) traded hands at Long Beach, but the dollar dealer who purchased them had to put them away because he encountered a half dozen other dealers who wanted to make him a sizable profit on the whole deal or even single coins. Nevertheless, the dollar dealer was taking them home to customers. The following dates (all graded MS67) were purchased for a total of \$135,500: 1881-S, 1882-S P/L, 1882-CC, 1883, 1883-CC, 1884, 1889, 1897-S, 1898-O DMP/L. These had been collected over a period of 15-20 years.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: Established by the ANA (a non-profit organization) in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (719) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", luster, "surface preservation" and "strike". NCI coins do not see as active bidding as PCGS or NGC therefore, they will only be listed once a month.

PUBLISHER Ron Downing
EDITOR Dennis R. Baker
CIRCULATION & ADVERTISING Betty Morris
GRAPHICS Shane Downing

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit on a sight basis.

Watch Your Coins Sell For Top Prices At The Heritage Long Beach Sale.

Featuring the confiscated holdings of the Federal Drug Enforcement Administration!

Sale Dates: September 29-October 1, 1988

Ask Bob Merrill about the selling climate in Long Beach, California, and you'll see a sparkle in his eyes.

"It's fantastic," says the Heritage Auction Director. "The bidding competition is always strong, auction attendance is excellent, and I've seen coins sell for record prices at the Long Beach Sale."

It pays to sell at a big event.

As Bob explains, competition is the key to realizing top prices. "Every year, the Long Beach Coin and Stamp Exposition attracts a great crowd. Thousands of serious collectors attend the show, and those are the people who pay top prices for your coins. It just makes sense to sell your coins when all the active buyers are present . . . you get more competition, and more competition means higher prices."

Our full-color catalogs get bidders excited about your coins.

Bob knows how important the auction catalog is to selling your coins. "When you consider that up to 60 percent of the bidders at any given auction will make their buying decision based on what they see and read in the auction catalog . . . without ever seeing the coins themselves . . . you can understand how important the catalog is."

"That's why we go the extra mile in presenting your coins. The full-color photographs show all the details that make your coins so valuable. The longer, more detailed descriptions give buyers all the information they need to bid with confidence. And the catalogs are distributed to over 4,000 active buyers, one full month before the sale."

"It all works together to get buyers excited about your coins, and that pays off in higher prices."

Top prices are proven at Long Beach.

At last year's Heritage Long Beach sale, we received over 11,000 mail bids valued at well over \$5 million — *before the auction even began*. Another 298 registered floor bidders packed the auction hall and, when it was all said and done, our consignors realized over \$2,000,000 for their coins. That's the kind of competition Bob calls "fantastic."

Selling with Heritage is easy . . . and rewarding!

Ask anyone what it's like to consign coins to a Heritage auction, and you'll hear words like "delight," "a pleasure," and "helpful, personal service."

"Because we're part of the world's largest rare coin and stamp firm, we can offer consignors several advantages," Bob says. "Instant cash advances, flying to your city to pick up your coins, guaranteed on-time payment, PCGS Auction Express Service, or just being there to answer your questions . . . they all add up to the kind of

service you expect when you sell your collections. The only surprise should be the high prices you get for your coins."

Consign NOW and watch your coins sell for top prices.

If you're still hesitant about consigning, Bob has one last suggestion. "I know the Long Beach Sale is going to be one of our best of the year, and I urge you to reserve your place today . . . but if you still have questions, please call Bob Vitt, Leo Frese, or me toll-free right now. We'll be happy to talk to you about your coins."

To take advantage of the big crowds, the full-color catalogs, and all the bidding competition, call or send in the coupon NOW.

YES!

I want to sell my coins for top prices at the Heritage Long Beach Sale.

I'm enclosing this coupon with my coins and sending them registered mail for possible consignment to your Long Beach Sale. I understand there is a minimum value of \$1,500 that must be consigned.

I have coins I want to sell. Please send me your booklet entitled *How to Sell Rare Coins At Auction*.

I would like a one-year subscription to all your auction catalogs. Enclosed is \$50 for the year.

I would like a copy of your Long Beach Sale full-color catalog. Enclosed is \$10.

U.S. Gold Continues Dramatic Increase

This week's charts exhibit a multitude of plus signs in every series. Even though the bulk of the increases are for Proof and Mint State 65 and better coins, other less scarce grades are receiving increased activity at higher levels. As we suspected from recent dealer reports, their clients are becoming anxious; if the client can't obtain the specific issues desired in top grade, they may be willing to accept the next lower grade (hereafter, referred to as the next available grade without excessive availability). This seems especially true for the issues which are currently bid at only 10% of the next higher grade.

As you can witness from the Morgan dollar chart, numerous issues are higher in MS-63 and MS-64, including many prooflikes. Several of the increases are for issues that are not easily available in higher grades. For example, 1879-O, 1880-P, 1890-P, 1890-O, and 1891-O, all have very few graded in MS-65. Yet, MS-64, as dealers and their clients realize, is a very desirable grade. The previously mentioned issues are receiving bidding activity in both MS-64 and MS-65. Also, the MS-65's are bid approximately ten times the MS-64's. This situation is occurring in most other series, maybe not as extreme, but we are finding more increases in MS-63 and 64 issues as supply and demand tends

to rule the coin market—as it does with other markets.

While considering the supply and demand theory, one must also take into account how high a market can run before sellers are willing to take profits, even in high grade material where supplies may be thin. The certified market has made profitability a more recognizable factor due to sight unseen bidding. Yet, it may also create a more rapid turnaround. As recently as April 1, MS-65 \$2½ Gold Liberties (PCGS) were bid at only \$3,150. Last week they were bid at \$4,950. That's a cool paper profit of \$1,800 in just two months. However, inter-week trading found this market as high as \$5,800 before the high buyers chased each other backwards due to the sale of a few coins. Bid finally consolidated and settled at a respectable \$5,200, which was still an increase for the week. Yet, the overall impact has been felt by the dealers who were the high buyers, first at \$5,800, then at figures somewhere between that number and \$5,500. These dealers now show paper losses due to the fact that this particular issue may have reached a peak—temporary or not. Generally speaking, most coins can reach such levels of profitability at times. A wise buyer must also be a wise seller occasionally.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: Established by the ANA (a non-profit organization) in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (719) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". NCI coins do not see as active bidding as PCGS or NGC therefore, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Sky-Rocketing Prices Extend To MS-63 and MS-64 Grades

Active marketmakers are finding it so difficult to locate high grade material that they continually leap-frog over each other in an attempt to be high bidder so that any potential sellers can easily find them. This lack of high grade material becoming available on the market is creating somewhat of a revelation; that is, in order for dealers to fill their want lists, they must buy the next available grade. This may seem simple enough since availability usually increases as you move each column to the left in any given series. However, the first step toward acceptance of a subordinate grade by the dealer is to assure this acceptance on the part of the client.

Over the last several weeks dealers have not been able to satisfy their clients quickly enough. It was inevitable that these clients would have to expand the grades which would be acceptable as a defense mechanism. Otherwise, they might be left behind as competition moves quickly into available grades. At first, all the dealers did was try to outbid each other (they still do) on high grade coins, yet many of these coins were not available so they only created plus signs with occasional action. But the clients wanted coins and in order to satisfy these needs the dealers had to buy the issues in the grades available. The demand for high grades created a "quality monster," which in turn need-

ed to be fed. The more the monster eats, the bigger it gets, and the more he wants to eat. He has been, and is, moving to the left hand columns to satisfy this hunger.

What has caused this sudden increase in demand? This may not be as sudden as the time frame makes it appear. The demand has been visible for months now. Everyone is convinced that high quality is the best to buy. What many dealers and their clients are realizing now is that almost any grade can be profitable if the price is commensurate with its quality. Furthermore, the spreads from one grade to the next higher grade are widening considerably. Thus, the lower grade is looking awfully enticing to astute buyers.

A further explanation of a broadening market may be the fact that many new "big money" buyers have "seen the light" and jumped on the bandwagon. Most insiders are well aware of a large sum of fresh money which has been pumped into the certified market over the last few months. What they may not be aware of is the fact that there seems to be other "fresh money" forces which could be influencing this market also. If this truly is the case, we may be viewing just the tip of the iceberg.

PCGS

Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS

American Numismatic Association Certification Service: Established by the ANA (a non-profit organization) in 1972, for authentication to which grading was added in 1978. ANACS offers an opinion as to authenticity and grade. ANACS is located at 818 No. Cascade, Colorado Springs, CO. 80903. Phone: (719) 632-2646. ANACS uses 9 different graders and at least 4 must view every coin in order to determine a final grade. In addition, there are several professional dealers who act as grading consultants for particularly difficult to grade coins. Minimum cost for each coin submitted is \$20. Turnaround time is approximately 8-10 days. They will certify coins already in holders without removing the coins from the holders, if requested to do so.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars. ANACS is currently working on the establishment of grading sets for every series possible. Due to the fact that ANACS coins do not trade nearly as often as do PCGS or NGC coins, they will only be listed once a month.

NGC

Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation" and "strike". NCI coins do not see as active bidding as PCGS or NGC, therefore, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

NUMISMATIC GUARANTY CORPORATION OF AMERICA

THE COIN GRADING SERVICE ENGINEERED TO PROVIDE UNBIASED GRADING.

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The principals of NGC can not buy, sell, or trade coins commercially. NGC is creating *the* standard for objective, consistent, and accurate grading of higher quality, investment grade coins.

Look for premium quality, NGC certified coins at the following charter Member/Dealers. As NGC only grades coins submitted through our Member/Dealers, please contact them directly. Please do not send coins to NGC.

Plus Signs Pepper Type Charts in 64 and Better

For those dealers who have been skeptical, it is becoming more difficult to not believe in this coin market. The groundwork has been laid for an incredible summer as the heatwave continues — the hot is not just in the weather. Every series persists at current levels or higher. The majority of plus signs appear in the 64 or higher columns, however, each week finds lengthening want lists which include 63 material at escalating bids as well.

The Type market is booming as marketmakers jump each other's bids in an effort to add new material to their inventories, or ultimately, to sell to their customers. The strength of the plus signs appear in the 64 and better columns, yet, the lesser grades are very stable at current levels. The depth of this entire market seems to be expanding almost daily. As fast as bids are increasing, it is incredible to see some specific issues selling at as much as double bid (on a sight basis) dealer-to-dealer. This has been the case for several top quality PCGS and NGC coins; however, keep in mind, that bids listed within are for sight unseen bidding (PCGS & NGC). This points out how important it is to be capable of grading in today's marketplace.

The dollar market continues to reveal an abundance of increases as dealers look for strong performing issues for their clients. In many cases (due to a minute population), it is improbable to satisfy all those clients who want specific issues in a specific grade. Eventually, the only results are higher prices. The bid increases look great in a prospectus — even moreso if the

actual coins are available for a portfolio.

The silver commem market remains strong with considerable bidding activity taking place in the MS-64 to MS-67 grades, with actual sales usually taking place in the MS-64 and 65 issues. While sales do occur occasionally in the MS-66 and 67 issues, they frequently trade for prices in excess of current bid levels.

Gold commems may be even stronger than their silver counterparts. The apparent strength of this series is enhanced by the depth of the bidders. As with all hot markets, almost every dealer becomes a marketmaker.

The recent Newport Beach Coin Show featured an auction conducted by the San Diego Show & Auction, Inc. The highlight of this sale was an 1895 Proof Morgan, which realized \$63,800. This coin was graded PR-66 by both PCGS and NGC. Other notables are listed below:

DENOMINATION	SERVICE GRADE	PRICE REALIZED
1909-S VDB 1¢	PCGS MS65 R&B	\$ 1,540
1921 10¢	NGC MS65 FSB	\$ 3,575
1924 25¢	PCGS MS67 FH	\$10,450
1900 50¢	PCGS PR66	\$ 6,820
1943-D 50¢	ANACS MS67	\$ 715
1880 \$1	PCGS PR65	\$ 6,820
1881 Gold \$1	PCGS MS65	\$ 6,050

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service established (1972), to which grading was added in 1978, by the American Numismatic Association, a nonprofit, educational organization chartered by Congress. All proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation" and "strike". NCI coins do not see as active bidding as PCGS or NGC, therefore, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

THE SIGN OF A NEW ERA IN COIN GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The principals of NGC can not buy, sell, or trade coins commercially. NGC is creating *the* standard for objective, consistent, and accurate grading of higher quality, investment grade coins.

Numismatic Guaranty Corporation has over 200 Charter and Associate members. Look for premium quality, NGC certified coins at the following Charter Member/Dealers.

**American Federal Rare Coin

"...all of the coins on my list will out-perform the rest of the market..."

-Silvano DiGenova

Editor-in-Chief, *Tangible Investment Advisory*
Chairman, Tangible Investments of America

Dear CCDN Subscriber,

The rare coin market is finally getting hot. Very hot. And no one knows it better than you, the CCDN subscriber. Remember these headlines?

"Dealers Encounter Vigorous Certified Market
at Central States Convention"- CCDN, April 15, 1988

"Positive Attitudes Bring About Stronger Market" - CCDN, April 22, 1988

"Plus Signs Scattered Extensively in Almost Every Series" - CCDN, April 29, 1988

"Certified Market Moves Forward by Leaps and Bounds" - CCDN, May 6, 1988

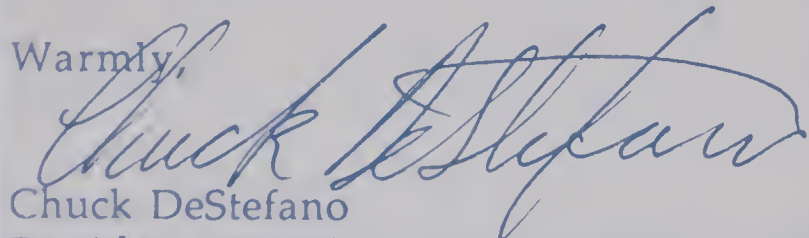

Timing. The timing is definitely right. The time to buy rare coins is NOW.

But, which ones should you buy? How are you going to determine the real rare coin winners? How can you take advantage of the market to its fullest?

Now you can. You can take advantage of the rare coin expertise of Silvano DiGenova. He's bought and sold hundreds of millions of dollars worth of rare coins. He's been featured in *Fortune*, *Venture*, and *The Wall Street Journal*. His rare coin portfolio has consistently been on top of *Gary North's Investment Coin Review*, up against the likes of David Hall, and Ed Lee, to name just a few.

Take advantage of his expertise at picking the winners by reading the *Tangible Investment Advisory*. We are offering you the opportunity to examine our first issue absolutely free. All you have to do is ask. You are under no obligation to buy anything. We think that you will find it invaluable in making an educated rare coin decision that will make you money!

Warmly,

Chuck DeStefano
President, Tangible Investments of America

P.S. Call us toll free at (800) 245-7600 and mention the CCDN to receive your free money-making issue, or fill out and mail the attached coupon on the right to the address below.

Yes, I want to examine the first issue of the *Tangible Investment Advisory* free of charge and benefit from the money making rare coin picks. I understand that I am under no obligation to purchase anything.

Momentum Continues as Dealers Ready for ANA

Many of the nation's top dealers are spending their valuable time scurrying through the marketplace, and building up their inventory. They are anticipating one of the most active ANA Conventions in history; and if recent shows are any indication, this is likely to be the case. This year's ANA takes place in Cincinnati, July 20-24; with PNG Day on July 19th. Heritage Numismatic Auctions is handling the sale which contains a wide variety of rare numismatic material. Along with Auction '88, which takes place July 16 & 17, this promises to be a very demanding month — one which many dealers may conclude with a well-deserved vacation. But, then again, when business is hot, vacations are usually postponed.

It is difficult to measure which series is enjoying the most activity in today's marketplace. While it is true that dealers are actively bidding for MS-65 and higher coins, this is a buyer's market and there is much more demand than there are supplies available. In order to locate material of this caliber, one must be willing to pay above the high bidders or settle for coins which may be available in the next lower grade.

The most actively bid areas are Type (which have a monumental number of plus signs), Gold, Walkers, Dollars, and Commems. In all of these series, the higher the grade, the more over bid potential sellers demand. The following list is an indication of the grades that are likely to trade within each series on a regular basis.

SERIES	MOST ACTIVE GRADES
U.S. Gold	MS-61 thru 65
Dollars	MS-63 thru 66
Commems	MS-63 thru 65
Walkers	MS-63 thru 66
Type	MS-64 thru 66

In Gold, the 65's which trade are usually Saints, \$2½ Libs, and maybe TIII \$1 coins. The MS-66 dollars which trade are the ten most common, while the rare date 65's, when available, do not last very long at all.

Gold commems will generally trade as soon as they are returned

from the grading services, as long as they are priced somewhat close to current levels. That is, of course, unless they grade 65 or higher; then the potential seller is in the driver's seat. Almost any silver commem grading higher than MS-65, will only be offered once if it is near current levels. There are any number of dealers who do not post bids (feeling that they are ineffective anyway), yet, they just snap up those gems when they are offered on the market. This is also the case in other series, where dealers are marketmakers even though they may not be visible bidders. It helps to know who these low-profile buyers are.

Walkers appear to be easily tradeable at today's levels in all grades, especially MS-66's. And Type coins are thriving as demand increases for 64 and better material. As can be expected, anything grading 66 or better will command hefty prices.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

ANACS American Numismatic Association Certification Service: First authentication service established (1972), to which grading was added in 1978, by the American Numismatic Association, a nonprofit, educational organization chartered by Congress. All proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", surface preservation, and "strike". NCI coins do not see as active bidding as PCGS or NGC therefore, they will only be listed once a month.

 CIRCULATION & ADVERTISING Betty Morris
 GRAPHICS Shane Downing

Certified Coin Dealer newsletter reports the national coin
 market for certified coins only. Only the most active areas for
 the most active grading services are represented. CCDn uses
 every means available to insure accuracy and completeness of
 the bid prices shown. Since prices represent the highest known
 bids at press time and they are based strictly on dealer needs,
 prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer.
 What price levels an individual dealer buys or sells at is strictly
 up to the dealer. CCDn represents only that the bid prices listed
 were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible
 bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit
 on a sight basis.

If you're not buying your U.S. gold from Heritage, you're probably paying too much

There's no other way to say it, because Heritage is the world's largest importer of U.S. gold.

- Weekly shipments from overseas.
- Multi-million dollar inventory.
- \$5's to \$20's, XF to MS-63, VF and Jewelry Grade.
- Same low prices on all orders, whether \$2,500 or \$2.5 million.
- A larger sales staff to serve you better.

- FREE overnight delivery on many orders.

Call in your order TODAY!

Most of the largest marketers in the country buy from us regularly, and you should, too! For a bigger selection, lower prices and unbeatable service, call Lee Minshull, John Hipps, or Greg Rohan toll-free.

Auction '88 Expected to Verify and Accentuate Plus Signs

This is beginning to sound like a "broken record" as each week there are another record number of plus signs throughout the charts. This week's changes almost cover whole columns within various series as marketmakers attempt to buy almost anything that has a nice appearance. Evidence of this strength can be found in the fact that there are very few sell messages offering certified coins at discounts. Taking this one step further, there are very few sells within 10% of Bid. At most coin shows it is becoming even more dramatic as some dealers are restricting their sales when they feel they have sold too much and cannot replace material. They simply stop offering coins for sale and become buyers only.

Even though the majority of material in Auction '88 is not certified, this is not expected to restrict the bidding efforts of almost every major dealer, collector, or investor who attends this once a year extravaganza. The general quality in this sale is superb and rarity will also be a tremendous factor for those once in a lifetime issues which are available. Auction '88 appears to be a preview of what the numismatic community can expect the following week at the Cincinnati ANA. Dealers are anxiously awaiting this major event as they feel this show will reveal further evidence of the strength of the rare coin market.

If you thought the dollar market was strong heretofore, look at all the plus signs this week. Almost every issue is on the rise in MS-65, 66, and 67, and MS-64's have almost as many. MS-63 issues are also on numerous want lists as dealers try to satisfy their customers' needs. It seems like everyone is beginning to feel like they may "miss the boat" if they don't get their feet wet in a hurry. Confidence in grading by the major services is building to the point where many dealers are willing to take either PCGS or NGC coins at their sight unseen bids. And the number of dealers who will buy coins from either service is increasing markedly. This leads one to believe that there is a lot more confidence in today's grading standards on the part of the numismatic public.

The Type market is definitely attracting a major portion of dealers' attention these days. Proof and Mint State 64 and better quality coins have a generous amount of plus signs—almost every issue in the nickel and silver series. Many of the increases are not nominal; they are as much as 10% - 15% depending on how badly a dealer needs a particular issue. (In normal weeks, increases may run as little as 1%, with a 5% jump being quite intense). Even 63 material is receiving more enthusiastic bidding where higher grades may not be as readily available.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

ANACS American Numismatic Association Certification Service: First authentication service established (1972), to which grading was added in 1978, by the American Numismatic Association, a nonprofit, educational organization chartered by Congress. All proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

ANACS coins may not have any negative comments on the certificate in order to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade. There are thirty professional dealers who act as consultants and many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. When sending coins to be graded, you may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, there will be a \$7.50 charge and the coin will be returned ungraded. They will certify coins already in holders without removing the coins from the holders, if requested.

NCI has established grading sets for silver dollars \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". NCI coins do not see as active bidding as PCGS or NGC, therefore, they will only be listed once a month.

Certified Coin Dealer newsletter reports the national coin
market for certified coins only. Only the most active areas for
the most active grading services are represented. CCDn uses
every means available to insure accuracy and completeness of
the bid prices shown. Since prices represent the highest known
bids at press time and they are based strictly on dealer needs,
prices will fluctuate according to these needs.
Individual buy and sell prices will vary from dealer to dealer.
What price levels an individual dealer buys or sells at is strictly
up to the dealer. CCDn represents only that the bid prices listed
were the highest known to us at press time.

IS FREE REASONABLE ENOUGH?

Having your coins PCGS Certified doesn't have to cost you a cent!

You don't have to pay \$22 or more to have your coins graded by PCGS. Just send Joel Rettew / Rare Coin Investments a minimum of ten coins, and give us **First Option to BuySM** them. If you accept our attractive offer, the grading is on the house; should you decline, you merely pay the standard grading charge. You still benefit from our advance payment.

Market Leadership through Innovation

Joel Rettew is known throughout the industry as a **Major Market Maker**, especially in PCGS coins. Every month he needs to buy over a million and a half dollars worth of rare coins to satisfy the needs of his clients. He is also recognized as a leading contributor to the wholesale numismatic market, and has been an industry leader since 1963. You can share in his success through such innovative ideas as his **First Option to BuySM** plan.

Your coins, Your money, Your choice

You know that our offer will be more than competitive because we need coins for our customers. We didn't become one of America's leading dealers by making disappointing offers. And that can mean more money in your pocket.

Send us your coins today to get top dollar and free grading. Sometimes the best things in life can be free.

Joel D. Rettew / Rare Coin Investments

ANA Convention Off To Roaring Success On PNG Day

Tuesday in Cincinnati may not have been the hottest location in the country, but one would be hard pressed to find a stronger or more active market (in the whole world), than the certified coin market at the ANA Convention on PNG Day. In fact, this may have been the most active PNG Day ever as buyers came early with intentions of filling their want lists before others beat them to the spoils. This created some keen competition (this kind of activity has been going on for at least four months) among dealers, collectors, and investors as prices of certified coins (especially PCGS and NGC) seem to be increasing with no end in sight.

All areas of the certified market are strong for coins grading 63 and higher; even moreso as the grades increase and population diminishes. This brings up the question of why would anyone want to sell high grade, low-population coins when they continue to increase in value almost daily. Whether these rarities are actually worth these high bids is not the question; the fact remains there are sight unseen bidders for these low-population coins. If the high bidder fills his order, there is another bidder right behind him. Such is the case in a fast-paced bull market.

This week's charts are filled with plus signs as every area is enjoying bidding success. The one drawback may be that, even though bids are increasing substantially, dealers are reporting that they have to pay over current levels in order to actually consummate deals. This brings up a philosophical point which must be remembered, *especially in a hot market*: Bid levels represent what the high buyers are willing to pay, sight unseen,

for PCGS, NGC, and NCI coins (ANACS are sight seen bids); this does not mean they can buy the coins at these levels. As we have reported for several months, actual sales are taking place at varying (and often substantial) amounts over Bid. This might be the characteristic by which this market is remembered.

Auction '88 was a raging success and although most of the coins were not certified, prices realized reveal how feverish this coin market really is. The following highlights are just a few of the certified coins from this important sale.

DENOMINATION	SERVICE-GRADE	PRICE REALIZED
1866 Shield Nickel w/rays	PCGS-PR65	\$ 6,600
1885 Liberty Nickel	ANACS-PR65/65	\$ 2,530
1909-O Barber Dime	PCGS-65	\$ 2,640
1878-CC Seated Quarter	PCGS-65	\$ 4,620
1942 Walking Liberty Half	ANACS-PR65/65	\$ 1,265
1892 Morgan Dollar	ANACS-PR67/67	\$ 13,750
1895-O Morgan Dollar	NGC-PR64	\$ 63,250
1922 Peace Dollar	NGC-Matte PR65	\$ 50,600
1825 \$2½ Gold	NGC-66	\$137,500
1887 \$3 Gold	PCGS-PR65	\$ 50,600
1796/5 \$5 Gold	ANACS-XF40/40	\$ 9,350
1906-O \$10 Gold	PCGS-65	\$ 22,000

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDN Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued, if not, the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. CCDN Bids reflect 1987 and newer certified coins

Certified Coin Dealer newsletter reports the national coin
 market for certified coins only. Only the most active areas for
 the most active grading services are represented. CCDn uses
 every means available to insure accuracy and completeness of
 the bid prices shown. Since prices represent the highest known
 bids at press time and they are based strictly on dealer needs,
 prices will fluctuate according to these needs.
 Individual buy and sell prices will vary from dealer to dealer.
 What price levels an individual dealer buys or sells at is strictly
 up to the dealer. CCDn represents only that the bid prices listed
 were the highest known to us at press time.

DEALERS

On July 7th the Teletrade Exchange was opened to the public - free. In the first week 445 coin collectors from 39 states placed 1250 calls to our computer requesting price and availability information on 5400 coins. Teletrade gave it to them along with the name and phone number of the dealer who had each coin. To make your coins available in this exciting new national marketplace call 800-232-1132 today.

Gold and Walkers Take Roller Coaster Ride at ANA

One of the main ingredients that the certified coin market finds inherent in the system is volatility. This has never been so apparent as it was at the ANA in Cincinnati. The overall convention proved very successful for the majority of dealers, especially those who deal in certified coins. Every series was extremely active (most grades) and prices were generally higher. However, two series experienced the volatility of a fast-paced market through price swings best described as "chutes and ladders". Common date Walkers (PCGS) were climbing higher, to over \$450, when the bottom fell out and the highest bids found were in the \$325-\$350 range. This has since stabilized at \$325. The problem seems obvious: Prices went too high, too quickly and supplies glutted the market. Overall, this situation affected PCGS Walkers in MS-63 thru MS-67; also affected were NGC MS-67's. This week's charts reflect these changes.

This same problem occurred for \$20 St. Gaudens in MS-63, 64, and 65. Dealers filled their want lists at the beginning of the show, then those dealers with substantial inventories began to lower their sell prices. They chased the high bidders down to the \$3,500 area for PCGS MS-65 coins and \$1,550 for MS-64's. MS-63's corrected only slightly, down about 5%. The current bids show MS-65's at

\$3,600 and MS-64's at \$1,580. The lack of confidence in the price levels of large population coins also created some weakness in other issues. Major marketmakers lowered their bids across the board for PCGS gold in grades MS-64 to MS-67. This could be a temporary situation until dealers balance their books.

The Type market "made" the ANA Convention for numerous dealers. Suddenly, it almost seems like there are no common issues. Almost all 64 and higher issues (Mint State and Proof) are in strong demand at current levels; with the majority showing plus signs. Any issue considered to be of lower mintage was bringing considerably more than bid levels.

One of the hottest areas of the market among some of the dealers at the show were NCI graded coins. Most NCI dealers had revised their bids up to as much as 20% - 30% over their previous bids; mostly in U.S. Gold, Dollars, and Commems. These new bids will be reflected in next week's CCDn which includes NCI graded coins.

PCGS has announced the discovery of some "illicit" PCGS slabs and believe the source has been determined. PCGS will "make whole" anyone affected.

PCGS

Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS

American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDn Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC

Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation" and "strike". Due to current trading volume, NCI coins will only be listed once a month. CCDn Bids reflect 1987 and newer certified coins.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active trading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs. Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

THE SIGN OF A NEW ERA IN COIN GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The principals of NGC can not buy, sell, or trade coins commercially. NGC is creating *the* standard for objective, consistent, and accurate grading of higher quality, investment grade coins.

Numismatic Guaranty Corporation has over 200 Charter and Associate members. Look for premium quality, NGC certified coins at the following Charter Member/Dealers.

Volatility Hits Walkers and Gold Overall Market Remains Lively

BCC... Before Certified Coins. Before the certified coin market became popular, trading among dealers was usually accomplished in an orderly manner. No, they did not always agree on grade, but once two dealers understood what the other was looking for, they could usually trade hassle-free. Sight unseen was assumed rather than by a guarantee of the bidder. Markets usually went up and down in an orderly fashion. There were some exceptions (such as the Lincoln, Nebraska Crash of '80), but, generally speaking, most market moves were steady, if not predictable.

With the advent and increased trading of certified coins (with sight unseen bidding) among dealers, it was presumed that an efficient market would be a major benefit. And, it is. Most dealers realized, however, that this efficiency in trading made everyone's grading ability nearly equal. In fact, you can now run a rare coin business with no real knowledge of grading. But, there is a much bigger problem which has developed out of the certified market. That is one of volatility.

The efficiency of the certified market is a great asset, especially when the market is moving up. Dealers are climbing over each other's bids in an effort to be the high buyer. Yet, the potential seller demands more than the high buys; thus, the chase is never-ending. That is, until the market comes to a standstill. Then the want lists disappear for that par-

ticular item; bidders make an about-face and undercut the next highest bidder. This creates a highly volatile market that becomes quite disorderly on the way back down.

This is being pointed out because this situation just occurred within the Walker series. PCGS MS-65 common date Walkers were Bid under \$200 in March. They rose slowly at first, then just prior to ANA they started jumping. They were listed at \$400, but within a two day period were trading as high as \$500. Then they collapsed, falling to \$300 within a week, only to strengthen to \$325 this past week. The net gain, though, is 62.5% since March. This is a fantastic return on your money for such a short period of time. What must be kept in mind is that frenzy type markets are going to regress at some point in time. This is reasonable to expect and to think any differently would be to assume a continuous "Bull" market.

The overall market remains quite strong (with the possible exception of common Walkers and some Gold issues) as plus signs are scattered throughout the charts. One of the hottest areas of the market is NCI graded coins: U.S. Gold, Dollars, and Commems have increased considerably over the last month with many issues rising as much as 30%. Several marketmakers in NCI coins report having an extremely difficult time in purchasing enough coins to satisfy want lists.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDN Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. **CCDN** Bids reflect 1987 and newer certified coins.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs. Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Multiple Subscription Discounts

Certified Coin Dealer newsletter

Dealers.....

Well, you asked for it, so we've done it for you. Many of you have told us that you need more than one issue of the Certified Coin Dealer newsletter so your co-workers don't fight over it. Now you can get *multiple subscriptions* for less. In fact, the rates get so low, that if you pay your employees more than \$5 per hour, it becomes impractical to make copies (it's unlawful also).

With our new multiple subscription rates you can order plenty of original issues for your office or store, and travels to auctions and shows. Your customers will feel more secure dealing with you knowing that you do not use unauthorized copies. You are a professional...use originals.

Our subscription base is our main source of income. With this in mind, we present the following schedule of multiple subscription rates. In order to get this special rate the CCDn's must be mailed to the same address.

1 subscription\$ 99
2 subscriptions.....\$164
3 subscriptions.....\$238
4 subscriptions.....\$305
5 subscriptions.....\$366

6 subscriptions.....\$415
7 subscriptions.....\$460
8 subscriptions.....\$500
9 subscriptions.....\$540
10 subscriptions.....\$575

Top Quality Type Receiving Extensive Measure of this Week's Advances

Over the last couple of weeks several additional serious buyers have joined the ranks of those active marketmakers who have been searching for top quality Type coins – usually 64 and better (many 63 issues are actively sought also). The term "serious" is meant to indicate that new want lists are extensive and the majority of these newly monitored bids are being registered at levels in advance of those in effect in previous *CCDN*'s. In fact, a thorough inspection of the Type charts on page 4, reveals not only are the plus signs abundant, but also that an assortment of gains recorded are quite substantial. It may also be noted that there are a number of dealers who do not necessarily make markets, yet, are always willing to pay over "Bids" for certain issues.

The number of Type coins being purchased is difficult to measure. However, it is safe to say that the various bidders are not locating the quantities they need at their buy prices. This is one of the main reasons why properly graded Type has been so active at this year's major auctions. Furthermore, Type coins had been in the doldrums for such a long period of time that many dealers feel this upward movement has been a long time in coming and that it still has a long way to go.

U.S. Gold continues to stumble as Bid levels retreat. Not only are the marketmakers lowering their buy prices, but various coins which

are being offered at discounts, go unsold. However, this does not mean that the Gold market is not active; quite the contrary, as dealers continue to purchase at more favorable levels in search of a market bottom. This is one of the benefits of the certified market, in that, sight unseen bidding makes for readily tradeable material, even if it is at lower levels. Since U.S. Gold is one of the easiest and quickest markets in which to raise cash, many dealers are using this area to balance their inventories as they buy into future lucrative markets.

PCGS has recently announced a "definitive" method of determining and identifying "illicit" PCGS coins. There are discrepancies in the type styles used on the inserts of the PCGS holders. Refer to the words "Professional Coin Grading Service". The serifs on the good insert slant from the letters at a 45° angle. Also the **G** in Grading has an obvious cross bar.

"The serifs on the bad insert are vertical. They are cut off squarely and do not angle out. The **G** does not have an obvious cross bar."

If you have any of the illicit type PCGS coins, PCGS has requested that you contact them immediately. If you have further questions, please call PCGS.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDN Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. *CCDN* Bids reflect 1987 and newer certified coins.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit on a sight basis.

If you're not buying your U.S. gold from Heritage, you're probably paying too much

There's no other way to say it, because Heritage is the world's largest importer of U.S. gold.

- Weekly shipments from overseas.
- Multi-million dollar inventory.
- \$5's to \$20's, XF to MS-63, VF and Jewelry Grade.
- Same low prices on all orders, whether \$2,500 or \$2.5 million.
- A larger sales staff to serve you better.

- FREE overnight delivery on many orders.

Call in your order TODAY!

Most of the largest marketers in the country buy from us regularly, and you should, too! For a bigger selection, lower prices and unbeatable service, call Lee Minshull, John Hipps, or Greg Rohan toll-free.

Bidding Activity Slows But Market Generally Steady

There appears to be a reduction in the amount of bidding activity for top grade (Mint State and Proof 66 and better) coins in the following series: U.S. Gold, Commems, and Dollars. In the majority of cases bids are remaining steady; however, some specific areas are falling to lower levels. This is primarily due to the marketmakers withdrawing or lowering their buy prices, thus, not supporting previous higher levels. This does not necessarily mean that these particular issues can be purchased at lower levels since we are referring to relatively rare coins. Nonetheless, the minus signs do infer an apparent weakness which must be a concern to those who own inventory within these areas.

Many dealers feel that this implied weakness is only temporary and is a result of two major situations. One, since most of these coins have low populations (number of coins slabbed in a specific grade by a service), marketmakers previously offered to buy them at "almost any cost". They continuously outbid each other chasing bids to higher levels. Since there are very few coins to satisfy demand, buyers would eventually move to other areas. However, some of the issues wound up bidding in the \$10,000 to \$100,000 + range and the number of marketmakers and their clients who can afford to purchase coins in these stratospheric arenas dwindle considerably as zeros are added. Previous market sup-

porters then shifted their attention to other series and more obtainable grades.

The second major cause of reduced bidding activity is a result of the several major auctions which took place over the last two months. Over \$30 million was spent on auction lots alone and many of these bills are now coming due. Add to this figure the millions of dollars spent at the major shows recently and it is easy to see why there may be a temporary "cash crunch".

The few areas where bid prices may be a little soft are not to be confused with the entire outlook of this market. As you can see from this week's charts, numerous plus signs appear in most series. A summary of the bidding activity which we have seen over the last couple of weeks indicates that most dealers are working back in the trenches. That is, they are attempting to buy into areas where population reports show coins are more readily available. Several dealers are trying to market specific issues to their customer base. This would, in effect, create an invisible holding company for these specific issues. Sometime in the future, it may be possible for one or two companies to attempt to corner the market on a specific issue (for example, MS-65 Oregon Commems).

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDn Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-532-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. CCDn Bids reflect 1987 and newer certified coins.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.
 Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

THE SIGN OF A NEW ERA IN COIN GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The principals of NGC can not buy, sell, or trade coins commercially. NGC is creating *the* standard for objective, consistent, and accurate grading of higher quality, investment grade coins.

Numismatic Guaranty Corporation has over 200 Charter and Associate members. Look for premium quality, NGC certified coins at the following Charter Member/Dealers.

Market Mostly Upbeat Some Corrections Found

Market leadership is an interesting phenomenon. By definition, many coin dealers can rightly claim that they are marketmakers in the particular series in which they specialize. Also, by definition, there can only be so many market leaders in their particular series. These are the dealers to whom others turn for information, for inventory, or to obtain the best bids when selling.

There are no market leaders whose expertise covers the entire market — there simply isn't enough time or money. Fortunately, the mantle of leadership in each area of specialization is usually shared among several leaders. It does raise the interesting question, however, of what to do when the leaders in particular series vacation at the same time. The coins don't decline in value just because top dealers are taking a needed break, but it does create a temporary liquidity problem in disposing of top quality coins at the highest possible dealer-to-dealer prices.

This past week, four to six market leaders took their end of summer vacation, with some interesting results on the teletypes. In some series (Buffalo 5¢, Mercury 10¢, selected Morgans), advances continued right in line with this current up-market. The withdrawal of the bids of some of the absentee buyers forced minor corrections in other areas (Commems and Morgans), with dealers selling some coins at just below

Bluesheet. Many of the minus signs this week are a result of such sales. For example, an 1898-O \$1 PCGS-66 was bid at \$2,525; the specimen offered for \$2,500 produced an insignificant minus sign, but a "—" never-the-less.

Until the big players return to the teletypes, minus signs we report will be the result of such selling activity. Since the teletype bids are currently out of sync with the real market, dealers who specialize in electronic trading are contemplating making this a long Labor-Day break as well.

This week's most actively bid markets appear to be Mercury dimes and Buffalo nickels. There are a multitude of plus signs throughout both charts, primarily for PCGS coins. However, there are active buyers for NGC coins at current levels. Buffalo nickels appear steady in MS-63, while all higher grades are showing a flurry of activity; that is, of course, if you can find coins to buy. Mercury dimes appear solid at current levels in MS-64 and better, non split-bands. The higher bidding is occurring for mostly the split-band varieties, which might prove awfully difficult to locate in MS-66 and better. If one is truly serious about buying some of these rarer dates in high quality with split-bands, it may be more advantageous to try and locate the specific coin and then ascertain the price.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDN Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. *CCDN* Bids reflect 1987 and newer certified coins

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

THE SIGN OF A NEW ERA IN COIN GRADING

The Numismatic Guaranty Corporation was founded to ensure unbiased, arms-length coin grading. The principals of NGC can not buy, sell, or trade coins commercially. NGC is creating *the* standard for objective, consistent, and accurate grading of higher quality, investment grade coins.

Numismatic Guaranty Corporation has over 200 Charter and Associate members. Look for premium quality, NGC certified coins at the following Charter Member/Dealers.

Certified Market Lively Despite Weakness in Obvious Areas

Vacationing marketmakers continue to be the leading factor in certified coin pricing. The withdrawal of their bids from the computer network is having a profound effect on the majority of dealers remaining active (but who depend on the market leaders for high bid guidance). Bids generally are holding firm, but dealers are concerned that some declines will be in order in the coming weeks if the vacations linger.

Until the situation resolves itself, we will continue to report minus signs where coins are offered for sale at prices below last week's *Bluesheet* Bid. Most of these sales are at very small discounts, but they may indicate a trend in the absence of the market leaders. At least part of the reason for such sales, as well as some bidding weakness, is that "CASH" is at a premium again. Auction bills and ANA bills are coming due at a time when some spectacular material is being placed on the auction block. The next two months should prove most interesting.

The majority of series are holding firm at current levels. Many dealers have active want lists and a strong client base. Areas which may appear soft are the more common coins within a particular series, but the overall series remains active. A readily available supply (sometimes large quantities) is the chief reason that these specific issues are moving lower. The following areas are showing some weakness: common Walking Liberty Halves in MS-64 and 65; common Proof Singles 65 and lower; various grades of U.S. Gold; very few Dollars in certain grades; and several Commem issues in all grades.

There appear to be more sellers of late in the Commem market; however, most sellers are generally asking well over the current Bids. Nonetheless, this week finds several sellers of discounted Commems, thus creating the minus signs. The Commem market has been hurt more than some others due to vacationing marketmakers.

Early Walkers (1916-1933) are steady to higher as dealers begin to concentrate more on the better dates rather than the later (1941-47) common issues. At this point in time, many collectors and investors have already stockpiled up on these late dates and now are in the market for the early issues. This may create a steady atmosphere for the early Walkers. As long as this market is consistent, clients will have a better chance of buying coins. If it really starts to take-off, then one will find it extremely difficult to purchase particular issues since potential sellers will demand way over then current Bid levels.

A portion of the perceived weakness in some rare high quality coins can be blamed on the fact that some marketmakers treat the certified market like an ongoing auction. For instance, an appropriate Bid for a certain MS-67 Dollar may be \$12,000. However, since only one or two may be certified, the likelihood of purchasing one is rather remote. Nonetheless, two marketmakers start outbidding each other all the way up to \$30,000. No transaction. Then they both go on vacation. Now the highest Bid is \$12,000. The market is not weak; the perception is.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDn Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. *CCDn* Bids reflect 1987 and newer certified coins.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

MINT STATE TYPE COINS

Prices are for the most common dates.

If the coin you have will stand on its own merits without the grading certificate and the CCDn bid is lower than the CDN, then refer to the CDN.

While some rare coin companies make claims, we offer you proof!

Tangible Investments of America asked many of you to request a copy of our newsletter, the *Tangible Investment Advisory*, and told you it contained rare coin picks that would make you money.

- *How did we do?*
- **Our Rare Coin Picks Made Money!**

Here's the Proof *:

In just *three months*, look at the dramatic percentage increase in these per coin price categories:

\$50 or Less:	57%	\$150-\$500:	45%
\$500-\$1000:	55%	\$1000-\$5000:	56%

**This information was derived from the rare coin picks in the June Issue of the Tangible Investment Advisory and the bid prices for these coins as reported from the 5/27/88 to 8/26/88 CCDN.*

Our Offer Still Stands:

We hope that you took advantage of our free newsletter offer and used the information in it to buy the coins that made these increases. If you didn't, our offer still stands. We will give you a complimentary copy of the *Tangible Investment Advisory* just for asking. Absolutely free - no strings attached. We want you to benefit from all the information presented in our newsletter. In addition, we would like you to become familiar with our company, Tangible Investments of America, and all the services we can provide for you.

A Special Bonus for You:

Be one of the first 100 to respond to this ad and we will send you a report that outlines all the specifics of our above mentioned rare coin performance, as well as some *special new information* that will help you make the right rare coin choices in the future.

Rare Coin Industry Exhibiting Reforms Which Indicate Long Range Progress

Tremendous strides have been made in the rare coin business over the last several years. A more standardized grading approach, which has been enlarged and enhanced by the accepted grading services, has helped immensely. Standards are not perfect (for the collector in all of us, perhaps they never should be), but we now have more numismatists who agree on grading than we ever had in the past — especially for precision Mint State grading.

Furthermore, sight unseen bidding by dealers has given customers a very real sense of confidence in the financial aspects of the "product". Nonetheless, the next hill to climb is that of volatility. This past month has been a prime example of just how volatile this market can be, as marketmakers removed their bids from the marketplace — presumably to take vacations.

As a result, Bids are beginning to fall dramatically. We are reminded that we saw the "up" side of this volatility a few months ago as prices jumped almost hourly, and at phenomenal rates of increase. However, owners rarely complain that their coins are appreciating too quickly. Now, as Bids are backing off so rapidly, with such large decremental drops, customers are sure to express their unhappiness. *You cannot have the benefit of tremendous percentage gains without the risk of substantial losses.* The computerized bidding systems allow for the more rapid dissemination of pricing information, but that must always be viewed as a double-edged sword.

Certified material again demonstrated its attractiveness to dealers and collectors alike at Mid-American Rare Coin Auctions' \$2-million 1988 Peach

State Sale held last week in Atlanta. While bidding was enthusiastic overall, high grade certified material continued to show impressive results.

Denomination	Catalogue Grade	Price Realized
1885 3¢ Nickel	NGC-PR-66	\$ 3,740
1914 Buffalo Nickel	PCGS-PR-67	\$ 7,700
1852 Seated Dime	PCGS-65	\$ 3,685
1887-S Seated Dime	NGC-65	\$ 2,860
1880 Seated Quarter	PCGS-65	\$ 4,180
1895 Barber Quarter	PCGS-PR-66	\$ 7,700
1924-D Standing Lib. 25¢	PCGS-66FH	\$ 8,800
1936 Walking Liberty Half	ANACS-PR-67	\$ 6,435
1878-CC Morgan Dollar	PCGS-65 DMPL	\$ 4,620
1900-S Morgan Dollar	PCGS-66	\$ 7,150
1926-S Peace Dollar	PCGS-66	\$ 7,700
1926-S Peace Dollar	PCGS-67	\$24,200
1927-D Peace Dollar	NGC-65	\$ 8,250
1915-S Pan-Pac Commem 50¢	PCGS-65	\$ 4,125
1888 \$1 Gold	PCGS-65	\$ 4,675
1884 Liberty \$2½	NGC-PR-60	\$ 2,200
1902 Liberty \$2½	PCGS-PR-64	\$ 9,900
1902-S Liberty \$5	PCGS-65	\$10,175

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDn Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. CCDn Bids reflect 1987 and newer certified coins.

Certified Coin Dealer newsletter reports the national coin
 market for certified coins only. Only the most active areas for
 the most active grading services are represented. CCDn uses
 every means available to insure accuracy and completeness of
 the bid prices shown. Since prices represent the highest known
 bids at press time and they are based strictly on dealer needs,
 prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer.
 What price levels an individual dealer buys or sells at is strictly
 up to the dealer. CCDn represents only that the bid prices listed
 were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible
 bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit
 on a sight basis.

If you're not buying your U.S. gold from Heritage, you're probably paying too much

There's no other way to say it, because Heritage is the world's largest importer of U.S. gold.

- Weekly shipments from overseas.
- Multi-million dollar inventory.
- \$5's to \$20's, XF to MS-63, VF and Jewelry Grade.
- Same low prices on all orders, whether \$2,500 or \$2.5 million.
- A larger sales staff to serve you better.

- FREE overnight delivery on many orders.

Call in your order TODAY!

Most of the largest marketers in the country buy from us regularly, and you should, too! For a bigger selection, lower prices and unbeatable service, call Lee Minshull, John Hipps, or Greg Rohan toll-free.

Dealers Feel Selectivity is Responsible For Current Mixed-Market

Now that many of the marketmakers are returned from their vacations, it would seem appropriate for renewed bidding activity to once again clutter the 'airwaves', raising both havoc and Bids. Right; and wrong. Yes, bidding activity appears to be on the increase; however, it is certainly not across a broad front. Dealers are bidding very conservatively in most areas (with the **notable** exception of the Type market), thus creating some rather large deficits in various Bid levels (especially Commems and Dollars). It is no coincidence that Commems and Dollars were two of the most active, upwardly moving series over the last 6+ months; many Bids for MS-65 and higher coins had witnessed dramatic jumps. Now that the market leaders have ceased their record-breaking pace and tempered their bidding activities on many of the highest Bids for these two series, it makes sense that Bids would fall to lower levels. Just as in any public auction, the results can be quite dramatic when just one of the two leading bidders withdraws his Bids.

Bear in mind that lower Bid levels do **not** necessarily mean that you can buy coins at these Bids; this is the flip-side of our often repeated comment (during the rising market) that you could **not** necessarily buy coins at the rising levels. The larger the population of a coin, the more likely that you will be able to buy closer to the Bid levels. When high-graded coins exhibit very low population figures, you are not likely to be able to buy at anywhere near Bid. This is true, even if the current Bid has fallen due to lack of support from the leaders. These super-star coins simply do not sell

to sight-unseen bidders when sight viewers are willing to pay top dollar + for the product.

In the past, activity in Type coins has often presaged a general market move to higher price levels; time will tell whether this is the case now. Plus signs in Type are liberally scattered, with a dramatic showing among the early coppers - another area typically reflecting collector interest and activity. The plus signs are also nicely distributed between Uncirculated and Proof specimens, another indicator of a generally healthy market.

Teletype activity is also demonstrating an interesting aspect of this market. We are witnessing repeated sell messages for some coins which would have sold almost instantaneously just two months ago. Partly, this is a natural reaction to the increased populations of many coins; as PCGS and NGC have slabbed more coins, the population reports have become a more accurate representation of the **true population** of each issue. After all, there is a world of difference between a **Rare Coin** and a **Rare Slab**. As the coins remain unsold, dealers in a less advantageous cash position are often seen to lower their asking price after a short time; this could prove to be a time of opportunity for astute dealers with cash reserves. Due to *slightly less* bidding activity on NGC coins, some NGC Bids are lagging behind their PCGS counterparts; this seems to be causing some dealers to offer NGC coins at PCGS levels. This likewise can spell OPPORTUNITY for the knowledgeable dealer or investor.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDN Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$20, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 150 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation" and "strike". Due to current trading volume, NCI coins will only be listed once a month. CCDN Bids reflect 1987 and newer certified coins

Certified Coin Dealer newsletter reports the national coin
market for certified coins only. Only the most active areas for
the most active grading services are represented. CCDn uses
every means available to insure accuracy and completeness of
the bid prices shown. Since prices represent the highest known
bids at press time and they are based strictly on dealer needs,
prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer.
What price levels an individual dealer buys or sells at is strictly
up to the dealer. CCDn represents only that the bid prices listed
were the highest known to us at press time.

Type Market Continues Displaying Upward Support

These past few weeks make it quite apparent why numismatists who deal in certified coins must keep a very close watch on this fast-moving market. Close your eyes and the market direction changes so quickly that you wonder if "Gilbert" cast a breeze through here as well. Several series have once again been hit hard as dealers either lowered their "buys" or withdrew them altogether.

Dealers maintain that the reasons for the downward adjustments are varied. First, some marketmakers are still returning from vacation and haven't fully begun to "deal" yet. Second, prices moved so high in some areas that dealers need to be convinced that they can be sustained (and apparently they **cannot** without buyers!). Third, some dealers are still paying their summer auction bills at a time when one of the greatest "Auction Septembers" of history is hitting. A market of undetermined or sporadic direction is not a good time to experience a "cash crunch".

Many dealers feel that these latest issue-specific downturns are only temporary. Indeed, they may be correct; some of the "big" minus items from last week's *Bluesheet* show just as "big" pluses today as marketmakers return with their high bids. A simple counting of plus versus minus signs is certainly no indication of market direction either, as many of the minus signs are for very small decrements (the result of dealers offering to wholesale coins at *Bluesheet* Bid levels). The continued surge in type coins indicates a healthy market, especially if it continues. Next week's Long Beach Show

should certainly help resolve questions about the future direction of this unsettled market.

Certified coins continue to demonstrate their strength at auction. Bowers and Merena's latest \$4 million New York auction sale, The Estates of Philip M. Mann & Glenn B. Smedley, realized excellent prices:

Denomination	Cataloguer's Grade	Price Realized
1880 Three-Cent Nickel	PCGS-65	\$ 1,650
1866 Three-Cent Silver	PCGS-63	\$ 632
1871 Shield Nickel	PCGS PR-64	\$ 688
1881 Shield Nickel	ANACS PR-64/64	\$ 1,430
1883 Liberty Nickel, NC	PCGS PR-65	\$ 2,090
1875-CC Twenty Cent	PCGS-63	\$ 2,420
1857 Seated Quarter	PCGS-64	\$ 2,530
1874-S Seated Quarter	PCGS-65	\$ 5,060
1910-D Barber Quarter	NGC-63	\$ 632
1882 Seated Half Dollar	PCGS-65	\$ 4,620
1890 Seated Half Dollar	PCGS-65	\$ 5,060
1854 Seated Dollar	PCGS PR-63	\$11,000
1856 Seated Dollar	PCGS PR-64	\$12,375
1882 Morgan Dollar	PCGS PR-64	\$ 3,960
1902 Quarter Eagle	ANACS-65/64	\$ 6,600
1908 Eagle, with Motto	PCGS-65	\$11,000

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDN Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 250 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal if requested.

NCI has established grading sets for silver dollars \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation" and "strike". Due to current trading volume, NCI coins will only be listed once a month. CCDN Bids reflect 1987 and newer certified coins.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

WE GRADE BY THE COIN, NOT THE CLOCK.

We know that an accurate grade takes time. So we spend more time on each coin to grade it accurately, instead of speeding through thousands of coins a day to beat the clock.

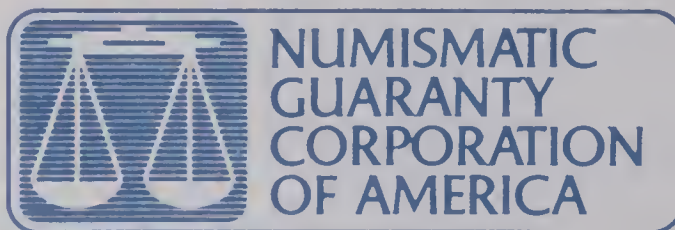

We offer limited, accurate grading.

Numismatic Guaranty Corporation knows how important it is for your coins' grades to be accurate. So we make sure our graders have plenty of time to grade your coins accurately. Our graders are limited in the number of coins they can appraise each day, and we accept only a limited number of coins for grading. We're the *only* coin grading service that sets these limits.

We've set the industry standard.

The grade we assign your coin today will still be valid *ten years from now*, because NGC-graded coins are not subject to fluctuating grading standards. We know that our greater investment in grading time produces a better investment for you: a coin with a stable grade.

For stability, reliability and accuracy, look for NGC certified coins at dealers displaying the Numismatic Guaranty Corporation of America sign.

For the NGC dealer nearest you, contact: Numismatic Guaranty Corporation,
P.O. Box 1776, Parsippany, New Jersey 07054, tel. (201) 984-6222.

Lower Bids Create Buying Opportunities For Ready Buyers

While high-grade Commems and Dollars are showing a large number of downward adjustments (this is mostly a result of marketmakers lowering or withdrawing their buys), dealers who are looking for some of these specific issues are not having an easy time in procuring them. If they are available, potential sellers continue to hold out for premiums above the previous higher levels. This signifies a certain amount of strength within these series which is not readily apparent from the new lower Bids. Inasmuch as many Bids have fallen from recent highs, several dealers are taking this opportunity to buy selected issues from those dealers who feel the market is weak.

The Lee and Shaffer Collections Sale, presented by Superior Galleries, contained an incredible array of high quality certified material. The Peter L. Shaffer Collection included a complete 144-piece set of MS-65 + **NGC Certified** Commemoratives (except three graded by PCGS). To call this offering anything less than spectacular would be misleading. Just as a hint of the bidding action, consider that the 144 coins Bid at Bluesheet levels of less than \$300,000. The final price realized, after the 10% bidder's surcharge? **\$576,746.**

For many weeks we have been reminding readers that coins cannot always be purchased at Bid levels, and this is especially true as the quality increases and the quantity available decreases. There would seem to be another **major** truth to have emerged from this week's action in Beverly

Hills. One of the most basic tenets of the belief that coins can be sold as a financial 'instrument' is that all coins graded similarly look alike, and that bidding can therefore proceed on a sight unseen basis. Indeed, that is why Bluesheet Bid for PCGS and NGC is for sight unseen coins; we are reflecting the expectations of the marketplace. **This auction has proved once again that bidders want to inspect material; and once inspected, they may be willing to spend MUCH MORE for it sight seen.** All this in a week when minus signs outnumbered plus signs in the Commem marketplace (and consequently, in the Bluesheet!).

Denomination	Cataloguer's Grade	Price Realized
1900 Lafayette Dollar	NGC-65	\$25,300
1936 Albany	NGC-66	\$ 4,180
1925-S California	NGC-66	\$ 4,840
1936 Cleveland	NGC-66	\$ 5,225
1893 Columbian Expo	NGC-66	\$ 9,350
1922 Grant with Star	NGC-65	\$35,750
1928 Hawaiian	NGC-65	\$ 9,075
1921 Missouri 2x4	NGC-65	\$15,400
1921 Missouri	NGC-66	\$35,200
1915-S Pan-Pac Half	NGC-66	\$10,450
1937 Roanoke	NGC-66	\$ 5,500
1925 Fort Vancouver	NGC-66	\$ 7,700

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDN Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 250 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. **CCDN** Bids reflect 1987 and newer certified coins

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

While some rare coin companies make claims, we offer you proof!

Tangible Investments of America asked many of you to request a copy of our newsletter, the *Tangible Investment Advisory*, and told you it contained rare coin picks that would make you money.

- *How did we do?*
- **Our Rare Coin Picks Made Money!**

Here's the Proof *:

In just *three months*, look at the dramatic percentage increase in these per coin price categories:

\$50 or Less:	57%	\$150-\$500:	45%
\$500-\$1000:	55%	\$1000-\$5000:	56%
\$1000 or More:	47%		

**This information was derived from the rare coin picks in the June Issue of the Tangible Investment Advisory and the bid prices for these coins as reported from the 5/27/88 to 8/26/88 CCDN.*

Our Offer Still Stands:

We hope that you took advantage of our free newsletter offer and used the information in it to buy the coins that made these increases. If you didn't, our offer still stands. We will give you a complimentary copy of the *Tangible Investment Advisory* just for asking. Absolutely free - no strings attached. We want you to benefit from all the information presented in our newsletter. In addition, we would like you to become familiar with our company, Tangible Investments of America, and all the services we can provide for you.

A Special Bonus for You:

Be one of the first 100 to respond to this ad and we will send you a report that outlines all the specifics of our above mentioned rare coin performance, as well as some *special new information* that will help you make the right rare coin choices in the future.

Single copy price \$3.50

Lower Buys and Discounted Sells Cause Major Market Correction

The main theme to be passed on from last week's Long Beach Coin Show is that the next few weeks will present tremendous buying opportunities for those dealers and their clients who are in substantial cash positions. The underlying problem here is that even though dealer buy prices have been reduced considerably (thus causing Bids to adjust accordingly), unless potential sellers drop their asking prices in the same proportions, then buyer and seller may have a difficult time getting together. Furthermore, the only real sources of discounted coins may be dealers who are inventory heavy (cash poor) or producers of certified coins. Inasmuch as marketmakers support the current Bid levels, they are not as likely to discount their inventories unless they are able to actually buy at these levels.

Since this has been an autumn of exquisite numismatic auctions, you will forgive us for ruminating on some auction-inspired topics. I have spoken with hundreds of collectors of small and medium means at auctions, and so often hear the same "complaint": "I can't compete with the big dealers." This has always surprised me, because the collector who truly desires an item is always at an **advantage** compared to the dealer. The collector doesn't have to worry about how long the item will remain in inventory before sale, or even if a customer can readily be found for the item. The collector doesn't have to figure in his mark-up to insure profitability, or consider the overhead expenses of advertising, office space, computer time, and staff. The dealer may have a liquidity problem because of bloated inventory, or overpricing,

or that ever-present overhead, or auction bills coming due. If the collector wants a coin, he can always outbid a dealer; unless he is **certain** that the coin will not sell and that a major decline in coin prices lies ahead, it will be cheaper to outbid a dealer at the auction rather than spending a lot more to buy it out of his inventory.

This comes to mind because of the inconsistent bidding for certified material in the marketplace. Only two weeks ago, it seemed that the market was firming nicely with the end of summer vacations; it now appears that certain prices are falling like the autumn leaves (especially Morgan Dollars and Commems). We have commented on this market volatility many times before, and won't belabor the point. The causes are many and varied: too many auctions with gem material; liquidity crunch; growing inventories; withdrawal of dealers' bids; and even offers of sale at Bluesheet Bid or below. The bottom line is that prices have dropped because dealers don't have enough money to buy all of the coins that they would like to.

All this spells opportunity for the collector who has been on the sidelines quietly counting his cash while the dealers engaged in the game of bidding up the prices of the highest quality coins which were barely in existence. Now is the time for collectors to take advantage of the dealers' liquidity problems and lack of full participation in the marketplace. In the greater 'auction' of the entire marketplace, this is one of those times of opportunity when the collector "in-cash" firmly has the upper hand.

PCGS

Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS

American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDn Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC

Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 250 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. **CCDn** Bids reflect 1987 and newer certified coins

Certified Coin Dealer newsletter reports the national coin
market for certified coins only. Only the most active areas for
the most active grading services are represented. CCDn uses
every means available to insure accuracy and completeness of
the bid prices shown. Since prices represent the highest known
bids at press time and they are based strictly on dealer needs,
prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer.
What price levels an individual dealer buys or sells at is strictly
up to the dealer. CCDn represents only that the bid prices listed
were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible
bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit,
on a sight basis.

WE GRADE BY THE COIN, NOT THE CLOCK.

We know that an accurate grade takes time. So we spend more time on each coin to grade it accurately, instead of speeding through thousands of coins a day to beat the clock.

We offer limited, accurate grading.

Numismatic Guaranty Corporation knows how important it is for your coins' grades to be accurate. So we make sure our graders have plenty of time to grade your coins accurately. Our graders are limited in the number of coins they can appraise each day, and we accept only a limited number of coins for grading. We're the *only* coin grading service that sets these limits.

We've set the industry standard.

The grade we assign your coin today will still be valid *ten years from now*, because NGC-graded coins are not subject to fluctuating grading standards. We know that our greater investment in grading time produces a better investment for you: a coin with a stable grade.

For stability, reliability and accuracy, look for NGC certified coins at dealers displaying the Numismatic Guaranty Corporation of America sign.

Certified Market Softens Further Sight-Seen Current Trend

The last few weeks have demonstrated a continuing trend of perplexing minus signs; perplexing because they represent a weakening of bid support levels in excess of the broadly based market decline. Certainly some of the more common material has been selling at reduced levels, but by-and-large sell prices are holding steady. In fact, we are witnessing some **increased** bids for material in **sight-seen** condition (at auctions and shows). The weakness in **sight-unseen** Bids (which are the Bids we report in the *Bluesheet*) represents a fundamental characteristic of this market: dealers feeling the cash-pinch want to inspect coins before purchasing, or make sure that their **sight-unseen** Bids are low enough to ensure that they cannot get hurt. Neither dealers nor collectors will feel completely comfortable bidding **sight-unseen** until they can be absolutely certain of the grading and quality of the coin that they will receive.

This market is also characterized by a real liquidity problem among dealers, a situation which seems to have resulted from the number and quality of recent auctions, the failure of the long promised "big-investment" dollars to appear, and the collector waiting patiently for prices to return to more reasonable levels. Teletype Bids may define trading ranges between major dealers, but in the long run it remains the collector and the collector/investor (the "final consumers") who establish market prices.

The Morgan Dollar chart on Page 3 has a new look beginning with this

issue. All "**Prooflike**" columns will now represent Bids for "**Deep Mirror Prooflike**" specimens. *The Coin Dealer Newsletter* has presented Bids for MS-63 and MS-65 "**Deep Mirror Prooflike**" dollars for many years and now the *CCDn* bids will follow the same format. One-sided or semi-P/L Dollars have always brought considerably less than listed bids on a wholesale basis; the top Bids have always been reserved for the **DMPL**.

When PCGS began grading coins, they did not differentiate between one-sided P/L, semi-P/L, or Deep Mirror Prooflikes; all such coins were designated **Prooflike**. Since sight-unseen bidders could not be sure that they would receive a two-sided fully-prooflike coin, bidding remained **very conservative**. It has been our observation over many years that dealers are willing to pay only a very small premium for one-sided P/L or semi-P/L coins.

Several months ago, PCGS began to differentiate "**DMPL**" (for Deep Mirror Prooflike coins) from "**Prooflike**" specimens. NGC, on the other hand, has consistently used the term **Prooflike** to refer to Deep Mirror Prooflike coins. Dealer bids for PCGS coins are beginning to specify the "**DMPL**", and the Bids appearing in the *Bluesheet* will now formally acknowledge this change in the marketplace. **PCGS DMPL** and **NGC P/L** both refer to Deep Mirror Prooflike specimens; the two terminologies should be considered identical. Current *CCDn* bids will stay in place until marketmakers react to increase their bids for these superlative specimens.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDn Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 250 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. *CCDn* Bids reflect 1987 and newer certified coins.

CERTIFIED COIN DEALER newsletter

CIRCULATION & ADVERTISINGBetty Morris
GRAPHICSShane Downing

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

If you're not buying your U.S. gold from Heritage, you're probably paying too much

There's no other way to say it, because Heritage is the world's largest importer of U.S. gold.

- Weekly shipments from overseas.
- Multi-million dollar inventory.
- \$5's to \$20's, XF to MS-63, VF and Jewelry Grade.
- Same low prices on all orders, whether \$2,500 or \$2.5 million.
- A larger sales staff to serve you better.

- FREE overnight delivery on many orders.

Call in your order TODAY!

Most of the largest marketers in the country buy from us regularly, and you should, too! For a bigger selection, lower prices and unbeatable service, call Lee Minshull, John Hipps, or Greg Rohan toll-free.

Single copy price \$3.50

Spreads Widen Between Sight-Unseen and Sight-Seen

The market has suffered through another round of drastic price adjustments; rather than just minus signs, we considered using slash marks. This is not intended to be humorous, as dealers and their customers lose "value" from their inventory. But are they really? If you must sell today, a few phone calls for **sight-unseen** Bids will get you a low cash-out offer; if you can afford the time to make a few more calls and let the active buyers **see** the coins, you have a much better chance of getting full value. We are in a "down" market, but not as down as **sight-unseen** Bids and minus signs would lead you to believe.

What is a coin worth? Three months ago, the answer was relatively simple. If the coin was certified, you looked up its Bid in the *Bluesheet* for the highest marketplace **sight-unseen** Bid. If the coin was "raw", you determined its value from the **sight-seen** Bids reported in the *Greysheet*. Today, the answer is not quite so simple.

What is your coin worth (if you are selling)? Perhaps a better question is, what is the **value** of your coin (if you are holding)? The answer to these two different questions is the same: **it all depends**. The main determinant is liquidity based; your need for liquidity, and the liquidity of the purchaser. As we have noted for many weeks now, the market is facing an exceptional cash-crunch. Accordingly, dealers have dropped their **sight-unseen** Bids, wanting to be sure that any added inventory is inspected first or purchased **cheaply**! Thus, most *Bluesheet* Bids **currently** should be considered the "cash price of last resort", *when you need to sell your coins today*. Frankly, it doesn't take much effort or genius to sell a \$300 coin for \$100; but, if you need the

cash today, then your coin is "worth" \$100. If you are considering selling, you will want to sell your coins **sight-seen**. That is how collectors and dealers are buying, and it explains the growing spread between *Greysheet* and *Bluesheet*.

Not all of the current *Bluesheet* Bids are simple "**quick-cash-out**" Bids. Dealers who have a distinct **need** for a coin will list serious Bids over the teletypes. Such Bids were the norm last July; they are rarer now - but when they occur, *Bluesheet* Bid can double that week. After the needed coin is purchased and the buy is withdrawn, Bid may return to the previous level. Bid may double or halve - **but has the value of your coin changed?** Only if you need to sell it then. Such erratic bidding only accentuates the inherent volatility of the slabbed market.

This volatility and lack of liquidity seriously undermines PCGS's original marketing intentions. PCGS has proven to be an enormous success as a major (perhaps the major) factor in grading. Greater ambitions to establish coins as a "commodity" that would be more attractive to traditional financial markets requires consistent marketmaking, but most dealers are unwilling to act as the "bank" for the certified market. For at least twenty years, numismatists have heard about the big "Wall Street" dollars that will be entering the market any day; it looks like we will have to wait a while longer.

The good news is that collectors are continuing to buy. Bidders for certified material found more than a few items of interest in the Newport Beach Coin Show's **Prestigious American Rarities Auction**, although certified coins did not command the attention that was in evidence two months ago.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDn Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 250 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation" and "strike". Due to current trading volume NCI coins will only be listed once a month. *CCDn* Bids reflect 1987 and newer certified coins.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

MORGAN DOLLARS

Prooflike Morgan dollar Bids in the CDN (Greysheet) have always represented fully deep mirror prooflike dollars. NGC P/L dollars are deep mirror prooflikes. PCGS grades P/L or DMPL. CCDn Bids represent deep mirror prooflike Bids only. Semi-P/L or one-sided P/L dollars are worth less than listed DMPL Bids.

THERE IS STILL TIME TO CONSIGN CERTIFIED (PCGS, NGC, ANACS, ETC.) COINS TO THE "ALL CERTIFIED" SALES AT THE UPCOMING OFFICIAL LONG BEACH EXPOS

AUCTION	SALE DATE	CERTIFIED COIN DEADLINE*	UN-CERTIFIED COIN AUCTION EXPRESS DEADLINE*
CERTSALE* V	February 1, 1989	January 1, 1989	December 15, 1988
CERTSALE* VI	June 1, 1989	May 1, 1989	April 15, 1989
CERTSALE* VII	October 1, 1989	September 1, 1989	August 15, 1989

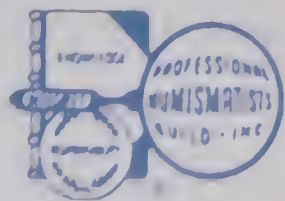

*Deadline is firm date that coins must be in our hands.

ADVANTAGES

1. CERTSALES* will be held Wednesday night. This is set-up night, and all dealers will have to colse at 7:00. Dealers will be eager to buy certified coins, which they can pick up the next day and sell at the show.
2. Each CERTSALE* will be published in full in Coin World, encouraging bids from across the country.
3. All certified lots will be listed in a separate catalog that will be mailed to thousands of active past bidders.
4. CERTSALE* commission rate is ZERO.
5. Your certified coins will be tied up for less than one month. Non-certified coins must be in our hands for Auction Express Service at least 45 days before the sale.
6. All lots will be shown Tuesday preceding the sale at the Hyatt Regency in Long Beach, and Wednesday morning starting at 9:00 AM at the Long Beach Convention Center.

**WE CAN ONLY ACCEPT ABOUT 800 LOTS PER CERTSALE*
DON'T DELAY ... CALL RON OR DENNIS GILLIO NOW!**

Note: In addition to Certified Sales, we are planning important auctions of United States and World Coins, Ancient Coins and Paper Money, in conjunction with the Summer Long Beach Expo, Hong Kong Numismatic Expo Ltd., etc. Please contact us concerning consignments of any scarce or rare numismatic material.

Commems and Dollars Show Some Improvement

After several weeks of innumerable minus signs throughout the charts, this week appears to be no different. Or, is it? Commems and Dollars have been suffering from a lack of support, which has caused Bids to fall markedly. In addition, sellers who need to raise cash have offered countless numbers of coins at discounted levels, thus intensifying these declines. Why is this week different? Several dealers feel that many coins have fallen to such low levels that they not only are trying to buy them, but they are raising their buy prices to do so. In the Commem columns you will see selected issues with plus signs. Not many, but some. At least it is a ray of hope for those who fear down-markets and await the initial signs of "pluses".

The Dollar chart looks even better. Although there are still many minus signs (with some terrific declines) throughout, the number of plus signs is quite encouraging. Again, this is an indication that Bid levels have dropped so low that some dealers are now willing to stock these issues at higher levels. When prices get so low relative to recent highs, dealers feel there are good buying opportunities and that clients will soon be "knocking at the door". The astute dealers and their clients pick and choose what they feel are the best bargains in the marketplace. Meanwhile, more conservative types wait until the market heats up overall, indicated by many more plus signs. This is the way it has always

been, and probably always will be.

As much as sight-unseen bidding has been a boon to the coin market (due to the creation of a "standard" grading practice, which still varies from one service to the next), it also has created an "optical delusion" that says a coin is worth only its sight-unseen Bid and that's all. This theory is even more intensified in a down market when the more common coins are dumped on the market. Sight-unseen Bids are an invitation to dump unwanted coins at the Bid levels. However, the key word is "unwanted"; if one needs specific coins to fill orders, **the buyers will have to pay over current Bids**. Furthermore, when the high bidder of the "unwanted coins" purchases coins for inventory at his Bids, is any one gullible enough to think that he sells them at the same price? I think not. We used to see non-profit dealers in the past, but they don't last long.

The "optical delusion" is a part of the down market. It is difficult to sell common coins when all the news is negative. But sight-seen buying, which includes auctions, continues to support the higher Bids which can be found in the *Greysheet*. Of course, to understand sight-seen buying and selling, one must be capable of doing business "the old fashioned way", by viewing the coins. It's nice to know that there is still room in the marketplace for numismatists.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDn Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 250 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal if requested.

NCI has established grading sets for silver dollars \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation" and "strike". Due to current trading volume NCI coins will only be listed once a month. CCDn Bids reflect 1987 and newer certified coins.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

MORGAN DOLLARS

Prooflike Morgan dollar Bids in the CDN (Greysheet) have always represented fully deep mirror prooflike dollars.
NGC P/L dollars are deep mirror prooflikes. PCGS grades P/L or DMPL. CCDn Bids represent deep mirror prooflike
Bids only. Semi-P/L or one-sided P/L dollars are worth less than listed DMPL Bids

WE GRADE BY THE COIN, NOT THE CLOCK.

We know that an accurate grade takes time. So we spend more time on each coin to grade it accurately, instead of speeding through thousands of coins a day to beat the clock.

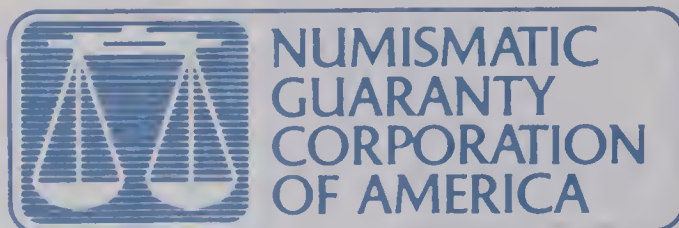

We offer limited, accurate grading.

Numismatic Guaranty Corporation knows how important it is for your coins' grades to be accurate. So we make sure our graders have plenty of time to grade your coins accurately. Our graders are limited in the number of coins they can appraise each day, and we accept only a limited number of coins for grading. We're the *only* coin grading service that sets these limits.

We've set the industry standard.

The grade we assign your coin today will still be valid *ten years from now*, because NGC-graded coins are not subject to fluctuating grading standards. We know that our greater investment in grading time produces a better investment for you: a coin with a stable grade.

For stability, reliability and accuracy, look for NGC certified coins at dealers displaying the Numismatic Guaranty Corporation of America sign.

For the NGC dealer nearest you, contact: Numismatic Guaranty Corporation,
P.O. Box 1776, Parsippany, New Jersey 07054, tel. (201) 984-6222.

Dollars Rebounding Dealers Hopeful Slide is Over

One good aspect of the volatility of the certified market is its ability to bounce back so quickly. In the past, "raw" coins would produce price charts that moved in one direction for a long period of time, a financial profile that reminds us of the Appalachian Mountains. The charts for the certified markets look more like our Sierra Nevadas - jagged, rocky terrain with steep inclines and declines.

Just prior to and during the Scottsdale Coin Show, Dollars seemed to be firming up; several issues showed increases last week. At the show, dealers realized that virtually nothing could be purchased at their low buy prices. In order to participate, even in this so-called "bear" market, they had to raise their buys slightly. In doing just that, they created activity that resulted in many dealers actively buying and selling. It seems that the market needs to periodically rediscover that it is extremely dif-

ficult to find sight-seen material at sight-unseen levels, and that dumping material will not raise prices.

This week's Dollar charts show a healthy number of plus signs, and hopefully this attitude will spill over to some of the weaker series. Commems are strengthening at current levels, and Type-65 is steady (with 63 & 64 stronger). Gold is moving actively, with prices on the lower grades firming. MS-63 Saints are active at new levels; the 'surplus' of certified specimens in the market that had caused Bids to fall have now been absorbed. The laws of Supply and Demand cut both ways, but contrarians continue to be the happy buyers.

The auction scene witnessed a new player enter the market, with Vintage Auctions' first sale realizing over \$1.3 million. See inset for a few highlights.

Denomination	Cataloguer's Grade	Price Realized
1922 Lincoln Cent	PCGS MS-65RB	\$20,900
1897-O Barber Dime	NGC MS-65	\$ 5,500
1942/1-D Mercury Dime	NGC MS-65FB	\$ 7,150
1901-S Barber Quarter	NGC MS-64	\$18,700
1795 Flowing Hair Half	NGC MS-63	\$20,900
1880 Trade Dollar	NGC PR-65	\$11,825
1887 \$1 Gold	NGC PR-65Cameo	\$11,550
1900 \$5 Gold	NGC PR-65Cameo	\$25,300
1920 Maine Commem	PCGS MS-66	\$4,400

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDn Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 250 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. CCDn Bids reflect 1987 and newer certified coins.

Certified Coin Dealer newsletter reports the national coin
market for certified coins only. Only the most active areas for
the most active grading services are represented. CCDn uses
every means available to insure accuracy and completeness of
the bid prices shown. Since prices represent the highest known
bids at press time and they are based strictly on dealer needs,
prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer.
What price levels an individual dealer buys or sells at is strictly
up to the dealer. CCDn represents only that the bid prices listed
were the highest known to us at press time.

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible
bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit,
on a sight basis.

While some rare coin companies make claims, we offer you proof!

Tangible Investments of America asked many of you to request a copy of our newsletter, the *Tangible Investment Advisory*, and told you it contained rare coin picks that would make you money.

- *How did we do?*
- **Our Rare Coin Picks Made Money!**

Here's the Proof *:

In just *three months*, look at the dramatic percentage increase in these per coin price categories:

\$50 or Less:	57%	\$150-\$500:	45%
\$500-\$1000:	55%	\$1000-\$5000:	56%
\$1000 or More:	47%		

**This information was derived from the rare coin picks in the June Issue of the Tangible Investment Advisory and the bid prices for these coins as reported from the 5/27/88 to 8/26/88 CCDN.*

Our Offer Still Stands:

We hope that you took advantage of our free newsletter offer and used the information in it to buy the coins that made these increases. If you didn't, our offer still stands. We will give you a complimentary copy of the *Tangible Investment Advisory* just for asking. Absolutely free - no strings attached. We want you to benefit from all the information presented in our newsletter. In addition, we would like you to become familiar with our company, Tangible Investments of America, and all the services we can provide for you.

A Special Bonus for You:

Be one of the first 100 to respond to this ad and we will send you a report that outlines all the specifics of our above mentioned rare coin performance, as well as some *special new information* that will help you make the right rare coin choices in the future.

Single copy price \$3.50

Market Strengthens As Dealers Increase Bidding Activity

Voila! Just like that, with a snap of the fingers, the certified market has turned around. We won't pretend to predict how long this rally will last, but we cannot help but remark on its sudden appearance. One day, dealers are only throwing out ultra-low insurance bids; the next day, they are seriously putting bids into the marketplace with the hope of winning coins. There must be magic in the autumn air.

Or, it may be that the collector/investor needs to be given a whole lot more credit for investing their dollars wisely; by that I mean buying when prices are lower and trading out when prices are much higher. And then buying back in at the bottom of the next cycle. We are hearing more dealers' stories about customers who are acting as their "bank", or more accurately, "extended inventory". Certified coins make this process fairly easy, since they remove quibbles over condition. The collector buys a coin he wants at a price he thinks is reasonable, wisely buying when minus signs dominate the charts and the 'cash-crunched' dealer is more amenable to negotiation; after a few months of plus signs, the dealer calls with an offer of a small but useful profit. A month later, the collector sells at a large profit.

With the volatility of the certified market, we expect to see this scenario becoming more commonplace. As long as the collector is the ultimate consumer, he needs to react wisely to this volatility. The con-

trarian knows that the time to sell is when everyone else is buying, and vice-versa; and believe me, the dealer *really* appreciates the knowledgeable customer who shows up when the shop is deserted.

So what are the motivators for our collectors/investors, beyond the typical desire to own coins? We have heard rumors of only one collector who ever said that he had enough money to pursue his collecting dreams. For the rest of the world, trading in and out is a way of life. Collecting desires change, the market suggests action, the kids need braces; certified coins make it easier to react. But how does the collector judge his timing? Frankly, the information obtained from dealers must be carefully evaluated. Dealers are hopelessly optimistic in an up-market, but close the bunker doors at the first hint of a minus sign. The key to surviving volatile markets is information, combined with a bit of good luck. And a little magic never hurts.

There is certainly cause for enthusiasm with the number of plus signs appearing in this *Bluesheet*. Gold and Commem Bids are particularly strong, and Morgan Dollars and Type are not far behind. Since these are the traditional areas of collector involvement, strength here is often the initial signal for a more active market. No one seems anxious to predict the length of this rebound, but it certainly has become widely based, and quickly too.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDn Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 250 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. *CCDn* Bids reflect 1987 and newer certified coins.

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

COMMEMORATIVES

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

MORGAN DOLLARS

Prooflike Morgan dollar Bids in the CDN (Greysheet) have always represented fully deep mirror prooflike dollars
 NGC P/L dollars are deep mirror prooflikes. PCGS grades P/L or DMPL CCDn Bids represent deep mirror prooflike dollars
 Bids only Semi-P/L or one-sided P/L dollars are worth less than listed DMPL Bids

ANTISEPTIC...

V.S.

...NUMISMATIC!

**NCI
GRADED
COINS...all the
advantages of
impartial
and consistent
grading...**

...Priced within reach.

Serious Numismatists

Most coin collectors like to look at the coins they buy - not at the insert in a plastic slab. Coin collectors enjoy studying their coins up close - not filing them away in a deposit box and awaiting their "appreciation." They appreciate them now.

The antiseptic nature of a slab doesn't always provide the same thrill as holding history in their hands. Yet the advantages of certification - impartial and consistent grading to a predetermined standard are available through NCI*.

Make a Comparison.

In most cases, the prices for NCI graded coins are considerably less than those certified by other services. The difference in the coins however is very slight. *We invite your comparison.* For example, look at their MS-65 common date Silver Dollars at around \$350. Then compare it with a similarly graded coin by NCI at about half the price. Can you tell the difference...and is the difference worth nearly \$200?

In a random selection of coins submitted to the other three leading services, NCI will generally agree with at least one of them on over half of the coins. Yet the wholesale price of the NCI graded coins averages less than 50% of the coins graded by other services. The average difference in grade among all the services, including NCI will be under one point. But the difference in price may be over 100%.

(NCI also offers slabbing as an option for the antiseptically minded)

Try NCI for Yourself.

Experienced collectors know good value. They know it's the combination of appearance and price that makes a purchase a good one. If you're a collector who looks at coins rather than paper inserts...compare NCI. Your eyes will be pleasantly surprised and so will your check book.

*Regular monthly listings of wholesale values for NCI graded coins appear in the *Certified Coin Dealer Newsletter*, permitting owners of NCI coins to stay in touch with market movements.

Single copy price \$3.50

Sight—Seen Auction Action Accentuates Slabbed Sales

The certified coin market exhibits many facets that are not as well publicized as some of its more commonly discussed characteristics. The topics of liquidity, market coverage, and grading consistency have been thoroughly examined. One of the *least* discussed issues has to do with the **regrading** of certified coins. Regrading usually occurs when the dealer submitting the coin or coins is not happy with the grade assigned; it can be taken for granted that regrading will occur only when he thinks the grade should be higher.

The regrading is usually accomplished in one of two ways. First, the dealer can physically break the coins out of the plastic slabs, and resubmit them (as though they had never been graded in the first place). This second submission is performed with the hopes of the coin reaching a different (and *more lenient*) second group of graders. The result? Hopefully, a higher grade and a *substantial* increase in value. When such coins are recycled through the system without notification, it naturally has the effect of making the population reports slightly skewed - some of the count in a particular category may belong to the same resubmitted coin. We have heard of one example where it took a dealer six tries to finally achieve the grade he wanted - in this case, the population count for MS-65 is at least **five** too high.

Second, a dealer can resubmit coins whose grading he challenges with the coins left in their slabs. The coins can then be reviewed to determine if the grade should be changed. Again, there may be a different set of graders

viewing the coins differently. If their consensus is that the grade should be raised, the coin can be reslabbed with the population report amended. Naturally, this method is not as popular with the dealers since the very existence of the slab tends to limit independent observation of the coin.

All this is brought to mind because of the recent sale of a complete set of Peace Dollars in McIntire Numismatic Auctions' N.S.D.C. Sale last week. The matched set, graded PCGS-64, realized \$27,500. *Bluesheet* Bid at that time was \$16,605 for PCGS-64, and \$87,254 for PCGS-65. For many weeks, we have been mentioning that selling coins **sight-seen**, as at an auction, will vastly improve the price realized over selling them **sight-unseen**; likewise, that sight-unseen Bids have been particularly low as dealers wished to avoid adding unwanted coins to inventory. Are those the reasons for paying such a substantial premium over *Bluesheet*? Or, are many of these coins destined for resubmission? If just a couple of the rarer dates "make it", the whole process will be well worth it.

One of the really big events of the just completed Silver Dollar Show was the sale of a complete set of PCGS graded Morgan and Peace Dollars, including varieties. Consisting of mostly high grade, 65 and better, the set sold for \$750,000, dealer-to-dealer. This was approximately \$50,000 over Bid at the time.

PCGS

Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS

American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDn Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC

Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 250 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI

Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars \$20 St Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. *CCDn* Bids reflect 1987 and newer certified coins.

Certified C in Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

Name _____
Address _____
City _____ State _____ Zip _____

Some bids within represent very conservative sight unseen buy prices on the part of the highest visible bidder. In these cases a more accurate reflection of a coin's true value may be found in the CDN albeit on a sight basis.

MORGAN DOLLARS

Prooflike Morgan dollar Bids in the CDN (Greysheet) have always represented fully deep mirror prooflike dollars
NGC P/L dollars are deep mirror prooflikes. PCGS grades P/L or DMPL. CCDn Bids represent deep mirror prooflike
Bids only. Semi P/L or one-sided P/L dollars are worth less than listed DMPL Bids

We Can Help Open the Gates of Opportunity.

Constants in the rare coin market are similar to those in any other. Fluctuations are frequent and often surprisingly fast. Collectors and investors agree accurate grading and competitive pricing provide one of the most secure investments available. To assure this objective, we are members of two most highly regarded grading services. In addition our computer network link allows nationwide access to numismatic properties at up-to-the-minute pricing.

Call today and learn why that whatever the market, the gates to opportunity are never closed.

Certified Coin Market Strengthens in All Areas

During times of market transition, *Bluesheet* comments are often marked by philosophizing rather than specifics. In rapidly rising markets, you are concerned with one specific question about your \$500 coin: next week, will it be worth \$525 or \$550? In plunging markets, you are preoccupied with a related specific question: will your \$500 coin be worth \$475 or \$450? During transitional markets, we all tend to reflect on a nobler question about your \$500 coin: what makes this coin worth \$500, and not \$475 or \$525?

Inherent in that question is the possibility for real understanding of the forces driving the coin market. If we had the proverbial 'dime' for every time we have heard someone say "supply and demand" without explanation, we would own them all. Supply is easy; demand is tricky. Demand is a function of emotional responses, and that means **confidence** plays a major part in rising markets, and **uncertainty** in falling markets. Curiously enough, we don't think the 'greed' emotions directly affect pricing - every collector would like 'to have them all', but allows that desire to be tempered by circumstance and pocketbook.

Transitional times are also times of opportunity, as dealers and collectors balance both their emotions and checkbooks. Real buying opportunities exist for those with an optimistic outlook, and those rare

individuals who can maintain contrarian thinking. Negative emotions result in pressure to sell, which drives prices lower - a self-fulfilling prophesy if ever we saw one. What makes your \$500 coin worth \$525? When my emotional desire to own it is greater than your emotional need to keep it. And both those emotions are easily influenced by market news and dealer actions; and even occasionally by logic.

The market this week continues to demonstrate evidence of strengthening, marked by real advances in the collector series and consolidation in some of the specialty areas. Dealers with ready customers are not afraid to go into the marketplace with serious bids on behalf of their clients; coins without specific buyers still enjoy little bidding interest. Dollars continue to rally from their lows of just one month ago; the only weakness seems to be in the common issues in the lower grades (MS-61 & 62). Type coins show mostly stability, with a healthy number of plus signs; likewise, for the Commemorative series. Buffalo nickels are rising in higher grades, while the MS-63 and MS-64 specimens are losing ground. Mercury Dimes are stable, as are Walking Liberty Halves (with plus activity in the top grades). Gold continues to be mixed, with a trend of plus signs evident. This market, to paraphrase the well-known expression, is 'living in interesting times.'

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDN Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 250 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. *CCDN* Bids reflect 1987 and newer certified coins.

The *Bluesheet* reports the national certified coin market on a weekly basis.

The Bluesheet

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

WE GRADE BY THE COIN, NOT THE CLOCK.

We know that an accurate grade takes time. So we spend more time on each coin to grade it accurately, instead of speeding through thousands of coins a day to beat the clock.

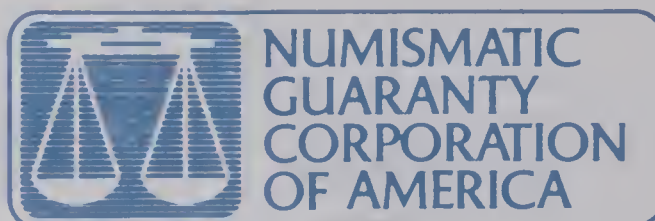

We offer limited, accurate grading.

Numismatic Guaranty Corporation knows how important it is for your coins' grades to be accurate. So we make sure our graders have plenty of time to grade your coins accurately. Our graders are limited in the number of coins they can appraise each day, and we accept only a limited number of coins for grading. We're the *only* coin grading service that sets these limits.

We've set the industry standard.

The grade we assign your coin today will still be valid *ten years from now*, because NGC-graded coins are not subject to fluctuating grading standards. We know that our greater investment in grading time produces a better investment for you: a coin with a stable grade.

For stability, reliability and accuracy, look for NGC certified coins at dealers displaying the Numismatic Guaranty Corporation of America sign.

For the NGC dealer nearest you, contact: Numismatic Guaranty Corporation,
P.O. Box 1776, Parsippany, New Jersey 07054, tel. (201) 984-6222.

Increased Dealer Bidding Benefits Entire Market

The first CCDn issue of the month always provides an interesting opportunity to examine the state of the coin market. And this has been a most interesting month. Levels for ANACS and NCI coins are lower, with many minus signs in evidence; yet, we are generally quite optimistic about this overall market.

Why? It's not even the number of plus signs in the PCGS and NGC listings, although that never hurts. Rather, we are most encouraged by the strength of the market at these levels. After many decades of watching the prices of coins go up and down, up again, and down again, we are convinced that **over time**, a coin will have no **guaranteed** specific value. As demand (and occasionally supply) fluctuates, the value of coins fluctuates. They are worth more or less relative to other coins, or some other store of value, or some other market condition. What matters most at any one time is this — is there widespread agreement in the market on the current value of the coin, and is there a healthy amount of activity at those levels?

A coin can Bid at \$1,000 (as the highest visible sight-unseen Bid), but if no one is willing to sell that week at that level, the conclusion must be drawn that the sight-unseen Bid did not accurately reflect the **true** market value for that coin that week. This is exactly the situation

that we have been observing for the last several months; however, the coin market is nearly always self-correcting, and more sight-unseen Bids are now adjusting upward to more appropriate levels.

It may be that at the \$1,000 level, the market is uncertain of the value of the coin and no transactions occur. But goodness, what if 100 specimens change hands in the marketplace at \$950? Such downward moves may generate a minus sign, but isn't it more of a "plus" to the business to have many specimens changing hands at an agreed upon price level? This is what makes for a healthy market, and this is what we are seeing now. There are plenty of plus signs on coins which continue to trade at the same **sight-seen** levels, while their **sight-unseen** Bids adjust upward. There are some minus signs on other coins whose trading frequency has increased, as the market continues to seek price levels of agreement.

Price levels for ANACS and NCI may be down somewhat from their last monthly listing, but, in the course of that month, we have seen PCGS and NGC prices firm and market activity increase. Mostly, we are seeing many more transactions taking place at these new levels, and that should bring Holiday cheer to many.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDn Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 250 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. CCDn Bids reflect 1987 and newer certified coins.

The *Bluesheet* reports the national certified coin market on a weekly basis.

The Bluesheet

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

MORGAN DOLLARS

Prooflike Morgan dollar Bids in the CDN (Greysheet) have always represented fully deep mirror prooflike Morgan dollars.
 NGC P/L dollars are deep mirror prooflikes. PCGS grades P/L or DMPL. CCDn Bids represent 1 dollar coins. P/L only.
 Bids only. Semi P/L or one-sided P/L dollars are worth less than listed DMPL Bids.

WE GRADE BY THE COIN, NOT THE CLOCK.

We know that an accurate grade takes time. So we spend more time on each coin to grade it accurately, instead of speeding through thousands of coins a day to beat the clock.

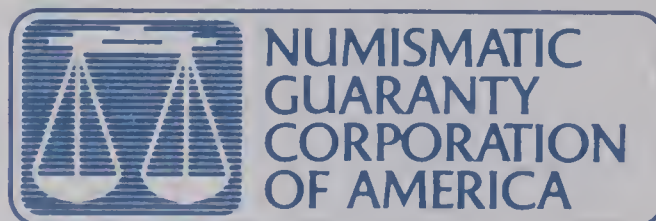

We offer limited, accurate grading.

Numismatic Guaranty Corporation knows how important it is for your coins' grades to be accurate. So we make sure our graders have plenty of time to grade your coins accurately. Our graders are limited in the number of coins they can appraise each day, and we accept only a limited number of coins for grading. We're the *only* coin grading service that sets these limits.

We've set the industry standard.

The grade we assign your coin today will still be valid *ten years from now*, because NGC-graded coins are not subject to fluctuating grading standards. We know that our greater investment in grading time produces a better investment for you: a coin with a stable grade.

For stability, reliability and accuracy, look for NGC certified coins at dealers displaying the Numismatic Guaranty Corporation of America sign.

For the NGC dealer nearest you, contact: Numismatic Guaranty Corporation,
P.O. Box 1776, Parsippany, New Jersey 07054, tel. (201) 984-6222.

Market Responds to Higher Bidding in Most Series

An overview of the entire certified coin market reveals **consistency and balance**. Every series is receiving consistent and active bidding with a large number of plus signs in the major areas, i.e., Commems, Type, Dollars, and Gold. The majority of higher Bids are found in the MS-64 and higher grades. The areas where minus signs can be found seem to indicate high population figures. As we have expressed many times in the past, as more coins become "slabbed", the more common coins will become readily obvious; supply and demand will take over and Bid levels will adjust accordingly.

The **balance** which we are seeing at this time verifies the fact that most series have a "fine line" separating the "quality coins" from the more commonly certified coins. In Commemoratives, most of the higher Bidding activity occurs for MS-64 and better quality coins. However, there are numerous buyers for MS-61 to 63 coins at current levels. There also seems to be more active and increasing Bids for PCGS certified coins.

The Dollar market is much like Commems in that MS-64 and better coins are very active with many plus signs (PCGS again carrying the load for higher Bids). Yet, unlike Commems, Dollars graded MS-63 and less are not as active at Bid levels. There is a very soft market for the common coins, mostly because there are thousands available, raw or slabbed, and there is very

little premium carried for slabbed coins (actually none in most cases). The consumer should prefer buying slabbed coins since the premium has dwindled, but he probably should not have these common dollars certified (under \$50 value) due to the cost of the service.

The Type market is actually **Boooooommming!** It is unusual for rare coins to be so active at this time of the year. Business defers to seasonal activity and the rare coin market takes a backseat until the annual FUN Show reveals market direction. It looks like this year's market direction may already be established and drive the FUN Show to new heights.

Even though higher Bidding is present in 64 and better quality Type material, there is also substantial strength in 63 and lower quality at current levels. There are any number of marketmakers willing to take the lead as Type coins appear very easy to sell.

Higher Bids are being registered for Proof Gold as this area seems to seek rejuvenation. Early in the year this market sky-rocketed, then fell substantially. It now appears that buyers feel there are profits to be made in this area. One of the concerns to non-marketmakers may be that when this area becomes oversold at high levels, there are usually a very limited number of buyers willing to stock these rarities at the then current levels.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDn Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 250 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Minimum cost is \$24 per coin and turnaround time is approximately twelve business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not the coin will be returned ungraded for a \$7.50 charge. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. CCDn Bids reflect 1987 and newer certified coins

The Bluesheet

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

MORGAN DOLLARS

Prooflike Morgan dollar Bids in the CDN (Greysheet) have always represented fully deep mirror prooflike dollars. NGC P/L dollars are deep mirror prooflikes. PCGS grades P/L or DMPL. CCN Bids represent deep mirror prooflike Bids only. Semi-P/L or one-sided P/L dollars are worth less than listed DMPL Bids.

and consistent
grading...

...Priced within reach.

Serious Numismatists

Most coin collectors like to look at the coins they buy - not at the insert in a plastic slab. Coin collectors enjoy studying their coins up close - not filing them away in a deposit box and awaiting their "appreciation." They appreciate them now.

The antiseptic nature of a slab doesn't always provide the same thrill as holding history in their hands. Yet the advantages of certification - impartial and consistent grading to a predetermined standard are available through NCI*.

Make a Comparison.

In most cases, the prices for NCI graded coins are considerably less than those certified by other services. The difference in the coins however is very slight. *We invite your comparison.* For example, look at their MS-65 common date Silver Dollars at around \$350. Then compare it with a similarly graded coin by NCI at about half the price. Can you tell the difference... and is the difference worth nearly \$200?

In a random selection of coins submitted to the other three leading services, NCI will generally agree with at least one of them on over half of the coins. Yet the wholesale price of the NCI graded coins averages less than 50% of the coins graded by other services. The average difference in grade among all the services, including NCI will be under one point. But the difference in price may be over 100%.

(NCI also offers slabbing as an option for the antiseptically minded)

Try NCI for Yourself.

Experienced collectors know good value. They know it's the combination of appearance and price that makes a purchase a good one. If you're a collector who looks at coins rather than paper inserts...compare NCI. Your eyes will be pleasantly surprised and so will your check book.

*Regular monthly listings of wholesale values for NCI graded coins appear in the *Certified Coin Dealer Newsletter*, permitting owners of NCI coins to stay in touch with market movements.

Depth and Strength of Certified Market Encouraging

As we approach the end of another year, we find that the certified coin market is deeply entrenched in the numismatic marketplace. The major grading services are constantly backlogged with coins that dealers (and their clients) feel are more readily marketable in the plastic holder. By the beginning of 1989, all four of the grading services listed in the *Bluesheet* will be slabbing coins; NCI and ANACS will continue to offer the option of certification without slabbing. With computer grading possibly on the horizon, other new services are sure to arise. Grading a minimum of 5,000 coins per month, a grading service can easily do a million dollars worth of business a year. Any service company that is capable of grossing more than a million dollars a year is sure to attract competition. And with the public demanding grading standardization, what better way to satisfy those cries than by having several reputable grading services whose grading practices are nearly interchangeable.

Typical at this time of the year is a slowdown of Bidding on the part of marketmakers. However, this year is anything but typical. It seems like the majority of dealers are not winding down 1988, but are seizing the opportunity to prepare for a strong 1989. Bidding activity remains lively and Bid levels are healthy. Of course, we still expect business to slow somewhat between Christmas and New Years while

dealers take a well-deserved break; but in this kind of market, who knows?

Nonetheless, the market is becoming stonger as dealers set their sights toward the FUN Show. Most dealers are feeling confident that next year will bring loads of fresh money into the industry as the public gains a greater degree of knowledge and faith in numismatics brought about by the consistency of the grading services.

Further evidence of this market potency can be seen in the charts as plus signs are scattered in most every series (U.S. Gold, Dollars, Commems, Walkers, Type, Mercuries and Proof Gold). For the most part, higher Bids occur for MS-65 and better quality, although, U.S. Gold, Type, Dollars, and Commems exhibit strength (in the manner of higher Bids) in lower grades as well. What is really fascinating and also encouraging is the depth of the current surge; in the past an upward market has usually been lead by just a few marketmakers. There are currently so many active buyers that it would be difficult to pick out one or two market leaders. If this were always the case, the rare coin market would have no trouble competing with other forms of conventional investments. Yet, we must walk before we run; and at least we are past the crawling stage.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDN Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 250 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Regular cost is \$24 per coin and turnaround time is approximately fifteen business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued. If not, the coin will be returned ungraded with a charge of 50% of the regular fee. They will certify coins already in holders without removal if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. CCDN Bids reflect 1987 and newer certified coins.

The *Bluesheet* reports the national certified coin market on a weekly basis.

The Bluesheet

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

WE GRADE BY THE COIN, NOT THE CLOCK.

We know that an accurate grade takes time. So we spend more time on each coin to grade it accurately, instead of speeding through thousands of coins a day to beat the clock.

We offer limited, accurate grading.

Numismatic Guaranty Corporation knows how important it is for your coins' grades to be accurate. So we make sure our graders have plenty of time to grade your coins accurately. Our graders are limited in the number of coins they can appraise each day, and we accept only a limited number of coins for grading. We're the *only* coin grading service that sets these limits.

We've set the industry standard.

The grade we assign your coin today will still be valid *ten years from now*, because NGC-graded coins are not subject to fluctuating grading standards. We know that our greater investment in grading time produces a better investment for you: a coin with a stable grade.

For stability, reliability and accuracy, look for NGC certified coins at dealers displaying the Numismatic Guaranty Corporation of America sign.

Lively Bidding Activity Continues With This Last Issue Of The Year

As this issue is being written, history is in the making. PCGS has just graded its **one—millionth** coin. This is quite remarkable in such a short period of time. PCGS was established in 1986, so this fete has been accomplished in less than three years. This event attracted many observers as the graders completed their duties. The coin, possibly referred to as the "PCGS-Millionth", was an 1894-S Morgan Dollar; it was graded MS-66. It will most assuredly fit into someone's collection as a memento, as well as a rarity, exhibiting the stature which PCGS commands within the industry.

The rare coin market continues to exhibit more depth than has been evidenced in the past. Even in 1979-80 there were not as many market leaders as there are right now. Everyone seems to have an area of proficiency in which they are attempting to be the high buyer. And as soon as the high buyer is comfortable with his Bids, he finds that he has been

passed by a new "player".

The Type market seems to be rich with bidders who have extensive want lists to fill. Furthermore, their clients seem to have an endless supply of money and are indeed exercising their will. Virtually all the nickel and silver type coins have plus signs in the majority of the 64 through 67 columns, both Proof and Mint State.

Commemoratives are another area which display a multitude of plus signs, both Gold and Silver, in MS-64 and better. This series does not enjoy the depth of the Type market, but it certainly would be considered well-balanced if the Type market was ignored. When the market becomes this "bullish", the number of discounted offerings to sell becomes very thin. Most potential sellers would rather wait to see how high bidders are willing to go; or, they will offer coins at substantial premiums over current Bids. For those dealers really anxious to buy, they may jump Bids considerably trying to entice sellers, while others will just sit back and wait for so-called premium sells and then pick-off the issues which they are looking for.

U.S. Gold buyers are highly motivated at this time. Many of the marketmakers in this series feel that prices will advance sharply next year. Buyers may be selective, looking for specific issues, but they seem like they are willing to pay the price.

PCGS Professional Coin Grading Service: Established in 1986 to grade and authenticate U.S. coins. Located in Newport Beach, CA. You must submit coins through authorized PCGS dealers. Contact PCGS at (714) 250-1211 for a list of authorized dealers (currently over 250 throughout the U.S. and Canada). PCGS has more than 15 graders on their staff and a minimum of three must agree on the grade of a coin before the final PCGS grade is determined. The service costs \$22 per coin, plus postage and insurance, no matter how valuable the coin is. When graded the coin is sonically sealed in an inert, hard plastic container and returned to the customer.

Many PCGS dealers make sight unseen bids for PCGS coins. PCGS identifies color on copper (red, red and brown, or brown), full bands on Mercury Dimes, full head on Standing Liberty Quarters, and Prooflike and Deep Mirror Prooflike on Morgan Dollars. PCGS has a comprehensive grading set which includes most major series. PCGS publishes monthly population reports. PCGS has a cash-backed grading guarantee.

ANACS American Numismatic Association Certification Service: First authentication service, established by the American Numismatic Association in 1972 (to which grading was added in 1978). The ANA is a nonprofit, educational organization chartered by Congress. ANACS proceeds are channeled into ANA membership services. ANACS renders independent, third-party opinions that are free of market influences. The Service employs a team of authenticators/graders, three of whom must agree to determine a final grade. ANACS utilizes nearly 100 expert numismatic consultants to reaffirm authentication and grading opinions.

The ANA Certification Service issues certificates displaying color photographs of the obverse and reverse. Luster, surfaces, eye appeal and strike are described on the back of the certificate. They do not identify color (red, brown) on copper, full split bands on Mercury dimes, full head for Standing Liberty quarters, or prooflike on dollars.

CCDn Bids reflect 1986 and newer certified coins. Certificates may not have any negative comments to command bid prices. ANACS is currently working on the establishment of grading sets for every series possible. Costs range from \$10 to \$20, depending on the type of service rendered. On request, ANACS will certify coins in sealed holders. Contact ANACS at 818 N. Cascade Ave., Colorado Springs, CO 80903-3279, phone 719-632-2646. Due to current trading volume, ANACS coins will only be listed once a month.

NGC Numismatic Guaranty Corporation of America: Established in 1987, to grade and authenticate U.S. coins. Located in Parsippany, New Jersey. You must submit coins to NGC through authorized NGC dealers. Phone: (201) 984-6222. NGC has more than 15 graders on its staff and every coin is viewed by a grading team of 3-5 members. A finalizer assembles the grades and verifies the final grade. The finalizer must not be in the buying or selling end of the coin business. The service costs a minimum of \$23, plus postage and insurance, no matter what the value of the coin. After it is graded, it is then placed in a "lab-tested" (inert), hard plastic holder and sonically sealed, then returned to the customer.

There are over 250 authorized NGC dealers who will send coins in for grading. Many of these dealers will make sight unseen bids for NGC graded coins. NGC will not grade coins dated after 1964. Their grading philosophy is designed to be strict no matter what condition the coin market is in. The principals of NGC do not buy or sell coins for commercial profit: "Arm's length". NGC has a grading set for the popular series and is currently working on sets for other series.

NCI Numismatic Certification Institute: Organized in June, 1984, to grade and authenticate U.S. coins. NCI guarantees the authenticity of every coin it certifies. They are located at 311 Market St., Dallas, TX 75202. Phone: (214) 742-2200. NCI uses three graders in a determination of a final grade, and thirty professional dealers act as consultants. Many of these dealers also market NCI coins.

Grading is based on the philosophy of James Halperin ("N.C.I. Grading Guide") which may be considered somewhat liberal (commercial) when compared to the other three services listed. Regular cost is \$24 per coin and turnaround time is approximately fifteen business days or less. You may request a specific grade and if NCI can certify at that grade or higher, a certificate will be issued; if not, the coin will be returned ungraded with a charge of 50% of the regular fee. They will certify coins already in holders without removal, if requested.

NCI has established grading sets for silver dollars, \$20 St. Gaudens, and Walking Liberty halves. They also have reference sets for silver dollars pertaining to "eye appeal", "luster", "surface preservation", and "strike". Due to current trading volume, NCI coins will only be listed once a month. CCDn Bids reflect 1987 and newer certified coins.

The Bluesheet reports the national certified coin market on a weekly basis.

The Bluesheet

Certified Coin Dealer newsletter reports the national coin market for certified coins only. Only the most active areas for the most active grading services are represented. CCDn uses every means available to insure accuracy and completeness of the bid prices shown. Since prices represent the highest known bids at press time and they are based strictly on dealer needs, prices will fluctuate according to these needs.

Individual buy and sell prices will vary from dealer to dealer. What price levels an individual dealer buys or sells at is strictly up to the dealer. CCDn represents only that the bid prices listed were the highest known to us at press time.

MORGAN DOLLARS

Prooflike Morgan dollar Bids in the CDN (Greysheet) have always represented fully deep mirror prooflike dollars
 NGC P/L dollars are deep mirror prooflikes. PCGS grades P/L or DMPL. CCDn Bids represent deep mirror prooflike
 Bids only. Semi-P/L or one-sided P/L dollars are worth less than listed DMPL Bids
